Reason's Muse Geneviève Fraisse, 1994-05-28 The French Revolution proclaimed the equality of all human beings yet women remained less than equal in the new society The exclusion of women at the birth of modern democracy required considerable justification and by tracing the course of this reasoning through early nineteenth century texts Geneviève Fraisse maps a moment of crisis in the history of sexual difference Through an analysis of literary religious legal philosophical and medical texts Fraisse links a range of positions on women's proper role in society to specific historical and rhetorical circumstances She shows how the Revolution marked a sharp break in the way women were represented in language as traditional bantering about the war of the sexes gave way to serious discussions of the political and social meanings of sexual difference Following this discussion on three different planes the economical the political and the biological Fraisse looks at the exclusion of women against the backdrop of democracy's inevitable lie the affirmation of an equality so abstract it was impossible to concretely apply This study of the place of sexual equality in the founding moment of democracy offers insight into a persistent question whether female emancipation is to be found through the achievement of equality with men or in the celebration of female difference

Phonological Skills and Learning to Read Usha Goswami, Peter Bryant, 2016-03-23 This book sets out to integrate recent exciting research on the precursors of reading and early reading strategies adopted by children in the classroom It aims to develop a theory about why early phonological skills are crucial in learning to read and shows how phonological knowledge about rhymes and other units of sound helps children learn about letter sequences when beginning to be taught to read The authors begin by contrasting theories which suggest that children's phonological awareness is a result of the experience of learning to read and those that suggest that phonological awareness precedes and is a causal determinant of reading The authors argue for a version of the second kind of theory and show that children are aware of speech units called onset and rime before they learn to read and spell An important part of the argument is that children make analogies and inferences about these letter sequences in order to read and write new words

Jerome of Stridon and the Ethics of Literary Production in Late Antiquity Thomas E. Hunt, 2019-12-30 In Jerome of Stridon and the Ethics of Literary Production in Late Antiquity Thomas E Hunt argues that Jerome developed a consistent theology of language and the human body that inflected all of his writing projects In doing so the book challenges and recasts the way that this important figure in Late Antiquity has been understood This study maps the first seven years of Jerome's time in Bethlehem 386-393 Treating his commentaries on Paul his hagiography his controversy with Jovinian his correspondence with Augustine and his translation of Hebrew the book shows Jerome to be immersed in the exciting and dangerous currents moving through late antique Christianity Learning to Read a Foreign Language Michael Philip West, 1926

Cognitive Development in Atypical Children L.S. Siegel, F.J. Morrison, 2012-12-06 For some time now the study of cognitive development has been far and away

the most active discipline within developmental psychology Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive 50% seems like a conservative estimate Hence a series of scholarly books devoted to work in cognitive development is especially appropriate at this time The Springer Series in Cognitive Development contains two basic types of books namely edited collections of original chapters by several authors and original volumes written by one author or a small group of authors The flagship for the Springer Series is a serial publication of the advances type carrying the subtitle Progress in Cognitive Development Research Each volume in the Progress sequence is strongly thematic in that it is limited to some well defined domain of cognitive developmental research e g logical and mathematical development development of learning All Progress volumes will be edited collections Editors of such collections upon consultation with the Series Editor may elect to have their books published either as contributions to the Progress sequence or as separate volumes All books written by one author or a small group of authors are being published as separate volumes within the series *The Epistemology of Reading and Interpretation* René van Woudenberg, 2021-09-16 Reading and textual interpretation are ordinary human activities performed inside as well as outside academia but precisely how they function as unique sources of knowledge is not well understood In this book Ren van Woudenberg explores the nature of reading and how it is distinct from perception and attending to testimony which are two widely acknowledged knowledge sources After distinguishing seven accounts of interpretation van Woudenberg discusses the question of whether all reading inevitably involves interpretation and shows that although reading and interpretation often go together they are distinct activities He goes on to argue that both reading and interpretation can be paths to realistically conceived truth and explains the conditions under which we are justified in believing that they do indeed lead us to the truth Along the way he offers clear and novel analyses of reading meaning interpretation and interpretative knowledge

in mental well being and distinguishes group centered prevention from other group interventions by its ability to resolve incipient mental health issues and emotional problems Case examples with adults children couples and others demonstrate successful uses of group centered techniques as well as illustrate the problems that arise in group settings The book s ready to apply training exercises give prospective group leaders practice in starting new groups fostering cohesion integrating therapeutic factors into sessions and other core skills Featured topics include Group centered prevention in contrast with other group interventions Characteristics of effective leaders in group centered prevention Benefits of prevention groups as opposed to those gained in counseling and therapy Key constructs of self efficacy and intrinsic motivation in group centered prevention Stages of development in new groups Formats for developing training exercises Group Centered Prevention in Mental Health is an essential resource for scientist practitioners clinicians and researchers as well as graduate students in such disciplines as school psychology social work and public health Its educational uses span classroom workshop and training settings across the health and healing disciplines

Projections for Reading Becky Calkins,1978

From Valuing to Value David Sobel,2016-11-03 Subjective accounts of well being and reasons for action have a remarkable pedigree The idea that normativity flows from what an agent cares about that something is valuable because it is valued has appealed to a wide range of great thinkers But at the same time this idea has seemed to many of the best minds in ethics to be outrageous or worse not least because it seems to threaten the status of morality Mutual incomprehension looms over the discussion From Valuing to Value written by an influential former critic of subjectivism owns up to the problematic features to which critics have pointed while arguing that such criticisms can be blunted and the overall view rendered defensible In this collection of his essays David Sobel does not shrink from acknowledging the real tension between subjective views of reasons and morality yet argues that such a tension does not undermine subjectivism In this volume the fundamental commitments of subjectivism are clarified and revealed to be rather plausible and well motivated while the most influential criticisms of subjectivism are straightforwardly addressed and found wanting
