Recent Philosophers A Supplement To A Hundred Years Of Philosophy:

Recent Philosophers John Arthur Passmore,1985 **Recent Philosophers** John Passmore,1988 **A Hundred Years of English Philosophy** N. Milkov,2013-11-11 This book is a historical investigation of the leading philosophical movement in England in the twentieth century In seven chapters the intellectual development of the most prominent representatives of analytic philosophy Moore Russell and Wittgenstein in Cambridge and Ryle Austin Strawson and Dummett in Oxford is traced The book does not aim however at delivering a story This means above all that generalisations and conclusions are reduced to a minimum an approach adopted in an endeavour to avert the danger of subjectivism that interpreting the philosophers under scrutiny would impose My hope is that by following this approach my investigation will stimulate readers to make their own generalisations and conclusions on the basis of the objectively presented data Instead my aim is to articulate a flawless comprehensive description of the philosophical texts of the seven most significant analytic philosophers in England in the twentieth century For this purpose all their articles and books have been sifted through in order to pick out the most representative parts For obvious reasons only the chapters on Russell and Wittgenstein and to a lesser extent the chapter on Moore are more theoretical

Major Realist Film Theorists Ian Aitken,2016-05-31 From the 1910s to the emergence of structuralism and post structuralism in the 1960s the writings of John Grierson Siegfried Kracauer Andre Bazin and Georg Lukacs dominated realist film theory In this critical anthology the first collection to address their work in one volume a wide range of international scholars explore the interconnections between their ideas and help generate new understandings of this important if neglected field Challenging preconceptions about classical theory and the nature of realist representation and in the process demonstrating how this body of work can be seen as a cohesive theoretical model this invaluable collection will help return the realist paradigm of film theory to the forefront of academic enquiry

The Future of the Cognitive Revolution David Johnson,Christina Erneling,1997-04-24 The basic idea of the particular way of understanding mental phenomena that has inspired the cognitive revolution is that as a result of certain relatively recent intellectual and technological innovations informed theorists now possess a more powerfully insightful comparison or model for mind than was available to any thinkers in the past The model in question is that of software or the list of rules for input output and internal transformations by which we determine and control the workings of a computing machine's hardware Although this comparison and its many implications have dominated work in the philosophy psychology and neurobiology of mind since the end of the Second World War it now shows increasing signs of losing its once virtually unquestioned preeminence Thus we now face the question of whether it is possible to repair and save this model by means of relatively inessential tinkering or whether we must reconceive it fundamentally and replace it with something different In this book twenty eight leading scholars from diverse fields of cognitive science linguistics psychology neurophysiology and philosophy present their latest carefully considered judgements about what they think will be the future course of this intellectual

movement that in many respects has been a watershed in our contemporary struggles to comprehend that which is crucially significant about human beings Jerome Bruner Noam Chomsky Margaret Boden Ulric Neisser Rom Harre Merlin Donald among others have all written chapters in a non technical style that can be enjoyed and understood by an inter disciplinary audience of psychologists philosophers anthropologists linguists and cognitive scientists alike *The Future of the Cognitive Revolution* David Martel Johnson,Christina E. Realism and Truth Michael Devitt,1997-01-12 In a provocative thesis philosophy professor Michael Devitt argues for a thoroughgoing realism about the common sense and scientific physical world and for a corresponding notion of truthcontrary to the opinions of anti realists such as Putnam Dummett van Fraassen and others This second edition includes a new Afterword by the author *Education And Awareness Of Sustainability - Proceedings Of The 3rd Eurasian Conference On Educational Innovation 2020 (Ecei 2020)* Charles Tijus,Teen-hang Meen,Chun-yen Chang,2020-11-17 This volume represents the proceedings of the 3rd Eurasian Conference on Educational Innovation 2020 ECEI 2020 Thes conference is organized by the International Institute of Knowledge Innovation and Invention IIKII and was held on February 5 7 2020 in Hanoi Vietnam ECEI 2020 provides a unified communication platform for researchers in a range of topics in education innovation and other related fields This proceedings volume enables interdisciplinary collaboration of science and engineering technologists It is a fine starting point for establishing an international network in the academic and industrial fields

Ethical Relativism and Universalism Saral Jhingran,2001-01-01 The present work addresses itself to one of the most hotly debated issues in contemporary ethics

relativism Relativism has become a formidable argument in Western socio moral thought under the impact of postmodern writings The author presents a detailed critique of various relativist and postmodernist theses without rejecting some of their empirically justified observations She underscores the fact that the intercultural communication which has been going on since time immemorial puts a question mark to the postmodernist theories of indeterminacy of translation incommensurability of various conceptual frameworks etc The author supports cognitivism in ethics according to which the moral properties of the object of moral judgement do in some way determine or cause that judgment This view is not to be confused with any realist ontological commitment She asserts that universalizability is the necessary condition of all rational judgments including the moral ones The author also discusses the relationship between self and others and in this context she draws upon the insights of ancient Indian thinkers She proposes that minimum moral principles and maxims can be agreed upon through reasoning and intercultural discourse

Realist film theory and cinema Ian Aitken, 2019-01-04

Realist film theory and cinema embraces studies of cinematic realism and 19th century tradition the realist film theories of Luk cs Grierson Bazin and Kracauer and the relationship of realist film theory to the general field of film theory and philosophy This is the first book to attempt a rigorous and systematic application of realist film theory to the analysis of particular films The book suggests new ways forward for a new series of studies in cinematic realism and for a new form of film theory based on realism It stresses the importance of the question of realism both in film studies and in contemporary life Aitken s work will be of interest to scholars and advanced students of film studies literary studies media studies cultural studies and philosophy
