Rationally Right An Explanation Of The Conservative Paradigm:

Rationally Right Stephen R. Meyer, 2002 *Rationally Right* delves into the basis for the two different political paradigms and how these paradigms are applied to issues as diverse as education retirement gun control and taxation Cognition and Crime Benoit Leclerc, Richard Wortley, 2013-08-15 The rational choice perspective developed by Cornish and Clarke in 1986 provides criminologists with a valuable and practical framework for purposes of crime control and prevention More than twenty five years later *Cognition and Crime* pushes the boundaries of this field of research by bringing together international leading or emerging researchers in this area of script analysis into a single volume for the first time It also presents a series of original contributions on offender decision making during crime and crime script analysis as well as offering a critical perspective of what could be achieved in the future to further help develop this field of research for prevention purposes In addition each empirical chapter treats a specific and important form of crime such as stalking violence drug dealing human trafficking for sexual exploitation child sexual abuse and transnational illegal market of endangered species Academics and students from various backgrounds and interested in investigating and preventing crime will benefit from this book as it applies crime script analysis and discusses new and future developments in regards to this approach and the rational choice perspective This volume will be of particular relevance for practitioners such as police officers and crime investigators

Rational Choice Marxism T. Carver, P. Thomas, 2016-07-27 To begin with rational choice Marxism promised to construct historical explanations and social theories with clarity and rigour Subsequently it took a political turn in addressing issues of class and production and the prospects for electoral socialism This anthology commences with the founding classics Erik Olin Wright's What is Analytical Marxism and Alan Carling's spirited challenge to the Marxist establishment which are answered with critical responses detailed by Ellen Meiksins Wood and Michael Burawoy in previously uncollected debates Also included are further debates charting the historical progression of rational choice Marxism The editors demonstrate that the clarity and rigour originally promised by the rational choice Marxists was never in fact achieved but that rational choice Marxism has considerably enhanced the theoretical treatment of class and production in a world of commodification and difference Environmental Human Rights Jan Hancock, 2019-07-12 This title was first published in 2003 *Environmental Human Rights* redefines the political ethical and legal relationships between the environment and human rights to claim the human rights to an environment free from toxic pollution and to natural resources Through a focus on the operational dynamics of social power this compelling book details how global capitalism subjugates concerns of human security and environmental protection to the values of allocative efficiency and economic growth The capacity of social power to construct ethical norms and to determine the efficacy of law is examined to explain how ethical and legal concepts have been selectively applied to accommodate existing patterns of production consumption and exchange that cause environmental degradation and human rights violations By looking at how environmental values have been systematically excluded from the

human rights discourse the book claims that human rights politics and law has been constructed on double standards to accommodate the destructive forces of capitalism

Interpreting Policy Convergence Between the Left and the Right

Johan Wennström, 2019-01-17 This dissertation is made up of four essays that address major problems in the policy areas of education and immigration in Sweden and an introductory essay that offers an overarching analysis of the results of the four individual studies The first three essays analyze the significant decline in quality of elementary and secondary education since the late 1990s from three different angles the decline in teachers working conditions and status Essay I the deficiencies in the regulatory framework of Sweden's system of school competition between public and for profit providers of education Essay II and the prescribed view of knowledge in Swedish schools Essay III The fourth essay examines the policy of refugee placement in recent years It shows that peripheral and rural municipalities with declining populations and high unemployment have received greater numbers of refugees per capita than growing urban municipalities offering better employment opportunities The introductory essay focuses on the common thread in the four essays namely policy convergence between the Left and the Right In fact the empirical evidence in the individual studies suggests that the Social Democrats and the Moderate Party have a propensity for policy convergence in the two areas analyzed but that it is unintentional and hard to detect for the actors themselves This observation runs counter to what is typically assumed in political science namely that the Left and the Right are polar opposites with widely divergent policy agendas

Avhandlingen består av fyra artiklar om svensk utbildnings och migrationspolitik och en kappa som syntetiserar de enskilda studierna Den första artikeln undersöker hur svenska lärare yrkesstolthet och inneboende drivkrafter att göra ett bra jobb har påverkats av vinst och högerpolitikens syn på lärarket Den andra artikeln undersöker hur marknadsutövningen av det svenska skolväsendet har påverkat kunskapsnivån bland svenska elever Den tredje artikeln bygger vidare på de två första studierna och undersöker synen på manskunskaper i skolans styrdokument och dess påverkan på lärarkets ställning och elevers kunskaper Den fjärde artikeln undersöker det geografiska mönstret i kommunplaceringen av nyanlända flyktingar i Sverige Avhandlingens övergripande bidrag är att den genom att studera två olika politikområden visar att vinst och höger i Sverige har en omedveten benägenhet att konvergera politiskt Trots att man anser sig stå på olika sidor i politiken visar empirin i de fyra studierna att vinst och högerpolitiker i främst Socialdemokraterna och Moderaterna har dragit åt samma håll i både utbildnings och migrationspolitiken Den första artikeln visar att politiker både till vinst och till höger ofta har varit skeptiska till lärarnas inflytande i skolan och sett det som ett hinder för elevernas frihet och lärande vilket har bidragit till att underminera lärarnas professionella etos Den andra artikeln visar att både vinst och högerpolitiker underlåtit att utforma regelverket för skolkonkurrensen så att privata utfärdades styrdes mot att erbjuda en undervisning av hög kvalitet Istället uppstod en konkurrens med höga betyg Den tredje artikeln visar liksom att skolans konstruktivistiska kunskapssyn som både har reducerat lärarnas yrkesroll till förmån för elevernas eget arbete och förstärkt utvecklingen mot en konkurrens med betyg har stått

Paradigms of Social Order Sergio Dellavalle,2021-04-25 No social life is possible without order Order being the most constituent element of society it is not surprising that so many theories have been developed to explain what social order is and how it is possible as well as to explore the features that social order acquires in its different dimensions The book leads these many theories of social order back to a few main matrices for the use of theoretical and practical reason which are defined as paradigms of order The plurality of conceptual constructs regarding social order is therefore reduced to a manageable number of theoretical patterns and an intellectual map is produced in which the most significant differences between paradigms are clearly outlined Furthermore the paradigmatic revolutions are addressed that marked the most relevant turning points in the way in which a well ordered society should be understood Against this background the question is discussed on the theoretical and practical perspectives for a cosmopolitan society as the only suitable possibility to meet the global challenges with which we are all presently confronted

Microeconomic Issues Today Robert Barry Carson,Wade L. Thomas,Jason Hecht,2002 This new updated edition covers seven current microeconomic issues including agriculture consumer welfare the environment competition deregulation income distribution and fair taxation The seventh edition has been updated to include current economic data and an instructor s manual with a test bank and discussion questions is available to professors who adopt this book In addition PowerPoint downloads are available as teaching aids

Common Sense as a Paradigm of Thought Tim Delaney,2018-12-07 The notion of common sense and abiding by its implications is something that seemingly everyone agrees is a good way of making behavioral decisions and conducting one s daily activities This holds true whether one is a liberal moderate or conservative young or old and regardless of one s race and ethnicity gender or sexual orientation If utilizing common sense is such a good idea why then do so many people seem to violate it This is just one of many significant questions surrounding the idea of common sense explored and discussed in this book This volume presents common sense as a paradigm of thought and as such compares it to other major categories of thought tradition faith enlightened and rational Combining a balance of practical everyday approaches through the use of popular culture references and featured boxes and academic analysis of core and conceptual methodological issues Delaney

demonstrates The limitations of common sense and its place in everyday social interactions How we learn about common sense Why common sense is so important Common Sense as a Paradigm of Thought introduces readers to a rich variety of sociological authors and will appeal to students and researchers interested in fields such as sociology philosophy social psychology cultural studies communications and health studies **Theory Construction in Second Language**

Acquisition Geoff Jordan,2004 Recently many SLA researchers have adopted a postmodernist approach which challenges the assumption that SLA research is a rationalist scientific endeavour The resulting epistemological arguments plus problems of theory proliferation contradicting theories and theory domain hinder progress towards a unified theory of SLA Theory Construction in SLA addresses these problems by returning to first principles it asks whether there is such a thing as reliable knowledge what is special about scientific method and how we can best explain SLA It is the first book to use the philosophy of science in order to examine the epistemological underpinnings of SLA research and evaluate rival theories of SLA Part One explores the central issues in the philosophy of science defends rationality against relativists and offers Guidelines for theory assessment Part Two examines different theories of SLA and evaluates them in terms of how well they stand up to the Guidelines *Paradigms Explained* Erich von Dietze,2001-09-30 The author examines both the contributions and the

limitations of Kuhn s work on paradigm theory offering arguments for why Kuhn s initial ideas fail as well as how his later and lesser known works offer a modified and more workable solution to the problems Kuhn attempted to address in *Structure of Scientific Revolutions* Publisher Ideology, Social Theory, and the Environment William D. Sunderlin,2003 Does human population growth threaten the environment or does it guarantee we will safeguard it Is economic growth the key ecological problem or is it in fact the solution What will be the leading force to save the planet civil society government or private enterprise This book shows that these polemical debates are governed not so much by access to facts as they are by the political ideology of the expert advancing a particular argument Moreover the thoughts of these experts tend to be based largely in just one of three competing streams of political thought the left the center or the right Drawing on social theory the author explains the philosophical origins of this tendency to rely on just one of three traditions and why this poses a serious obstacle to conceptualizing the cause nature and resolution of environmental problems Sunderlin argues that laying the foundation for a livable world involves giving conscious and dedicated attention to the core tenets of all three political traditions action against class inequality and advocacy of social justice within and among countries reformation of laws and policies emanating from the halls of power and technological innovation in centers of research and wholesale cultural change and promotion of individual initiative responsibility and creativity In Search of Sustainable Livelihood Systems Ruedi Baumgartner,Rudolf Högger,2004-08-30 Livelihood systems are more than sets of material and economic conditions They cater to a number of human needs The contributors to this volume maintain that a livelihood system embraces not just economic conditions for physical subsistence but provides material continuity and cultural meaning to the life of a family

The Conservative Human Rights Revolution Marco Duranti, 2017 The Conservative Human Rights Revolution reconsiders the origins of the European human rights system arguing that its conservative inventors foremost among them Winston Churchill conceived of the European Convention on Human Rights ECHR as a means of realizing a controversial political agenda and advancing a Christian vision of European identity

Rationality in Context Steven Bland, 2023-12-01 This book uses the psychological literature on rationality to weigh in on the recent debate between virtue epistemologists and epistemic situationists It argues that both sides have misconstrued the literature and that an interactionist framework is needed to square epistemic theory with empirical facts about reasoning and inference The explosion of empirical literature on human rationality has led to seismic shifts across a multitude of academic disciplines This book considers its implications for epistemology In particular it critically evaluates the treatment of the rationality literature within the recent controversy between virtue epistemologists who attempt to ground knowledge in stable epistemic virtues and epistemic situationists who claim that such a project is doomed by empirical evidence of widespread irrationality It links this foundational controversy to two of the most important debates in psychology the Rationality Wars and the person situation debate The book argues that both virtue theorists and epistemic situationists have misunderstood the implications of these debates leading them to focus exclusively on personal dispositions and situational factors as two independent sources of epistemic success failure and improvement A more accurate reading of the empirical literature implies that interactions between epistemic agents and their social informational and institutional environments are the fundamental drivers of both rational and irrational behaviour An interactionist framework motivated by this insight conceives of epistemic virtues and vices as both responsive to and responsible for the environments in which they are manifested and cultivated The central aim of this book is to present and defend this novel type of virtue epistemology Rationality in Context will be of interest to scholars and advanced students working in epistemology philosophy of science philosophy of psychology cognitive psychology and social psychology

Excellence and Sustainability Sorab Sadri and Trilok Kumar Jain, 2015-01-16 The book is about the challenge of excellence in the present day context The book is in sequel to excellent books written on similar subjects particularly those of Prof Tom Peters Excellence is the most important issue these days and therefore this book is a must for every corporate executive This book is written by Prof Sorab Sadri with over 4 decades of corporate and research experience and Prof Trilok Kumar Jain with over 2 decades of academic and consultative experience Thus this book will bridge the gap This book will meet the requirements of corporates academicians and researchers

Evaluating Progress in International Relations Annette Freyberg-Inan, Ewan Harrison, Patrick James, 2016-10-04 This edited volume offers a systematic evaluation of how knowledge is produced by scholarly research into International Relations The contributors explore three key questions To what extent is scientific progress and accumulation of knowledge possible What are the different accounts of how this process takes place And what are the dominant critiques of these understandings It is the first publication to survey the full

range of perspectives available for evaluating scientific progress as well as dominant critiques of scientism In its second part the volume applies this range of perspectives to the research program on the democratic peace It shows what we gain by accommodating and enabling dialogue among the full range of epistemological approaches The contributors elaborate and defend the epistemological position of sociable pluralism as one that seeks to build bridges between soft positivism critical theory and critical realism The underlying idea is that if the differences between the various approaches used by different communities of researchers can be understood more clearly this will facilitate meaningful cross cutting communication dialogue and debate and thereby enable us to address real world problems more effectively This timely and original work will be of great interest to advanced level students and scholars dealing with philosophy of science and methodological questions in International Relations

Human Rights Or Religious Rules? J. A. van der Ven, 2010 Drawing on historical insights systematic reflections and empirical data this book offers a substantive understanding of the complex relationship between religion and human rights and of the empirical impact of Christianity and Islam on the attitudes toward human rights i e a human rights culture

The Macro Polity Robert S. Erikson, Michael MacKuen, James A. Stimson, 2002-01-14 Borrowing from the perspective of macroeconomics it treats electorates politicians and governments as unitary actors making decisions in response to the behavior of other actors The macro and longitudinal focus makes it possible to directly connect the behaviors of electorate and government The surprise of macro level analysis emerging anew in every chapter is that order and rationality dominate explanations

Max Weber's Politics of Civil Society Sung Ho Kim, 2004-06-07 This book is an in depth interpretation of Max Weber as a political theorist of civil society On the one hand it reads Weber's ideas from the perspective of modern political thought rather than the modern social sciences on the other it offers a liberal assessment of this complex political thinker without attempting to apologize for his shortcomings Through an alternative reading of Weber's religious epistemological and political writings the book shows Weber's concern with public citizenship in a modern mass democracy and civil society as its cultivating ground Kim argues Weber's political thought thus recast was deeply informed by Kant Hegel Nietzsche and other German political thinkers and also reveals an affinity to the liberal republican tradition best represented by Mill and Tocqueville Kim has effectively resuscitated Weber as a political thinker for our time in which civic virtues and civil society have once again become one of the dominant issues

Beyond Fragmentation Bernhard Ott, 2011-06-17 *Beyond Fragmentation* is an inquiry into the development of mission studies in evangelical theological education in Germany and German speaking Switzerland between 1960 1995 This is carried out by a detailed examination of the paradigm shifts which have taken place in recent years in both the theology of mission and the understanding of theological education David Bosch's proposal of an emerging ecumenical mission paradigm is examined with reference to the schools in membership with the Konferenz Bibeltreuer Ausbildungsstätten KBA The KBA schools have been greatly influenced by the work of Peter Beyerhaus and the Frankfurt Declaration 1970 and as such defend a conservative theological

position and resist the challenge of Bosch's mission paradigm shift the key issue being that of hermeneutics Ott further explores the emerging new paradigm of theological education in both the Western and Two Thirds World contexts While the evangelical Bible school movement has historically embodied many of the features of this new paradigm they nevertheless have jeopardized these by their pursuit of academic accreditation Ott believes that theological conservatism has caused the KBA schools to resist changes in the areas of contextual and inductive learning Finally Ott studies the schools pattern of change and change resistance through combining the insights of Thomas Kuhn Hans Kung and Alasdair MacIntyre to hermeneutical and epistemological issues
