

Stages of Reading Development

by Jeanne S. Chall

stage Zero: Pre-reading/Pseudo reading (6 mos.-6 years old)

the child understands thousands of words but can read few if any of them

how to acquire:

- provide with books
- dialogic reading

stage One: initial reading and decoding (6-7 years old)

-child learns relation between letters and sounds, printed and spoken words and can read simple text, sound out new syllable words

-child understands 4000 words when heard but can read about 600

how to acquire:

- direct instruction and practice
- reading of simple stories with words of high frequency (most used words)

stage Two: Confirmation & fluency (7-8 yrs old)

-The child can read simple, familiar & selection with increasing fluency

- listening is still more effective than reading

How to acquire:

- Provide with direct instruction in advance decoding skills through vocabulary activities

stage Three: reading for learning the new (9-13 yrs old)

A learner learns new ideas given new knowledge and experiences new feelings

-at the beginning of this stage listening is more comprehensive and at the end, reading is more comprehensive

How to acquire:

- Provide materials with increasingly more complex texts

stage Four: reading at multiple view points (15-17 years old)

Readers read from broad range of complex materials

Reading comprehension at this stage is better than listening comprehension

How to acquire:

- through reading magazines and biological references
- through studying about words and word parts

stage Five: construction-reconstruction (18 years old and up)

Readers read for one's own purposes

Reading at this stage is more efficient than listening

How to acquire:

- through reading more difficult materials
- graphic organizers are very good help for college students
- through context clues

Reading Development And Continuum

Educating Deaf Learners Harry Knoors, Marc Marschark, 2015-06-10 Education in general and education for deaf learners in particular has gone through significant changes over the past three decades And change certainly will be the buzzword in the foreseeable future The rapid growth of information and communication technology as well as progress in educational psychological and allied research fields have many scholars questioning aspects of traditional school concepts For example should the classroom be flipped so that students receive instruction online at home and do homework in school At the same time inclusive education has changed the traditional landscape of special education and thus of deaf education in many if not all countries and yet deaf children continued to lag significantly behind hearing peers in academic achievement As a consequence of technological innovations e g digital hearing aids and early bilateral cochlear implants the needs of many deaf learners have changed considerably Parents and professionals however are just now coming to recognize that there are cognitive experiential and social emotional differences between deaf and hearing students likely to affect academic outcomes Understanding such differences and determining ways in which to accommodate them through global cooperation must become a top priority in educating deaf learners Through the participation of an international interdisciplinary set of scholars *Educating Deaf Learners* takes a broader view of learning and academic achievement than any previous work considering the whole child In adopting this broad perspective the authors capture the complexities and commonalities in the social emotional cognitive and linguistic mosaic of which the deaf child is a part It is only through such a holistic consideration that we can understand their academic potential

Development of Orthographic Knowledge and the Foundations of Literacy Shane Templeton, Donald R. Bear, 2013-07-04 This volume unites spelling and word recognition two areas that have largely remained theoretically and empirically distinct Despite considerable advances in the investigation of processes underlying word perception and the acknowledgement of the seminal importance of lexical access in the reading and writing processes to date the development and functioning of orthographic knowledge across both encoding and decoding contexts has rarely been explored The book begins to fill this void by offering a coherent and unified articulation of the perceptual linguistic and cognitive features that characterize an individual's advancing word orthographic knowledge providing evidence for a common knowledge base underlying spelling in writing and word recognition in reading From a developmental perspective the studies and syntheses presented in this volume blend insights from psychology and language study with those from clinical and classroom observations These insights help explain how individuals from preschool through adolescence develop knowledge of the orthographic system underlying word structure in English and how they apply this knowledge in actual writing and reading contexts Implications are drawn for the assessment and teaching of spelling vocabulary and word analysis from primary through middle grades
