Nationalism and International Society James Mayall, 1990-02-23 Geared to the interests of modern historians of world decolonization and economic nationalism this study of international relations will provide insight into issues relevant to nationalism and international society      *China's New Place in a World in Crisis* Ross Garnaut, Ligang Song, Wing Thye Woo, 2009-07-01 The world and China's place in it have been transformed over the past year The pressures for change have come from the most severe global financial crisis ever The crisis has accelerated China's emergence as a great power But China and its global partners have yet to think or work through the consequences of its new position for the governance of world affairs China's New Place in a World in Crisis discusses and provides in depth analysis of the following questions How have China's growth prospects been affected by the global crisis How will the crisis and China's response to it impact China's major domestic issues such as industrialisation urbanisation and the reform of the state owned sector of the economy How will the crisis and the international community's response to it affect the rapidly emerging new international order What will be China's and other major developing countries new role Can China and the world find a way of breaking the nexus between economic growth and environmental sustainability especially on the issue of climate change      **Trading Nation** Mike Adams, Nicolas Brown, Ron Wickes, 2013-12-01 From wool and gold to minerals and manufacturing Trading Nation reviews the history of Australia's trade and trade policy since Federation The book tackles a number of key questions which are central to the nation's future What is the future of our trade in minerals agriculture manufacturing and services How can trade policy help address our faltering productivity Is the Doha Round of multilateral trade negotiations dead and if not what can be done to conclude it What can we expect from new free trade agreements Is there more we could be doing in trade policy with Europe India and Latin America This comprehensive book also looks ahead at the options for Australia's future trade and trade policy      **The Pacific Rim, Second Revised Edition** Peter N. Nemetz, 1990-01-01 As the importance of the Pacific Rim as a global centre of large scale investment development and trade continues to increase so do the potential benefits that Canada and other countries could reap as a result of an increased presence in this diverse region This book a revised and to a large extent new version of The Pacific Rim Investment Development and Trade 1987 integrates a broad range of current economic data concerning the Pacific Rim with some of the more important theoretical issues in the area of economic development and trade It demonstrates the paradoxical combination of strength and fragility that characterizes the emerging integrated Pacific Rim economy and attempts to clarify the nature of the framework and constraints that face foreign investors and trading partners The historical background of Japan's trade with other Pacific nations is examined in the opening chapter which is complemented by a new article outlining in detail the nature of and rationale for the profound

change in Japan's foreign direct investment in the 1980s. Other articles analyze trade in the ASEAN countries: Indonesia, Malaysia, the Philippines, Singapore, and Thailand, and discuss the emerging financial centres in the Pacific Rim. New contributions deal with the policy environment for Pacific strategic management, compare the financial centres of Hong Kong and Singapore as these face the challenge of strategic adjustment and repositioning in international financial markets during the 1990s, and present a theoretical framework for comparing US and Japanese trade policies. The second part of the book examines the critical role of energy in the future development of the Pacific Rim and its interdependence with other global regions. New articles discuss the progress and prospects for energy cooperation in the Pacific Basin and the potential for further development of nuclear power, while those dealing with the British Columbia coal industry and the changes in the energy systems of Japan and China have been updated to reflect current data. Another new contribution seeks to explain the excess capacity in the coal industry, coming to the conclusion that the experience of the past twenty years is unlikely to be repeated thanks to new technologies in steel production and the increased steel capacity of such Pacific Rim countries as Korea, Taiwan, and China. Looking beyond its traditional ties with Europe and the United States, Canada is in a particularly advantageous position to participate in the development and integration of the Pacific Basin. Canada's geographic location, coupled with its increasing economic and cultural ties to East Asia, suggest that this country can have a profound effect upon and will be profoundly affected by Pacific Rim development in the coming decade. While the risks may be high and the payback period long, the potential return on investment is significant.

**Perspectives on Economic Integration and Business Strategy in the Asia-Pacific Region** Sam Dzever, Jacques Jaussaud, 1997-08-12. The book contains selected papers presented at two international Euro-Asia research conferences held in Nantes and Poitiers, France, in 1994 and 1995. These papers are among the most recent empirical works concerned with the analysis of economic transformation and business strategy in the Asia-Pacific region. Various themes are addressed, ranging from an assessment of the environment to more specific issues, e.g., business and marketing strategies of firms operating in this region. Countries given particular attention include China, Japan, South Korea, India, Taiwan, and Vietnam. The book represents a comprehensive and up-to-date appraisal of the effects of economic transformation and business strategy of firms operating in one of the world's most dynamic regions.

**Asia-Pacific Diplomacy** Lawrence T. Woods, 1993-07-01. The emergence of Asia-Pacific regionalism, as witnessed by the increasing influence of the Asia-Pacific Economic Cooperation forum and the annual ASEAN Post Ministerial Conference, highlights one of the major trends in late twentieth-century geopolitics and international relations. Asia-Pacific Diplomacy traces the evolution of the Pacific economic cooperation movement by examining the diplomatic contributions of three international nongovernmental organizations: INGOs, the scholarly Pacific Trade and Development Conference (PAFTAD), the business-oriented Pacific Basin Economic Council (PBEC), and the multipartite academic business and government Pacific Economic Cooperation Council (PECC). Lawrence Woods also provides a historical perspective by assessing the work of the

Institute of Pacific Relations forerunner of the INGOs This book makes an important contribution to the study of international political and economic institutions It argues that as the regional cooperation movement expands at the governmental level an understanding of the nongovernmental roots of that movement is required if the diplomatic contributions of the INGOs are to be retained

**China's Iron Ore Boom** Luke W. L. Hurst, 2016-07-01 China's emergence as the world's second largest economy has been driven by more than four decades of explosive growth To support this expansion China has required massive expansion in its steel production capacity which is highly correlated to its demand for iron ore imports The scale and pace of China's iron ore demand shock has pushed the global iron ore market into a historical adjustment Using economic frameworks this book brings to bare new data and field observations throughout Asia and Africa to investigate how the rapid growth in China's iron ore demand has affected the organisation and structure of the global iron ore market The research provides several important contributions to the extant literature including analysis of whether the Big Three Asian market iron ore exporters coordinated to sustain the profits arising from the price boom estimating the financial impact of the Chinese state's intervention in iron price negotiations and addressing the concerns arising from the Chinese state's provision of cheap financial support for its companies iron ore procurement Offering unique insights into China's economic rise and the structure of the iron ore market this book will be relevant to students and scholars of resource economics and the Australian and Chinese economies

**How Asia Got Rich** Edith Terry, 2015-05-20 Within a few short months in 1997 Asian economies that had been considered not only healthy but miraculous suddenly fell off a precipice as investors withdrew massively first from Asian currencies and in rapid order from equity markets across the region On October 27 1997 the turmoil in Asian markets spooked Wall Street in the largest single day decline in history a drop of 550 points It was predicted that the Asian crash could drive the US trade deficit from 191 billion to 300 billion by 1998 creating huge new tensions in relations with some of the largest US trading partners These wrenching changes following a generation of success raise numerous questions about the steps that led to the crisis its likely outcome and the limits and constraints of Asian capitalism Edith Terry presents a blow by blow account of the crisis beginning with the 1996 collapse of the Bangkok Bank of Commerce In her overview she links the fall of the Asian miracle with the theme of globalization arguing that the crisis demonstrates the urgency of dismantling restraints to trade investment and financial services and that the United States should take leadership in pushing for new and sweeping reform through the World Trade Organization and in bilateral negotiations with its trading partners

The final section of the book deals with the rise of the Asian miracle how the myth was created who created it why it succeeded for so long and is informed by analysis of the Japanese prototype
