Reasons For Living A Basic Ethics:

Reasons for Living Burton Frederick Porter, 1988 **The Good Life** Burton F. Porter, 2001 The Good Life contains an exposition and critique of the various ideals in living that have been advocated by major philosophers and schools of thought. In addition, the ethical problems of egoism, determinism, and relativism are explained and evaluated in both their classic Greek form and in the deconstruction of post modernism. The ideals that are discussed include hedonism as described by the Cyrenaics and Epicureans and the Utilitarianism of Bentham and Mill, the naturalistic ethic of the Stoics, the Transcendentalists, the evolutionists, and the back to nature movement, the biblical ethic of Judaism and Christianity as well as the Eastern religions of Confucianism and Buddhism and the Kantian ideal of duty and virtue ethics including feminist theory. To illuminate various conceptions of the good life, multiple examples are drawn from contemporary life including the abortion issue, racism, capital punishment, and multiculturalism.

The Christian Way of Living Klaus Bockmuehl, 1994 **Reason and Ethics** Joel Marks, 2020-10-01 Reason and Ethics defends the theoretical claim that all values are subjective and the practical claim that human affairs can be conducted fruitfully in full awareness of this. Joel Marks goes beyond his previous work defending moral skepticism to question the existence of all objective values. This leads him to suggest a novel answer to the Companions in Guilt argument that the denial of morality would mean relinquishing rationality as well. Marks disarms the argument by conceding the irreality of both morality and logic but is still able to rescue rationality while dispensing with morality on pragmatic grounds. He then offers a positive account of how life may be lived productively without recourse to attributions and assertions of right and wrong, good and bad, and even truth and falsity. Written in an accessible and engaging style, Reason and Ethics will be of interest to scholars and students working in metaethics as well as to the generally intellectually curious.

Weighing and Reasoning Iwao Hirose, Andrew Evan Reisner, 2015 Fifteen essays offer a comprehensive evaluation of Broome's philosophical works over the past thirty years. The first part focuses on Broome's work on the theory of value, the second part on his work on practical and theoretical reasoning which culminated in his rationality through reasoning.

Ethics: Essential Readings in Moral Theory George Sher, 2012-11-27 Ethics: Essential Readings in Moral Theory is an outstanding anthology of the most important topics, theories, and debates in ethics compiled by one of the leading experts in the field. It includes sixty-six extracts covering the central domains of ethics: why be moral, the meaning of moral language, morality and objectivity, consequentialism, deontology, virtue and character, value and well-being, moral psychology, applications including abortion, famine relief, and consent. Included are both classical extracts from Plato, Aristotle, Hume, Kant, and Mill as well as contemporary classics from philosophers such as Thomas Nagel, Thomas Scanlon, Martha Nussbaum, Derek Parfit, and Peter Singer. A key feature of the anthology is that it covers the perennial topics in ethics as well as very recent ones such as moral psychology, responsibility, and experimental philosophy. Each section is introduced and placed in context by the editor, making this an ideal anthology for anyone studying ethics or ethical theory.

The Reason of Reason Scott R. Cherry, 2020-07-09 This is a heartfelt study of reason and human rationality and other related things It s a meta study that personally fascinates this author Why are humans rational beings Why is there logic and other kinds of order Why is there intelligibility The self evident existence of reason logic and intelligibility are strong evidence for God Reason is an undeniable human faculty that defines humanness and points to a rational universe This in turn points to the principle of reason or the logos developed by Heraclitus and other Greek philosophers and later by the Apostle John Reason and its corollaries emerge like aspects of language and complement each other like speaking and listening Indeed mutual communication works because of reciprocity which is a root form of intelligibility This seems to be the structure or order which is best explained by a rational divine Mind that exists eternally in reciprocal complementarity This then is an exploration of the role of the Logos principle in the human experience and condition we often refer to as Reality It is an attempt to answer these four questions and others related to it Why do reason and logic work Why do we believe and trust in them Why do we expect things to make sense Why does anything make sense at all

Bradley Wendel, 2020-05-22

Professional roles are often thought to bring role specific permissions and obligation which may allow or require role occupants to do things they would not be permitted or required to do outside their roles and which as individuals they would rather not do This feature of professional roles appears to bring them into conflict both with ordinary or non role morality and with personal integrity which is often thought to demand some form of personal endorsement of one's conduct How are we to reconcile the demands of roles with ordinary morality and with personal integrity This collection draws together a set of papers which explore these questions as they bear upon a number of different professional roles including those of the lawyer the judge and the politician and from a variety of perspectives including contemporary analytic moral theory jurisprudence psychoanalytic theory virtue ethics and contextualism and more broadly from philosophy and legal academia and practice **How Might We Live? Foundation for a Natural Morality Edmund Wall, 2018-10-15 Few philosophers attempt to establish that there is an evaluative and moral realm They make these major assumptions without argument This plays into the hands of moral nihilists and certain other moral skeptics A major obstacle that prevents philosophers from developing such arguments is the long standing view that one cannot derive an ought from an is that is one cannot begin with purely descriptive non evaluative propositions and deduce an evaluative or moral proposition In this book Edmund Wall develops arguments for evaluative and moral principles His deductive reasoning begins with certain purely descriptive and non evaluative propositions concerning human nature establishing a basic moral principle of human life and a basic moral principle of knowledge By providing such deductive arguments for basic moral principles Wall makes considerable progress in establishing a sure foundation for morality He further develops his case by responding to a plethora of anticipated objections against his two arguments and by delineating

the advantages of his own moral approach over a number of influential moral theories and competing accounts of moral reasoning *Civilization and Ethics* Albert Schweitzer, 1929 **Ethics in Sport-3rd Edition** Morgan, William J., 2018
