Sir Oliver Lodge

Reason And Belief:

Reason and Belief Sir Oliver Lodge, 1911 *The Reasoning of Unreason* John Roberts, 2018-08-23 The twenty first century so far has seen the global rise of authoritarian populism systematic racism and dogmatic metaphysics Even though these events demonstrate the growth of an age of unreason in this original and compelling book John Roberts resists the assumption that such thinking displays an unthinking irrationality or loss of reason instead he asserts that an important feature of modern reactionary politics is that it offers a supposedly convincing integration of the particular and the universal This move is defined by what Roberts calls the reasoning of unreason and has deep roots in the history of Western thought and politics Tracing the dark history of enlightenment disenlightenment John Roberts explores the reasoning of unreason across centuries from Aquinas William of Ockham the most important treatise on witchcraft Malleus Maleficarum Locke Kant and Count Arthur de Gobineau to Social Darwinism Nazism Carl Schmitt Leo Strauss and Friedrich von Hayek Roberts provides a new set of philosophical political tools to understand the formation and denigration of the rational subject and the current reinvestment in various forms of political unreason globally *The Reasoning of Unreason* is the first book to draw on the philosophy of reason political philosophy political theory and political history in order to produce a dialectical account of the making of reason internal to the forces of unreason and the limits of reason *Sermons: Chiefly on the Theory of Religious Belief* Blessed John Henry Newman, Aeterna Press, FEW charges have been more frequently urged by unbelievers against Revealed Religion than that it is hostile to the advance of philosophy and science That it has discouraged the cultivation of literature can never with any plausibility be maintained since it is evident that the studies connected with the history and interpretation of the Scriptures have more than any others led to inquiries into the languages writings and events of ancient times Christianity has always been a learned religion it came into the world as the offspring of an elder system to which it was indebted for much which it contained and which its professors were obliged continually to consult The Pagan philosopher on enrolling himself a member of the Christian Church was invited nay required to betake himself to a line of study almost unknown to the schools of Greece The Jewish books were even written in a language which he did not understand and opened to his view an account of manners and customs very different from those with which he was familiar Aeterna Press ***Sermons Chiefly on the Theory of Belief*** James Shergold Boone, 1860 ***Reason, Faith and Authority in Christianity*** Alfred Magill Randolph, 1902 *The Birth of Modern Belief* Ethan H. Shagan, 2021-05-04 An illuminating history of how religious belief lost its uncontested status in the West This landmark book traces the history of belief in the Christian West from the Middle Ages to the Enlightenment revealing for the first time how a distinctively modern category of belief came into being Ethan Shagan focuses not on what people believed which is the normal concern of Reformation history but on the more fundamental question of what people took belief to be Shagan shows how religious belief enjoyed a special prestige in medieval Europe one that set it apart from judgment opinion and the evidence of the

senses But with the outbreak of the Protestant Reformation the question of just what kind of knowledge religious belief was and how it related to more mundane ways of knowing was forced into the open As the warring churches fought over the answer each claimed belief as their exclusive possession insisting that their rivals were unbelievers Shagan challenges the common notion that modern belief was a gift of the Reformation showing how it was as much a reaction against Luther and Calvin as it was against the Council of Trent He describes how dissidents on both sides came to regard religious belief as something that needed to be justified by individual judgment evidence and argument Brilliantly illuminating *The Birth of Modern Belief* demonstrates how belief came to occupy such an ambivalent place in the modern world becoming the essential category by which we express our judgments about science society and the sacred but at the expense of the unique status religion once enjoyed

Faith and Rationality Nicholas Wolterstorff, 1986

The Reason of Reason Scott R. Cherry, 2020-07-09 This is a heartfelt study of reason and human rationality and other related things It's a meta study that personally fascinates this author Why are humans rational beings Why is there logic and other kinds of order Why is there intelligibility The self-evident existence of reason logic and intelligibility are strong evidence for God Reason is an undeniable human faculty that defines humanness and points to a rational universe This in turn points to the principle of reason or the *logos* developed by Heraclitus and other Greek philosophers and later by the Apostle John Reason and its corollaries emerge like aspects of language and complement each other like speaking and listening Indeed mutual communication works because of reciprocity which is a root form of intelligibility This seems to be the structure or order which is best explained by a rational divine Mind that exists eternally in reciprocal complementarity This then is an exploration of the role of the *Logos* principle in the human experience and condition we often refer to as Reality It is an attempt to answer these four questions and others related to it Why do reason and logic work Why do we believe and trust in them Why do we expect things to make sense Why does anything make sense at all

Varieties of Belief Paul Helm, 2013-12-19 First published in 2002 This is Volume IV of seven in the Library of Philosophy series on the Philosophy of Religion The Library of Philosophy was designed as a contribution to the History of Modern Philosophy under the heads first of Different schools of Thought Sensationalist Realist Idealist Intuitivist secondly of different Subjects Psychology Ethics Aesthetics Political Philosophy Theology Written in 1973 work in the philosophy of religion in the last thirty years has focused increasingly on the language

of religion Too often it seems that unless one happens to share the particular religious outlook of the writer religious or theological premises are being made to yield philosophical conclusions There is an obvious need for a less question begging procedure one that separates the philosophy from the religion The aim of the study is to make a point about philosophical methodology no grounds are offered for preferring one analysis of religious belief to another
