Religion Confronting Science Donivan Bessinger, 1991

Creation, Catastrophe & Calvary John Templeton

Baldwin, 2000 In this scientific age what difference does it make whether I believe the world was created in six literal days and that the world was destroyed by a global flood In answering these questions *Creation Catastrophe and Calvary* shows how these beliefs are related to key issues such as the forgiveness of our sins and Sabbath observance Foreword Introduction Meet the Authors An Angel's Worldview The Days of Creation in Genesis 1 A Second Creation Account Biblical Evidence for the Universality of the Genesis Flood The Grand Canyon and the Genesis Flood The Geologic Column and Calvary The Rainbow Connection Implications for an Evangelical Understanding of the Atonement Evolution A Theory in Crisis The Role of Creation in Seventh day Adventist Theology Science and Theology Focusing the Complementary Lights of Jesus Scripture and Nature

**Faith Confronts Nuclear Power** John R. Gugel, 2015-10-22 Faith Confronts Nuclear Power is a theological critique that attempts to call people to action in the battle against nuclear power Nuclear power is a sophisticated terribly expensive and frightfully dangerous way to boil water What is it doing to the earth our God created How do we care for the earth if we allow it to continue Looking at nuclear power through the eyes of faith a Lutheran pastor John Gugel is alarmed at the apparent lack of concern on this issue and seeks to call people to action

*Let There Be Light* Howard Smith, Ph.D., 2010-10-04 In *Let There Be Light* Howard Smith a research astrophysicist and traditionally observant Jew explores how modern scientific understandings of the cosmos complement Judaism's ancient mystical theology the Kabbalah He argues that science and religion are not only compatible but that a healthy productive dialogue between the two sheds light on ethics free will and the nature of life while at the same time rejecting fundamentalist misinterpretation and the pseudoscience of creationism Written for a general audience yet

supported by the most current and accurate scientific research the book discusses topics such as modern quantum mechanics and mystical notions of awareness how Kabbalah's ten sefirot mirror the developing phases of an inflationary universe and the surprising parallels that exist between the Big Bang theory and Kabbalah's origin theory Smith delves into complex ideas without resorting to jargon or mathematical equations creating an intelligent authoritative work accessible to all readers

**Religions Confronted with Science & Technology** Marc Luyckx, 1992

**Horace Kallen Confronts America** Matthew J. Kaufman, 2019-07-03

During his more than fifty year writing career American Jewish philosopher Horace Kallen 1882-1974 incorporated a deep focus on science into his pragmatic philosophy of life He exemplified the hope among Jews that science would pave the way to full and equal integration In this intellectual biography Kaufman explores Kallen's life and illuminates how American scientific culture inspired not only Kallen's thought but also that of an entire generation Kaufman reveals the ways in which Kallen shaped the direction of discussions on race ethnicity modernism and secularism that influenced the American Jewish community An ardent secularist Kallen was also a serious religious thinker whose Jewish identity as unique and idiosyncratic as it was exemplifies the modern responsiveness to the moral ideal of authenticity Kaufman shows how one man's quest for authenticity contributed to a gradual shift in Jewish self perception in America and how in turn his struggle led to America's embrace of Kallen's well known term cultural pluralism

**Science, Faith And Ethics** Larry L Hench, 2001-11-19

Every day headlines emphasise the impact that technology has on the manipulation of life We all want to live longer healthier happier lives To live at all costs and maintain life at all costs has become a popular aim This book examines those costs it probes the consequences of putting one's faith in science It explores the belief that with science comes certainty The use and misuse of implants transplants cloning genetic manipulation health care resources birth and death control are debated in terms of the complex scientific economic and ethical issues involved

**Confronting Religious Denial of Science** Catherine M. Wallace, 2016-07-05

Confronting Religious Denial of Science Christian Humanism and the Moral Imagination traces the cultural backstory of contemporary conflicts between biblical literalists who oppose evolution and New Atheists who insist that religion is so pernicious it should be outlawed if not exterminated That's a clash of fundamentalisms It's a zero sum game derived from high Victorian misunderstanding of both religion and science The God whom science supposedly replaces is the Engineer Almighty sitting at his keyboard controlling every event on earth But that's not a viable concept of God Far better Wallace argues to understand Christianity in Clifford Geertz's terms as a system of symbols that both constitutes a worldview and according to David Sloan Wilson encourages prosocial behavior That reframing makes it possible to reclaim what biblical scholars have said for decades the miracles of Jesus were confrontational symbolic actions They contradicted the political status quo in colonial Palestine not the laws of biology Prayer she explains is not magical thinking It's a creative highly disciplined introspective process most familiar to many people in forms like mindfulness meditation Wallace offers an intriguing exploration of issues that believers seldom

**Hermeneutics, Politics, and the History of Religions** Christian K. Wedemeyer, Wendy Doniger, 2010 This volume comprises papers presented at a conference marking the 50th anniversary of Joachim Wach's death and the centennial of Mircea Eliade's birth Its purpose is to reconsider both the problematic separate legacies of these two major twentieth century historians of religions and the bearing of these two legacies upon each other Shortly after Wach's death in 1955 Eliade succeeded him as the premiere historian of religions at the University of Chicago As a result the two have been associated with each other in many people's minds as the successive leaders of the so called Chicago School in the history of religions In fact as this volume makes clear there never was a monolithic Chicago School Although Wach reportedly referred to Eliade as the most astute historian of religions of the day the two never met and their approaches to the study of religions differed significantly Several dominant issues run through the essays collected here the relationship between the two men's writings and their lives and in Eliade's case the relationship between his political commitments and his writings in fiction history of religions and autobiography Both men's contributions to the field continue to provoke controversy and debate and this volume sheds new light on these controversies and what they reveal about these two scholars legacies

**Quakers, Jews, and Science** G. N. Cantor, 2005-09-22 This study examines how two minorities the Quaker and Anglo Jewish communities engaged with the sciences With their roots in the mid seventeenth century both communities maintained their religious and social norms throughout the eighteenth and nineteenth centuries while standing outside the hegemony of the Anglican Church and being subject to various forms of discrimination Yet for both Quakers and Jews science offered educational and career opportunities and participation in the wider society They adopted their own scientific interests with Quakers being attracted principally to the observational sciences Drawing on a wealth of documentary material much of which has not been analysed by previous historians Geoffrey Cantor charts the involvement of Quakers and Jews in many different aspects of science scientific research science education science related careers and scientific institutions ranging from the Royal Society to the Great Exhibition

**BOOK JACKET** Roman Catholic Modernists Confront the Great War C. Talar, L. Barmann, 2015-04-24 This book project traces the thought of several Roman Catholic Modernists and one especially virulent anti Modernist as they confronted the intellectual challenges posed by the Great war from war from 1895 to 1907

**Facing Up** Steven Weinberg, 2012-03-01 Defending the spirit of science against its cultural adversaries these essays express a viewpoint that is reductionist realist and devoutly secular Together they afford the general reader the unique pleasure of experiencing the superb sense understanding and knowledge of one of the most interesting and forceful scientific minds of our era

**Religion and Doctor Who** Andrew Crome, James F. McGrath, 2013-11-14 Doctor Who has always contained a rich current of religious themes and ideas In its very first episode it

asked how humans rationalize the seemingly supernatural as two snooping schoolteachers refused to accept that the TARDIS was real More recently it has toyed with the mystery of Doctor's real name perhaps an echo of ancient religions and rituals in which knowledge of the secret name of a god angel or demon was thought to grant a mortal power over the entity But why does Doctor Who intersect with religion so often and what do such instances tell us about the society that produces the show and the viewers who engage with it The writers of Religion and Doctor Who Time and Relative Dimensions in Faith attempt to answer these questions through an in depth analysis of the various treatments of religion throughout every era of the show's history While the majority of chapters focus on the television show Doctor Who the authors also look at audios novels and the response of fandom Their analyses all written in an accessible but academically thorough style reveal that examining religion in a long running series such as Doctor Who can contribute to a number of key debates within faith communities and religious history Most importantly it provides another way of looking at why Doctor Who continues to inspire to engage and to excite generations of passionate fans whatever their position on faith The contributors are drawn from the UK the USA and Australia and their approaches are similarly diverse Chapters have been written by film scholars and sociologists theologians and historians rhetoricians philosophers and anthropologists Some write from the perspective of a particular faith or belief others write from the perspective of no religious belief All however demonstrate a solid knowledge of and affection for the brilliance of Doctor Who

Coping with Evil Bruce McCausland, 2006-08 I have much more to tell you but you cannot grasp it now But when the Spirit of truth comes He will guide you into the whole truth for He will not speak on His own authority but will tell what is told Him and will announce to you the things that are to come John 16:12-13 Williams translation Coping with Evil addresses one of the most important topics for all humanity evil The menace of evil seems stronger today than ever before Can evil be defeated Do we have the courage even to look at its root causes Drawing on the spiritual investigations of Rudolf Steiner Sri Aurobindo and others and from his own inner work Bruce McCausland takes us on a fascinating journey into the hidden recesses of this very timely subject helping us understand and cope with today's events and our daily lives What is evil What is its source or sources How should we view evil and those who perpetrate it Using what he calls a holoscopic approach McCausland stresses the importance of how we look at a problem Traditional means no longer suffice and have proven inadequate to the task By its very nature evil is illusive and fraught with emotion These obstacles must be overcome if we are to succeed in examining this manifold menace in a meaningful productive manner But whatever we do we cannot ignore it The greatest evil it has been noted is indifference toward evil McCausland discusses the sources of evil in the form of spirit beings spiritual adversaries called Lucifer and Ahriman He explains how these two beings interact with each other and with humanity as the two extremes of evil with goodness in the center In the end we discover ways to deal with evil both as individuals and as a society In today's climate of fear and its exploitation on every side the question of evil has become an urgent matter of human survival Those who watch or read the news can use

this guidebook to understand the forces at work behind daily events It guides the reader through the confusion caused by evil and toward inner freedom      **Jonathan Edwards Confronts the Gods** Gerald R. McDermott, 2000-05-11 This is a study of how American theologian Jonathan Edwards 1703-58 battled deist arguments about revelation and God's fairness to non-Christians Author Gerald McDermott argues that Edwards was preparing before his death a sophisticated theological response to Enlightenment religion that was unparalleled in the eighteenth century and surprisingly generous toward non-Christian traditions      *Light is a Messenger* Graeme K. Hunter, 2004-08-12 Sir Lawrence Bragg was only 25 when he won the 1915 Nobel Prize in Physics the youngest person ever to win a Nobel Prize Bragg won the Nobel Prize for discovering how to use X-rays to determine the atomic structures of crystals and molecules This book is the biography of Bragg who struggled to emerge from the shadow of his father      **Light from the East** Alexei V. Nesteruk, In this unique volume a new and distinctive perspective on hotly debated issues in science and religion emerges from the unlikely ancient Eastern Orthodox Christian tradition Alexei Nesteruk reveals how the Orthodox tradition deeply rooted in Greek Patristic thought can contribute importantly in a way that the usual Western sources do not Orthodox thought he holds profoundly and helpfully relates the experience of God to our knowledge of the world His masterful historical introduction to the Orthodox traditions not only surveys key features of its theology but highlights its ontology of participation and communion From this Nesteruk derives Orthodoxy's unique approach to theological and scientific attribution Theology identifies the underlying principles *logoi* in scientific affirmations Nesteruk then applies this methodology to key issues in cosmology the presence of the divine in creation the theological meaning of models of creation the problem of time and the validity of the anthropic principle especially as it relates to the emergence of humans and the Incarnation Nesteruk's unique synthesis is not a valorization of Eastern Orthodox thought so much as an influx of startlingly fresh ideas about the character of science itself and an affirmation of the ultimate religious and theological value of the whole scientific enterprise      *Prophets Facing Backward* Meera Nanda, 2003 The leading voices in science studies have argued that modern science reflects dominant social interests of Western society Following this logic postmodern scholars have urged postcolonial societies to develop their own alternative sciences as a step towards mental decolonization These ideas have found a warm welcome among Hindu nationalists who came to power in India in the early 1990s In this passionate and highly original study Indian born author Meera Nanda reveals how these well meaning but ultimately misguided ideas are enabling Hindu ideologues to propagate religious myths in the guise of science and secularism At the heart of Hindu supremacist ideology Nanda argues lies a postmodernist assumption that each society has its own norms of reasonableness logic rules of evidence and conception of truth and that there is no non-arbitrary culture independent way to choose among these alternatives What is being celebrated as difference by postmodernists however has more often than not been the source of mental bondage and authoritarianism in non-Western cultures The Vedic sciences currently endorsed in Indian schools colleges and the mass

media promotes the same elements of orthodox Hinduism that have for centuries deprived the vast majority of Indian people of their full humanity By denouncing science and secularization the left was unwittingly contributing to what Nanda calls reactionary modernism In contrast Nanda points to the Dalit or untouchable movement as a true example of an alternative science that has embraced reason and modern science to challenge traditional notions of hierarchy **The Reform**
