Studying Language through Literature invites readers to reconsider the opportunity represented by literary texts for language related purposes. Despite the close relationship between literature and language in educational contexts, literature is frequently associated with teaching practices which have been judged to be unsuccessful. Subsequently, texts of the non literary type are preferred on the basis that they are authentic and closer to real language. The everlasting relationship between language and literature is here reassessed starting from two assumptions: literature is the expression of an emphasized perception of reality, be it private, collective or pertaining to a certain temporal/spatial context, and literary language is language in its utmost form. Following an outline of the philosophy that governs the book, each chapter presents specific insights on the use of the various different literary genres, namely fiction, poetry and drama. The opportunities offered by translation in the foreign language classroom constitute a recurrent theme throughout the book, although Chapter 5 is entirely devoted to translation criticism. The closing pages put forward a few reflections on assessment. While offering some food for thought in order to reassess the role of literature in the language class, this book puts together ideas, considerations and suggestions from which the reader is free to pick, mix and adjust, exploiting them to her/his greatest benefit.

The Routledge Handbook of Language and Creativity Rodney H. Jones, 2015-09-08. The Routledge Handbook of Language and Creativity provides an introduction to and survey of a wide range of perspectives on the relationship between language and creativity. Defining this complex and multifaceted field, this book introduces a conceptual framework through which the various definitions of language and creativity can be explored. Divided into four parts, it covers different aspects of language and creativity, including dialogue, metaphor and humour; literary creativity, including narrative and poetry; multimodal and multimedia creativity in areas such as music, graffiti and the internet; creativity in language teaching and learning. With over 30 chapters written by a group of leading academics from around the world, The Routledge Handbook of Language and Creativity will serve as an important reference for students and scholars in the fields of English language studies, applied linguistics, education and communication studies.

Reading Between the Lines Peter C. Patrikis, 2008-10-01. This book presents a collection of new and stimulating approaches to reading in a foreign language. The contributors to the volume all place reading at the heart of learning a foreign language and entering a foreign culture, and they consider issues and methods of language education from such diverse perspectives as cognitive theory, applied linguistics, technology, as hermeneutic history, literary theory and cross cultural analysis. The contributors, teachers of French, German, Greek, Japanese and Spanish, call for language teachers and theorists to refocus on the importance of reading skills. Emphasizing the process of reading as analyzing and understanding another culture, they document various practical methods, including the use of computer technology for enhancing language learning and fostering cross cultural understanding.
