Mohan, 2007 Business ethics is a form of the art of applied ethics that examines ethical rules and principles within a commercial context the various moral or ethical problems that can arise in a business setting and any special duties or obligations that apply to persons who are engaged in commerce Business ethics can be both a normative and a descriptive discipline As a corporate practice and a career specialisation the field is primarily normative In academia descriptive approaches are also taken The range and quantity of business ethical issues reflects the degree to which business is perceived to be at odds with non economic social values Historically interest in business ethics accelerated dramatically during the 1980s and 1990s both within major corporations and within academia For example today most major corporate websites lay emphasis on commitment to promoting non economic social values under a variety of headings e g ethics codes social responsibility charters In some cases corporations have redefined their core values in the light of business ethical considerations Catching business ethics in action however remains a seldom spotted nugget for in reality it depends on the characters of the characters
