Reason Awake: Science for Man René Jules Dubos, Columbia University. Institute for the Study of Science in Human Affairs, 1970 The author evaluates the consequences of the application of scientific knowledge to all aspects of human affairs particularly the sphere of social problems

Scientists and World Order Ernst B. Haas, Mary Pat Williams, Don Babai, 2023-11-10 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1977 [EPA-600/5](#), 1974-02

The Jobless Future Stanley Aronowitz, 1994 The Jobless Future challenges beliefs in the utopian promise of a knowledge based high technology economy Reviewing a vast body of encouraging literature about the postindustrial age Aronowitz and DiFazio conclude that neither theory history nor contemporary evidence warrants optimism about a technological economic order Instead they demonstrate the shift toward a massive displacement of employees at all levels and a large scale degradation of the labor force As they clearly chart a major change in the nature scope and amount of paid work the authors suggest that notions of justice and the good life based on full employment must change radically as well They close by proposing alternatives to our dying job culture that might help us sustain ourselves and our well being in a science and technology based economic future One alternative discussed is reducing the workday to fewer hours without reducing pay

The Technological Fix Lisa Rosner, 2013-02-01 The term technological fix should mean a fix provided by technology a solution for all of our problems from medicine and food production to the environment and business Instead technological fix has come to mean a cheap quick fix using inappropriate technology that usually creates more problems than it solves This collection sets out the distinction between a technological fix and a true technological solution Bringing together scholars from a variety of disciplines the essays trace the technological fix as it has appeared throughout the twentieth century Addressing such fixes as artificial hearts industrial agriculture and climate engineering these essays examine our need to turn to technology for solutions to all of our problems

Water from Heaven Robert S. Kandel, 2003 Covering a vast array of scientific fields and recent discoveries this book tracks a remarkable substance in its liquid solid and gaseous states as it cycles through the seas the atmosphere land icecaps and under the earth Robert Kandel describes what we humans are doing to the water cycle and the climate and explains where we are heading

The Anthropology of Complex Economic Systems Niccolo Leo Caldararo, 2013-11-14 Today we live in what Ulrich Beck has aptly characterized as a risk society shaped by intensifying crises outside of our control and seemingly outside of our comprehension The master narrative that was supposed to lead us to secular salvation economics has proved to be a large part of the problem rather than the much anticipated solution In *The Anthropology of Complex Economic Systems* Niccolo Caldararo offers a much more radical and challenging answer that the fundamental assumptions

on which the modern science of economics has been erected are false and that it is through the medium of anthropology particularly the relatively neglected field of economic anthropology that an alternative and sound basis for both the understanding of economic behavior and for the shaping of economic futures can be constructed Caldararo not only challenges the foundational assumptions of conventional economic theory but situates economic behavior something quite different and universal amongst human beings in both a historical and an ecological context Contemporary discussions of sustainability especially in the field of development studies have oddly neglected to look to anthropology Economic anthropology is the repository of a vast store of wisdom both about actual alternative and workable economic systems and about their evolution By drawing on this source Caldararo builds a model of the evolution of human economies which stir up substantial debate shows how economic anthropology provides a tool for the interrogation of economic theory and ties economics to ecology It has been the rupture of this fundamental relationship that lies at the basis of much of our present crisis and the unsustainable economic patterns that humans have created By bringing together in a new configuration economic anthropology ecology and culture history Caldararo not only proposes a new model of human social evolution but equally importantly creates a methodology for speaking to and against our present economic and environmental situation

U.S. Environmental Protection Agency Library System Book Catalog Holdings as of July 1973 United States. Environmental Protection Agency. Sorenson, 1972 About 1400 references to books and journal articles primarily concerned with social and psychological issues of applied human genetics in general and genetic counseling in particular Excludes literature dealing with ethical or proscriptive areas Also covers foreign language titles Citations mostly from 1960 s through 1972 Classified arrangement No index **EPA-600/7**, 1979 *With Knowledge and Virtue* Themis H. Demas PhD, 2017-11-20 Technology continues to advance and so do our problems Two of our biggest threats are global warming and nuclear war and we must eliminate these threats Fortunately cost effective technology exists to reduce global warming but we must be smart enough to use it The author offers a detailed proposal for combating climate change building a more robust economy by creating jobs eliminating oil imports stabilizing energy prices and cutting back on pollution and its detrimental effects on society all by using clean renewable energy He also tackles reducing the threat of nuclear war which will require us to tame the savageness of man This must be done via international institutions cooperation and a commitment to shared values Tackle two of the world's greatest problems global warming and the threat of nuclear war and consider how to address overpopulation world hunger and other problems along the way *With Knowledge and Virtue* **Expectations of Life** H.O. Lancaster, 2012-12-06 Destined to become a classic epidemiological study EXPECTATIONS OF LIFE surveys world mortality describing and explaining the declines of mortality which have become especially evident in this century **Scheming Virtuously** Gilles Paquet, 2022-08-10 Scheming Virtuously The Road to Collaborative Governance is an invitation to

subversion but also a somewhat personal account of the displacement of the dominant governing regime Big G centralized government by small g collaborative governance in a world where power resources and information are widely distributed In this new world the citizen s burden of office is clear to be a producer of governance Scheming virtuously is the order of the day active engagement imaginative problem reframing astute organizational design and effective action within the bounds of the appreciative systems in good currency and beyond **Case Study Methodology for Nursing** Donna M.

Zucker,2024-07-11 This innovative text introduces and illustrates case study methodology for nursing research by exploring how it can be used to uncover the varied and complex life experiences of persons with chronic illness and post traumatic stress conditions Nursing practice demands care and compassion but often nurses do not have the tools to examine their clients health and wellness experiences This book presents an approach to finding shared solutions for common health problems from a nursing perspective It provides readers with the tools to develop their own case study approach and the skills to translate their findings into innovative ways to influence nursing care for people across their health illness trajectories Rather than a prescriptive approach to care it highlights the necessity of understanding what people are feeling thinking and doing to enhance health and improve quality of life This book is an essential read for nursing and qualitative health researchers It is also an important companion for clinicians and academics concerned with caring for people with chronic illness and post traumatic stress conditions **No Requiem for the Space Age** Matthew D. Tribbe,2014-06-06

During the summer of 1969 the summer Americans first walked on the moon musician and poet Patti Smith recalled strolling down the Coney Island Boardwalk to a refreshment stand where pictures of Jesus President Kennedy and the astronauts were taped to the wall behind the register Such was the zeitgeist in the year of the moon Yet this holy trinity of 1960s America would quickly fall apart Although Jesus and John F Kennedy remained iconic by the time the Apollo Program came to a premature end just three years later few Americans mourned its passing Why did support for the space program decrease so sharply by the early 1970s Rooted in profound scientific and technological leaps rational technocratic management and an ambitious view of the universe as a realm susceptible to human mastery the Apollo moon landings were the grandest manifestation of postwar American progress and seemed to prove that the United States could accomplish anything to which it committed its energies and resources To the great dismay of its many proponents however NASA found the ground shifting beneath its feet as a fierce wave of anti rationalism arose throughout American society fostering a cultural environment in which growing numbers of Americans began to contest rather than embrace the rationalist values and vision of progress that Apollo embodied Shifting the conversation of Apollo from its Cold War origins to larger trends in American culture and society and probing an eclectic mix of voices from the era including intellectuals religious leaders rock musicians politicians and a variety of everyday Americans Matthew Tribbe paints an electrifying portrait of a nation in the midst of questioning the very values that had guided it through the postwar years as it began to develop new conceptions of progress that had little to

do with blasting ever more men to the moon No Requiem for the Space Age offers a narrative of the 1960s and 1970s unlike any told before with the story of Apollo as the story of America itself in a time of dramatic cultural change

The Environmental Future Nicholas Polunin, 1972-06-18

Bulletin of the Atomic Scientists, 1971-05 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world

The Information Society Armand Mattelart, 2003-04-03 The impact of the information society are multiform and transdisciplinary There are few areas of social political and economic life that have not been affected or challenged by the new technologies of information and communication In this short introduction Armand Mattelart unpacks the notion of the information society and examines why it has become the dominant paradigm for social change in the 21st Century Critically he also asks why the notion has come to dominant in the absence of any critical examination of the conditions under which it has been produced Combining a long term historical and geopolitical perspective Mattelart questions the axioms used to legitimate the Information Society and critically assesses the ways in which it has been conceptualised as a theoretical concept as well as policy making tool This introduction will be of interest to all students of media and communication as well as social scientists in general
