Scheffler, 2014-04-08 This title first published in 1973 brings together a variety of papers by Israel Scheffler one of America's leading educational philosophers The essays each stress the importance of critical thought and independent judgement to the organization of educational activities In the first section Scheffler adopts a metaphilosophical approach emphasizing the role of philosophy in educational thought A number of key concepts are dealt with next including the study of education and its relation to theoretical disciplines philosophical interpretations of teaching and the education of teachers The final section is critical and deals with the writings of several key thinkers in the field A broad and authoritative study this reissue will provide any Philosophy student with an essential background to the criticism and theories surrounding the philosophy of education Educational Judgments (International Library of the Philosophy of Education Volume 9) F. Doyle

James, 2010-02-25 The topics covered in this volume originally published in 1973 include the need for a more adequate concept or definition of education the issue of whether indoctrination is compatible with education particularly with moral education and the processes of judging the merits of different approaches to aesthetic education Two contributors present complementary analyses of the relations between freedom as a characteristic of institutions and the process of learning to be a free man There is discussion of the neglected subject of rights and duties in education with special emphasis on the question of a universal right to education The volume concludes with papers on the relevance of philosophy to the practical judgments of educators and to education as a field of study **Education and the Development of Reason**

(International Library of the Philosophy of Education Volume 8) R.F. Dearden, Paul H. Hirst, R.S. Peters, 2010-02-25 This volume critically and constructively discusses philosophical questions which have particular bearing on the formulation of educational aims The book is divided into three major parts the first deals with the nature of education and discusses the various general aims such as mental health socialization and creativity which have been thought to characterize it the second section is concerned with the nature of reason and its relationship to feeling will and action finally the development of different aspects of reason in an educational context is considered **Education and the Development of Reason**

(International Library of the Philosophy of Education Volume 8) R.F. Dearden, Paul H. Hirst, R.S. Peters, 2010-02-25

Deals with the nature of education and discusses various general aims such as mental health socialization and creativity which have been thought to characterize it This book examines the nature of reason and its relationship to feeling will and action It considers the development of different aspects of reason in an educational context *Philosophical Analysis and Education (International Library of the Philosophy of Education Volume 1)* Reginald Archambault, 2010-02-25 When originally published in 1965 this book reflected some of the new thinking among philosophers regarding the role of the discipline in its investigation of central issues in education The essays are grouped into four major sections The Nature and Function of Educational Theory The Context of Educational Discussion Conceptions of Teaching and The Essence of Education The concepts dealt with are of the first importance to any practical or theoretical discussion in education and the editor provides a generous introduction to the essays to aid the reader in his analysis of the issues *Concepts of Indoctrination (International Library of the Philosophy of Education Volume 20)* Ivan A. Snook, 2010-02-25 Indoctrination is an important concept in educational philosophy It bears on many areas of study including ethics epistemology and philosophy of science and opens up new paths of investigation into such questions as classroom method and the rights of parents and their children This volume combines both American and English interpretations of a crucial idea in the philosophy of education and helps bridge the gap between the teaching of the subject in the USA and the UK *The Concept of Education (International Library of the Philosophy of Education Volume 17)* R.S. Peters, 2010-02-25 A collection that provides comprehensive coverage of a complex theme which is of interest to those involved in the fields of philosophy and education alike *The Philosophy of Open Education (International Library of the Philosophy of Education Volume 15)* David A. Nyberg, 2010-02-25 Open informal and humanistic are words used to describe new styles of education which depart from ordinary or traditional education Too often however these adjectives are used in a strongly polemical or self justifying rather than analytical way Often too the grounds for accepting or rejecting open education are political or moral instead of being based on a consideration of the nature of open education and its strength and weaknesses This collection of essays is central to the debate on open education analyzing the important concepts in the field The contributions all written by authorities on the philosophy of education deal with problems of definition knowledge socialization freedom cultural perspective and unique meanings and metaphors *Experience and the Growth of Understanding (International Library of the Philosophy of Education Volume 11)* D.W. Hamlyn, 2010-02-25 This volume examines some of the arguments that have been put forward over the years to explain the way in which understanding is acquired The author looks firstly at the empiricist thesis of genesis without structure and secondly at the opposing theory represented by Chomsky of structure without genesis His greatest sympathy is with the theory of Piaget who represents structure with genesis He considers that Piaget's account is flawed however by its biological model and by its failure to deal adequately with the problem of objectivity The second part of the book contains chapters on language the differences between early and later learning and on teaching The book provides a general understanding of the

principles that make it possible and the differences between the ways in which they work at different stages *The Aims of Education Restated (International Library of the Philosophy of Education Volume 22)* John White,2010-02-25 A work on what the aims of education should be since Whitehead s Aims of Education of 1929 It draws on material from schools and colleges and also from the broader educative or miseducative nature of the ethos of society and some of its major institutions

Peters,2010-02-25 This collection of important and significant papers examines a wide range of issues with R S Peter s customary incisiveness and clarity One of the author s main concerns is to clarify the meaning of education and quality in education a phrase often used in public debate but seldom scrutinized Long standing ambiguities latent in the concept of liberal education are also exposed and Herbert Spencer s question What knowledge is of most worth vital int he light of the recent vast development of knowledge is considered Qualitative Research In Education Robert R. egalitarianism according to which standard criteria of educational value merely reflect parochial and economic interests
