Reason Without Freedom Problem Of Epistemic Normativity:

Reason Without Freedom David Owens, 2002-11 Arguing that the major problems in epistemology have their roots in concerns about our control over our beliefs David Owen presents a critical discussion of the current trends in contemporary epistemology

Foundations and Applications of Social Epistemology Sanford Goldberg, 2021 This volume collects twelve essays by Sanford C Goldberg on the topic of social epistemology The first half develops a proposal for a programme for social epistemology the second focuses on applications of this programme to topics like testimony inquiry and epistemic aspects of social norms

The Routledge Companion to Epistemology Sven Bernecker, Duncan Pritchard, 2011-01-19 Epistemology the philosophy of knowledge is at the core of many of the central debates and issues in philosophy interrogating the notions of truth objectivity trust belief and perception The Routledge Companion to Epistemology provides a comprehensive and the up to date survey of epistemology charting its history providing a thorough account of its key thinkers and movements and addressing enduring questions and contemporary research in the field Organized thematically the Companion is divided into ten sections Foundational Issues The Analysis of Knowledge The Structure of Knowledge Kinds of Knowledge Skepticism Responses to Skepticism Knowledge and Knowledge Attributions Formal Epistemology The History of Epistemology and Metaepistemological Issues Seventy eight chapters each between 5000 and 7000 words and written by the world s leading epistemologists provide students with an outstanding and accessible guide to the field Designed to fit the most comprehensive syllabus in the discipline this text will be an indispensable resource for anyone interested in this central area of philosophy The Routledge Companion to Epistemology is essential reading for students of philosophy

Social Epistemology Alvin Goldman, Dennis Whitcomb, 2011-02-11 What if anything justifies us in believing the testimony of others How should we react to disagreement between ourselves and our peers and to disagreement among the experts when we ourselves are novices Can beliefs be held by groups of people in addition to the people composing those groups And if so how should groups go about forming their beliefs How should we design social systems such as legal juries and scientific research sharing schemes to promote knowledge among the people who engage in them When different groups of people judge different beliefs to be justified how can we tell which groups are correct These questions are at the heart of the vital discipline of social epistemology The classic articles in this volume address these questions in ways that are both cutting edge and easy to understand This volume will be of great interest to scholars and students in epistemology

Kant on Freedom and Rational Agency Markus Kohl, 2023 Markus Kohl presents a new interpretation and rational reconstruction of Kant s doctrine of freedom He shows how Kant defends the belief that we are free from both natural and super natural causes as a presupposition of all meaningful human activity And Kohl explores the role of freedom in Kant s accounts of morality cognition and aesthetics

Attributing Knowledge Jody Azzouni, 2020-09-21 In Attributing Knowledge Jody Azzouni challenges philosophical conventions about what it means to know something He argues that the restrictive

conditions philosophers place on knowers only hold in special cases knowledge can be attributed to babies sophisticated animals great apes orcas unsophisticated animals bees and machinery drones driverless cars Azzouni also gives a fresh defense of fallibilism Relying on lexical semantics and ordinary usage he shows that there are no knowledge norms for assertion or action He examines everyday cases of knowledge challenge and attribution to show many recent and popular epistemological positions are wrong By providing a long sought intelligible characterization of knowledge attribution Azzouni explains why the concept has puzzled philosophers so long and he solves longstanding and recent puzzles that have perplexed epistemologists including the dogmatism paradox Gettier puzzles and the surprise exam paradox This is a terrific book full of surprises For instance Chapter 9 is full of points that are original insightful and useful in helping to resolve stale debates I especially liked the points that we don't ordinarily describe someone as losing knowledge by gaining defeating evidence that knows is vague and tri-scooped that vagueness needn't be explained by appeal to precise metasemantic machinery and that Williamson's anti-luminosity argument founders on the fact that knowledge doesn't require confidence Bravo Ram Neta University of North Carolina Chapel Hill Praise for Jody Azzouni's *Ontology without Borders* Azzouni offers a very strong drink proposing that we do without central elements of what almost anyone would call logic or ontology His arguments are serious and wide-ranging If he's right the reader will have learned something very important If he's wrong then the reader who figures out how he went wrong will also have learned something very important Not every book has this feature Michael Gorman The Catholic University of America *New Essays on Belief* N. Nottelmann, 2013-06-28 Belief is a fundamental concept within many branches of contemporary philosophy and an important subject in its own right This volume comprises 11 original essays on belief written by a range of the best authors in the field **New Issues in Epistemological Disjunctivism** Casey Doyle, Joseph Milburn, Duncan Pritchard, 2019-04-29 This is the first volume dedicated solely to the topic of epistemological disjunctivism The original essays in this volume written by leading and up-and-coming scholars on the topic are divided into three thematic sections The first set of chapters addresses the historical background of epistemological disjunctivism It features essays on ancient epistemology Immanuel Kant J. L. Austin Edmund Husserl and Ludwig Wittgenstein The second section tackles a number of contemporary issues related to epistemological disjunctivism including its relationship with perceptual disjunctivism radical skepticism and reasons for belief Finally the third group of essays extends the framework of epistemological disjunctivism to other forms of knowledge such as testimonial knowledge knowledge of other minds and self-knowledge Epistemological Disjunctivism is a timely collection that engages with an increasingly important topic in philosophy It will appeal to researchers and graduate students working in epistemology philosophy of mind and philosophy of perception **Vices of the Mind** Quassim Cassam, 2019 Quassim Cassam introduces the idea of epistemic vices character traits that get in the way of knowledge such as closed-mindedness intellectual arrogance wishful thinking and prejudice Using examples from politics to illustrate the vices at work he considers

whether we are responsible for such failings and what we can do about them *Knowledge Transmission* Stephen Wright, 2018-09-03 Our knowledge of the world comes from various sources But it is sometimes said that testimony unlike other sources transmits knowledge from one person to another In this book Stephen Wright investigates what the transmission of knowledge involves and the role that it should play in our theorising about testimony as a source of knowledge He argues that the transmission of knowledge should be understood in terms of the more fundamental concept of the transmission of epistemic grounds and that the claim that testimony transmits knowledge is not only defensible in its own right but indispensable to an adequate theory of testimony This makes testimony unlike other epistemic sources **The Oxford Handbook of Social Epistemology** Jennifer Lackey, Aidan McGlynn, 2025 How do we learn from one another on the internet How can we defend ourselves from propaganda and seek the truth How do our race gender and other aspects of our identity imbue how we learn and know things Social epistemology explores timely and urgent questions such as these which is why the field has seen an explosion of interest in recent years Having originated as a subfield social epistemology now permeates the agenda of mainstream epistemology even though it challenges epistemology's traditional focus on the individual The Oxford Handbook of Social Epistemology offers a collection of cutting edge essays on many of the most important issues in this rapidly growing area of philosophy It takes stock of recent developments in the field and reassesses topics that have been thought to fit comfortably within a more traditional approach to epistemology including our capacities to know our own minds to reason and to remember by examining the ways in which they might be significantly impacted by one's social environment Several chapters interrogate the boundaries of what social epistemology is by exploring its application to significant issues outside of philosophy such as psychology sociology and political theory as well as the ways it intersects with ethics the philosophies of language and mind political philosophy feminist philosophy and critical philosophy of race Divided into seven sections this handbook provides a comprehensive coverage of work in this exciting and fertile area of philosophy as it highlights the relevance and importance of social factors to some of the most pressing epistemological questions facing us as agents in the world *Assertion* Sanford C. Goldberg, 2015-02-19 Sanford C Goldberg presents a novel account of the speech act of assertion He defends the view that this type of speech act is answerable to a constitutive norm the norm of assertion The hypothesis that assertion is answerable to a robustly epistemic norm is uniquely suited to explain assertion's philosophical significance its connections to other philosophically interesting topics These include topics in epistemology testimony and testimonial knowledge epistemic authority disagreement the philosophy of mind belief the theory of mental content the philosophy of language norms of language the method of interpretation the theory of linguistic content ethics the ethics of belief what we owe to each other as information seeking creatures and other matters which transcend any subcategory anonymity trust the division of epistemic labor Moorean paradoxicality Goldberg aims to bring out these connections without assuming anything about the precise content of assertion's norm beyond regarding it as

robustly epistemic In the last section of the book however he proposes that we do best to see the norm's epistemic standard as set in a context sensitive fashion After motivating this proposal by appeal to Grice's Cooperative Principle and spelling it out in terms of what is mutually believed in the speech context Goldberg concludes by noting how this sort of context sensitivity can be made to square with assertion's philosophical significance

Goldman and His Critics Brian P. McLaughlin, Hilary Kornblith, 2016-10-17 Goldman and His Critics presents a series of original essays contributed by influential philosophers who critically examine Alvin Goldman's work followed by Goldman's responses to each essay Critiques Alvin Goldman's groundbreaking theories writings and ideas on a range of philosophical topics Features contributions from some of the most important and influential contemporary philosophers Covers Goldman's views on epistemology both individual and social in addition to cognitive science and metaphysics Pays special attention to Goldman's writings on philosophy of mind including the evolution of his thoughts on Simulation Theory ST

The Routledge Handbook of the Philosophy of Evidence Maria Lasonen-Aarnio, Clayton Littlejohn, 2023-12-19 What one can know depends on one's evidence Good scientific theories are supported by evidence Our experiences provide us with evidence Any sort of inquiry involves the seeking of evidence It is irrational to believe contrary to your evidence For these reasons and more evidence is one of the most fundamental notions in the field of epistemology and is emerging as a crucial topic across academic disciplines The Routledge Handbook of the Philosophy of Evidence is an outstanding reference source to the key topics problems and debates in this exciting subject and is the first major volume of its kind Comprising forty chapters by an international team of contributors the handbook is divided into six clear parts The Nature of Evidence Evidence and Probability The Social Epistemology of Evidence Sources of Evidence Evidence and Justification Evidence in the Disciplines The Routledge Handbook of the Philosophy of Evidence is essential reading for students and researchers in philosophy of science and epistemology and will also be of interest to those in related disciplines across the humanities and social sciences such as law religion and history

The Epistemology of Groups Jennifer Lackey, 2021 Jennifer Lackey presents a groundbreaking exploration of the epistemology of groups and its implications for group agency and responsibility She argues that group belief and knowledge depend on what individual group members do or are capable of doing while being subject to group level normative requirements

The Oxford Handbook of the Epistemology of Theology William J. Abraham, Frederick D. Aquino, 2017-06-15 The Oxford Handbook of the Epistemology of Theology brings together leading scholars in the fields of theology and epistemology to examine and articulate what can be categorized as appropriate epistemic evaluation in theology Part one focuses on some of the epistemic concepts that have been traditionally employed in theology such as knowledge of God revelation and scripture reason and faith experience and tradition This section also considers concepts that have not received sufficient epistemological attention in theology such as saints authority ecclesial practices spiritual formation and discernment Part two concentrates on epistemic concepts that have received significant

attention in contemporary epistemology and can be related to theology such as understanding wisdom testimony virtue evidence foundationalism realism antirealism scepticism and disagreement Part three offers examples from key figures in the Christian tradition and investigates the relevant epistemological issues and insights in these writers as well as recognizing the challenges of connecting insights from contemporary epistemology with the subject of theology proper namely God Part four centres on five emerging areas that warrant further epistemological consideration liberation theology continental philosophy modern orthodox writers feminism and Pentecostalism This authoritative collection explores how the various topics figures and emerging conversations can be reconceived and addressed in light of recent developments in epistemology Each chapter provides an analysis of the crucial moves positions and debates while also identifying relevant epistemic considerations This handbook fulfils the need for the development of this new conversation that will take its natural place in the intersection of theology and epistemology It links the fields of theology and epistemology in robust meaningful and significant ways

The Ethics of Belief Jonathan Matheson, Rico Vitz, 2014-08-14 How do people form beliefs and how should they do so This book presents seventeen new essays on these questions drawing together perspectives from philosophy and psychology The first section explores the ethics of belief from an individualistic framework It begins by examining the question of doxastic voluntarism i e the extent to which people have control over their beliefs It then shifts to focusing on the kinds of character that epistemic agents should cultivate what their epistemic ends ought to be and the way in which these issues are related to other traditional questions in epistemology The section concludes by examining questions of epistemic value of whether knowledge is in some sense primary and of whether the ethics of belief falls within the domain of epistemology or ethics The second section extends this traditional debate to issues concerning the social dimensions of belief formation It begins with essays by social psychologists discussing the past three decades of research in lay epistemics It continues by examining Humean Kantian and feminist insights into the social aspects of belief formation as well as questions concerning the ethics of assertion The section concludes with a series of essays examining a topic that is currently of great interest to epistemologists namely the significance of peer disagreement

Responsibility for Rationality Sebastian Schmidt, 2024-11-25 This book develops the foundations of an ethics of mind by investigating the responsibility that is presupposed by the requirements of rationality that govern our attitudes It thereby connects the most recent research on responsibility and rationality in a unifying dialectic How can we be responsible for our attitudes if we cannot normally choose what we believe desire feel and intend This problem has received much attention during the last decades both in epistemology and ethics Yet its connections to discussions about reasons and rationality have been largely overlooked The book has five main goals First it reinterprets the problem of responsibility for attitudes as a problem about the normativity of rationality Second it connects substantive and structural rationality by drawing on debates about responsibility Third it supports recent accounts of the normativity of rationality by explicitly defending the view that epistemic reasons and other

right kind reasons are genuine normative reasons and it does so by drawing on recent discussions about epistemic blame Fourth it breaks the stalemate between rationalist and voluntarist accounts of mental responsibility by proposing a hybrid view Finally it argues that being irrational can warrant moral blame thus revealing an unnoticed normative force of rational requirements Responsibility for Rationality is an original and essential resource for scholars and advanced students interested in connecting strands of normative theory within epistemology metaethics and moral psychology The Open Access version of this book was published with the support of the Swiss National Science Foundation

Agnosticism Francis Fallon,Gavin Hyman,2020-11-04 In a time marked by prominent public clashes between theists and atheists much less attention has been given to the question of agnosticism whether in public debate or in academic literature This is all the more surprising given that so many in Western society feel unable to identify unequivocally with either theism or atheism This book brings together some leading contemporary philosophers from both the analytic and continental traditions to give a sustained and in depth treatment of the question of agnosticism Approaching the question from a variety of stances and employing different methodologies the contributors explore the various possible meanings of agnosticism today Several of them develop what they describe as a New Agnosticism where the relationship with theism or forms of religious belief is not as mutually exclusive as has often been assumed Others look for signs of agnosticism in places where it is not usually thought to be found such as in forms of continental philosophy and even in theology itself They also raise interesting methodological questions at the intersection of analytic and continental philosophy These are stimulating and innovative essays working with the most recent developments in philosophy and religious thought They open up new avenues of thought that will be of interest to philosophers theologians and other thoughtful readers whether theist atheist or agnostic

How to Know Stephen Hetherington,2011-03-08 Some key aspects of contemporary epistemology deserve to be challenged and How to Know does just that This book argues that several long standing presumptions at the heart of the standard analytic conception of knowledge are false and defends an alternative a practicalist conception of knowledge Presents a philosophically original conception of knowledge at odds with some central tenets of analytic epistemology Offers a dissolution of epistemology's infamous Gettier problem explaining why the supposed problem was never really a problem in the first place Defends an unorthodox conception of the relationship between knowledge that and knowledge how understanding knowledge that as a kind of knowledge how
