

Proportional Reasoning

Proportional reasoning is a method we use to understand how the size of a value will change based on changes we make to variables in its equation. Proportional reasoning allows us to compare the size of different values even if we do not know their actual number values.

Steps to Solve a Proportional Reasoning Problem:

- 1 Write an equation for the original variable that will be affected by the change in the other variable.
- 2 Write an equation for the new variable.
- 3 Isolate the original function in the new function by factoring out any new numbers.

Example 2:

A force of gravity F acts between two masses m_1 and m_2 with a distance r between them. If we tripled the distance and doubled the mass m_1 , what would the mass of the second object need to be to make a force of gravity four times as strong as the original?

$$F = \frac{Gm_1m_2}{r^2} \quad m_{2o} = \frac{F r^2}{Gm_1}$$

Reasoning In Physics

S Ben Porath

Reasoning In Physics:

Thank you definitely much for downloading **Reasoning In Physics**. Most likely you have knowledge that, people have look numerous period for their favorite books once this Reasoning In Physics, but stop going on in harmful downloads.

Rather than enjoying a good book past a mug of coffee in the afternoon, on the other hand they juggled with some harmful virus inside their computer. **Reasoning In Physics** is welcoming in our digital library an online entrance to it is set as public consequently you can download it instantly. Our digital library saves in compound countries, allowing you to acquire the most less latency epoch to download any of our books behind this one. Merely said, the Reasoning In Physics is universally compatible with any devices to read.
