Religious Education in a World of Religious Diversity Wilna A.J. Meijer, Siebren Miedema, Alma Lanser-van der Velde, 2009 This volume brings together a selection of papers presented at the Fifteenth Session of the International Seminar on Religious Education and Values ISREV which took place in 2006 in Driebergen the Netherlands addressing the theme Religious Education in a World of Religious Diversity The authors were invited to combine the concept of diversity with the dimensions of temporality of time and history in reworking their contributions for this book This temporal aspect is in a sense inherent in educational thinking On the one hand education as intergenerational transmission has a conservative aspect tradition being what is actually and presently transmitted from the past and or what is considered worthwhile to be passed on On the other hand acknowledging the activity of students themselves as a prerequisite for any education to happen brings the open endedness and therefore the future into the pedagogical arena in terms of development learning reflection edification et cetera So the question answered in this volume is what does this inherent historicity mean for religious education as well as for the concept religion and religious diversity In answering this question the contributions represent the global character of the concern with religious diversity in relation to religious education and originate respectively from the following countries Canada Bhikkhu English United States Moran Latvia Ilishko Russia Kozyrev Germany Pirner South Africa Roux du Preez Ferguson Japan Omori Australia de Souza Turkey Sel uk and the Netherlands Meijer Miedema

Christianity and the University Experience Mathew Guest, Kristin Aune, Sonya Sharma, Rob Warner, 2013-09-12 What impact does the experience of university have on Christian students Are universities a force for secularisation Is student faith enduring or a passing phase Universities are often associated with a sceptical attitude towards religion Many assume that academic study leads students away from any existing religious convictions heightening the appeal of a rationalist secularism increasingly dominant in wider society And yet Christianity remains highly visible on university campuses and continues to be a prominent identity marker in the lives of many students Analysing over 4 000 responses to a national survey of students and nearly 100

interviews with students and those working with them this book examines Christianity in universities across England It explores the beliefs values and practices of Christian students It reveals how the university experience influences their Christian identities and the influence Christian students have upon university life Christianity and the University Experience makes fascinating reading for anyone interested in the survival and evolution of religion in the contemporary world It offers fresh insights relevant to those working with Christian students including churches chaplaincies and student organisations as well as policy makers and university managers interested in the significance of religion for education social responsibility and social cohesion *A World United or a World Exploited?* Peter Price,2014-09-01 The processes of globalisation are

reshaping our world dramatically and rapidly The great issues of our day emphasise that we are all in this together startling inequalities pressures on the environment continuing hunger and poverty climate change economic integration mass migrations instant communications and recurring armed conflicts British Pakistani Boys, Education and the Role of Religion Karamat Iqbal,2018-10-03 British Pakistani children are the second largest ethnic group in UK schools yet little of their education and wider needs have been researched British Pakistani Boys Education and the Role of Religion seeks to rectify this by investigating the educational achievement of British Pakistani boys and the importance of education both in the Pakistani community and in the wider religion of Islam The book draws on research undertaken by the author in three British state secondary schools to respond to the national policy on the education of ethnic minority children It considers the meaning of education for Pakistanis where religion plays an integral role the gaps in education as well as the issue of representation in governance and in the teaching workforce The author concludes by discussing the possibility of responsive education better meeting the needs of Pakistani children by integrating Islamic religious education and education of the world British Pakistani Boys Education and the Role of Religion will be vital reading for academics and both undergraduate and postgraduate students in the fields of Education and Sociology and specifically those studying inclusion equality and diversity or Asian Muslim or Pakistani education It would also appeal to education practitioners policy makers and community activists *On Holy Ground: The Theory and Practice of Religious Education* Liam Gearon,2013-07-18 Religion

has had notable and renewed prominence in contemporary public and political life Religious questions have also been freshly examined in philosophy and theology the natural sciences the social sciences psychology phenomenology politics and the arts These fields reflect complex multi disciplinary understandings of religion some hostile some accommodating For religious education this has all contributed to its own international renaissance Religious education in ensuring it is contemporary shares with these fields the same criticality the same distance between the study of religion and the religious life Yet what are the grounds of this modern religious education Through a systematic historical and contemporary cross disciplinary analysis answering this question is the ambitious task of the book Chapters include philosophy theology and religious education the natural sciences and religious education the social sciences and religious education psychology spirituality and

religious education phenomenology and religious education the politics of religious education the aesthetics of religious education The central problem of all modern religious education remains this what are the grounds of religious education when religious education is no longer grounded in the religious life in the life of the holy Although this primarily appears to be an epistemological problem it soon becomes a moral and existential one The book will be of key interest to teachers theorists and researchers working in religious education Social inequality and interreligious learning Alexander Unser ,2019 Interreligious learning is viewed as a key educational task today Increasing religious plurality in our societies and associated risks of societal tensions and conflicts necessitate that students deal at school with other religions their belief systems and the social reality of those who believe in them Although several international studies have shown that some categories of students are at risk to be disadvantaged at school because of social inequality this problem is currently not considered in theories of interreligious learning Therefore the present study investigates whether or not categories of students are disadvantaged in interreligious learning In addition to theological and pedagogical insights about the problem of social inequality this book presents an empirically validated action theoretical model which helps to understand why some students have better or worse opportunities in interreligious learning The action theoretical model further proposes strategies to address unequal learning conditions in interreligious learning
