

# Reading: An Auditory-Vocal Process

*Alex Bannatyne*

**T**HE ABOVE TITLE is also the title of my latest book which has just been published by Academic Therapy Publications. I make no apology for using the title again or for giving the concepts expressed in the book further exposure in this paper because I wish to see every learning disability teacher and reading teacher use an auditory-vocal psycholinguistic approach to the teaching of reading, spelling, writing, and language.

It has always puzzled me that so many colleges and teachers continue to promote and use "whole-word" or "sight" techniques with children who are either learning to read or are in need of remediation. Even the popular phonics-linguistics methods, though a considerable improvement on basal readers, very often do not place sufficient stress on training clear articulation or keen ears for phonemes.

The English language is a phonetic language in which the visual symbols (graphemes) represent sounds (phonemes) and it is the *sounds* which, in various sequential combinations, form words. The visual symbols (graphemes) never directly represent objects or concepts (meanings) except in ideographic or logographic languages such as Chinese. In a phonetic language meanings are always the property of (are associated with) the spoken word, *not* the printed word. The printed word is associated only with the spoken word. Thus we get the following associative memory links in a phonetic language:

## Reading An Auditory Vocal Process:

*Reading, an Auditory Vocal Process* Alexander Bannatyne, 1973-01-01      *Understanding and Teaching Reading* Emerald Dechant, 2013-09-13 In the words of Aldous Huxley Every man who knows how to read has it in his power to magnify himself to multiply the ways in which he exists to make his life full significant and interesting Few people question the value of reading in fact most extol its virtues As our culture becomes more complex reading plays an increasingly greater role in satisfying personal needs and in promoting social awareness and growth In the last 20 years the teaching of this invaluable skill has focused so intensely on comprehension and prediction from context that it has lost sight of the significance of automaticity and fluency in the word identification process Reading is a synthesis of word recognition and comprehension thus this text is about these basic processes and their integration A common plea from teachers today is that research and psychology be translated into teaching behavior Therefore the aim of this book is twofold one to identify report organize and discuss those bits of data research and theory that are most relevant to the teacher s understanding of the reading process and two to help educators to interpret and apply theory and research data to everyday classroom teaching as well as to the problems encountered frequently in developmental and remedial teaching      Principles and Methods of Teaching Reading Joseph Schimmel Taylor, 1912      *Psychological Monographs* , 1913 Includes music      **Psychological Monographs** Psychological Review Publications, 1900      **Control Processes in Modified Handwriting** June Etta Downey, 1908      *Psychological Review ...* , 1908      *The Psychological Review* , 1908      **The Psychological Review** Joseph Peterson, June Etta Downey, 1908      Control Processes in Modified Handwriting Joseph Peterson, June Etta Downey, 1908      **Departments of Labor and Health, Education, and Welfare appropriations for 1980** United States.
