Malatesha Joshi,P.G. Aaron,2013-05-13 Until about two decades ago the study of writing systems and their relationship to literacy acquisition was sparse and generally modeled after studies of English language learners This situation is now changing As the worldwide demand for literacy continues to grow researchers from different countries with different language backgrounds have begun examining the connection between their writing systems and literacy acquisition This text which derives from a NATO sponsored conference on orthography and literacy brings together the research of 70 scholars from across the world the largest assemblage of such experts to date Their findings are grouped into three parts as follows Part I Literacy Acquisition in Different Writing Systems describes the relationship between orthography and literacy in twenty five orthographic systems This section serves as a handy reference source for understanding the orthographies of languages as diverse as Arabic Chinese English Icelandic Kannada and Kishwahili Part II Literacy Acquisition From a Cross Linguistic Perspective makes direct comparisons of literacy acquisition in English and other orthographic systems The overall conclusion that emerges from these eight chapters is that the depth of an orthographic system does influence literacy acquisition primarily by slowing down the acquisition of reading skills Even so studies show that dyslexic readers can be found across all orthographic systems whether shallow or deep which shows that dyslexia also has internal cognitive and biological components Part III Literacy Acquisition Instructional Perspectives explores literacy acquisition from developmental and instructional perspectives and ends with a look into the future of literacy research This Handbook is appropriate for scholars researchers and graduate students in such diverse fields as cognitive psychology psycholinguistics literacy education English as a second language and communication disorders *Teaching Beginning Reading and Writing with the Picture Word Inductive Model* Emily Calhoun,1999 In this practical guide to teaching beginning language learners of all ages Calhoun encourages us to begin where the learners begin with their developed listening and speaking vocabularies and other accumulated knowledge about the world Engage students in shaking words out of a picture words from their speaking vocabularies to begin the process of building their reading and writing skills Use the picture word inductive model PWIM to teach several skills simultaneously beginning with the mechanics of forming letters to hearing and identifying the phonetic components of language to classifying words and sentences through forming paragraphs and stories based on observation Built into the PWIM is the structure required to assess the needs and understandings of your students immediately adjust the lesson in response and to use explicit instruction and inductive activities Individual small group and large group activities are inherent to the model and flow naturally as the teacher arranges instruction according to the 10 steps of the PWIM Students and teachers move through the model and work on developing skills and abilities in reading writing listening and comprehension as tools for thinking learning and sharing ideas United States Congressional Serial
