Lifeworlds of Islam Mohammed A. Bamyeh, 2019-04-22 How do old ideas continue to appear relevant in a modern world A sociological approach to Islam allow us to approach an answer to this question In *Lifeworlds of Islam* Mohammed A Bamyeh shows that Islam has typically operated not in the form of standard dogmas but more often as a compass for practical individual orientations or lifeworlds Through a comprehensive sociological analysis of Islam he maps out how Muslims have employed the faith to foster global networks public philosophies and engaged civic lives both historically and in the present Bamyeh further argues that all three fields are poorly understood in recent literature which tends to focus on one specific problem or another and does not take into account the variety of lifeworlds in which Islam operates The book contends that the larger preoccupations of ordinary Muslims how to imagine a global society how to guide life in the manner of a total philosophy and how to relate to the world of daily struggles in organized or semi organized civic forums and social movements are neither unique to the present period nor to religious life They are rather shared universal quandaries A focused empirical lens on the career of a religion *Lifeworlds of Islam* contributes to the larger literature and provides insight into the nature of global citizenship the philosophical needs of individuals and the ethical values that foster social participation      *J.L. Mehta on Heidegger, Hermeneutics and Indian Tradition* William J. Jackson, 2023-11-27 This book presents a selection of essays by the Indian philosopher J L Mehta on the topics of hermeneutics and phenomenology containing many original reflections on questions of interpretation and the creative retrieval and renewal of meanings from ancient traditions Beginning with essays on sources of modern phenomenological methods the work goes on to articulate principles of phenomenology and to apply them to the interpretation of Hindu traditions and texts The final group of essays consider the problems of East West understanding and issues of intercultural relationships and the possibilities of planetary thinking In the fourteen essays brought together here Mehta elucidates the contributions of continental philosophers such as Husserl Heidegger and Gadamer and interprets meanings of the Rig Veda Krishna in the Mahabharata and the life of Sri Aurobindo He also critically examines Western perceptions of India as a culture steeped in its own dreams and explores the processes of rediscovering and re appropriating through interpretation and translation one's ideological roots The book contains an introductory and a concluding essay by the editor contextualizing Mehta's life and studies Thoughtful and provocative pieces by Wilhelm Halbfass and Raimondo Panikkar lead into the main body of the work This is an especially useful work because Mehta was a rare kind of international thinker In his mature essays his thinking came full circle having grown from Hindu origins expanding through Western psychology and continental philosophy and returning to reassess profound questions in Indian thought      Understanding Climate Change through Religious Lifeworlds David L.

Haberman,2021-05-04 How can religion help to understand and contend with the challenges of climate change  
Understanding Climate Change through Religious Lifeworld edited by David Haberman presents a unique collection of essays that detail how the effects of human related climate change are actively reshaping religious ideas and practices even as religious groups and communities endeavor to bring their traditions to bear on mounting climate challenges People of faith from the low lying islands of the South Pacific to the glacial regions of the Himalayas are influencing how their communities understand earthly problems and develop meaningful responses to them This collection focuses on a variety of different aspects of this critical interaction including the role of religion in ongoing debates about climate change religious sources of environmental knowledge and how this knowledge informs community responses to climate change and the ways that climate change is in turn driving religious change Understanding Climate Change through Religious Lifeworlds offers a transnational view of how religion reconciles the concepts of the global and the local and influences the challenges of climate change

**The Genesis of Heidegger's Being and Time** Theodore Kiesel,1995-03-24 This book ten years in the making is the first factual and conceptual history of Martin Heidegger s Being and Time 1927 a key twentieth century text whose background until now has been conspicuously absent Through painstaking investigation of European archives and private correspondence Theodore Kiesel provides an unbroken account of the philosopher s early development and progress toward his masterwork Beginning with Heidegger s 1915 dissertation Kiesel explores the philosopher s religious conversion during the bleak war years the hermeneutic breakthrough in the war emergency semester of 1919 the evolution of attitudes toward his phenomenological mentor Edmund Husserl and the shifting orientations of the three drafts of Being and Time Discussing Heidegger s little known reading of Aristotle as well as his last minute turn to Kant and to existentialist terminology Kiesel offers a wealth of narrative detail and documentary evidence that will be an invaluable factual resource for years to come A major event for philosophers and Heidegger specialists the publication of Kiesel s book allows us to jettison the stale view of Being and Time as a great book frozen in time and instead to appreciate the erratic starts finite high points and tentative conclusions of what remains a challenging philosophical path **Derrida and**

**Technology: Life, Politics, and Religion** Björn Sjöstrand, 2021-10-05 This book is the first monograph that takes a comprehensive approach to Jacques Derrida as a philosopher of technology It refines and complements his mainstream image as a philosopher of language and deconstructionist of classical literary and philosophical texts This volume outlines the key features of Derrida's alternative philosophy of technology a philosophy which Sjöstrand argues avoids the problems associated with on the one hand a Heideggerian orientation which completely separates thinking and technology and on the other an empirically oriented post phenomenology that can be said to be hegemonic within the field today Based on a sustained interpretation of Derrida and a robust coherent philosophy of technology a phenomenology of technology is developed that in a radical way extends the concept of technology to cover the entire field of phenomenology This places the technological not in opposition to humanity but rather always already in close proximity to man and consequently to life ethics politics democracy and religion Strikingly this important aspect of Derrida's thinking is only rarely analyzed or discussed by his many exegetes This text appeals to graduates and researchers working on Derrida phenomenology and the philosophy of technology

**Religion and the Philosophy of Life** Gavin Flood, 2019-02-14 Religion and the Philosophy of Life considers how religion as the source of civilization transforms the fundamental bio sociology of humans through language and the somatic exploration of religious ritual and prayer Gavin Flood offers an integrative account of the nature of the human based on what contemporary scientists tell us especially evolutionary science and social neuroscience as well as through the history of civilizations Part one contemplates fundamental questions and assumptions what the current state of knowledge is concerning life itself what the philosophical issues are in that understanding and how we can explain religion as the driving force of civilizations in the context of human development within an evolutionary perspective It also addresses the question of the emergence of religion and presents a related study of sacrifice as fundamental to religions views about life and its transformation Part two offers a reading of religions in three civilizational blocks India China and Europe the Middle East particularly as they came to formation in the medieval period It traces the history of how these civilizations have thematised the idea of life itself Part three then takes up the idea of a life force in part three and traces the theme of the philosophy of life through to modern times On the one hand the book presents a narrative account of life itself through the history of civilizations and on the other presents an explanation of that narrative in terms of life

**Vatican II and Phenomenology** J.F. Kobler, 2012-12-06 The thesis of this essay may be stated quite briefly Vatican II is a demonstration model of the phenomenological method employed on an international scale It exemplifies the final developmental stage postulated by Husserl of an inter subjective phenomenology which would take its point of

departure not from individual subjectivity but from transcendental intersubjectivity Vatican II accordingly offers a unique application of a universal transcendental philosophy in the field of religious reflection for the practical purposes of moral and socio cultural renewal Phenomenology as a distinctively European development is relatively unknown in America at least in its pure form Our contact with this style of intuitive reflection is usually filtered through psychology or sociology However Edmund Husserl The Father of Phenomenology was originally trained in mathematics and he entered the field of philosophy because he recognized that the theoretical foundations of modern science were disintegrating He foresaw that unless this situation were rectified modern men would eventually slip into an attitude of absolute scepticism relativism and pragmatism After the First World War he saw this theoretical problem mirrored more and more in the social turbulence of Europe and his thoughts turned to the need for a renewal at all levels of life In 1937 when Nazism was triumphant in Germany and Europe on the brink of World War II he wrote his last major work *The Crisis of European Sciences and Transcendental Philosophy*

**The Young Heidegger** John Van Buren, 1994-11-22 a major contribution to Heidegger scholarship *Journal of the History of Behavioral Sciences* Van Buren's portrayal of these formative years is striking and vital to all future Heidegger scholarship Christian Century Van Buren presents a clear and cogent argument for the theory that Martin Heidegger's mature thought epitomized in *Being and Time* actually was a return to his youthful theory and concerns Van Buren's ability to present a rounded discussion while using Heidegger's own technical vocabulary is highly commendable *Library Journal* here at last is a work on the philosopher that is of fundamental philosophical historical import Van Buren's book is both interesting and well written Choice a readable interesting and first rate book John D Caputo A startling new reading of Martin Heidegger's early thought leading up to *Being and Time* 1927 and its subsequent development in his later writings

**The Phenomenology of Religious Life** Martin Heidegger, 2021-12-22 Scrupulously prepared and eminently readable this volume presents Heidegger's most important lectures on religion from 1920-21 Choice In the early 1920s Martin Heidegger delivered his famous lecture course *Introduction to the Phenomenology of Religion* at the University of Freiburg He also prepared notes for a course on *The Philosophical Foundations of Medieval Mysticism* that was never delivered Though he never prepared this material for publication it represents a significant evolution in his philosophical perspective Heidegger's engagements with Aristotle Neoplatonism St Paul Augustine and Martin Luther give readers a sense of what phenomenology would come to mean in the mature expression of his thought Heidegger reveals an impressive display of theological knowledge protecting Christian life experience from Greek philosophy and defending Paul against Nietzsche

*Narrating the Everyday: Windows on Life in Central South Africa* Asta Rau, Magdalena Wojciechowska, Jan K. Coetzee, 2019-01-01 The chapters in this book reflect on the practice of using narratives to understand individual and social reality They all reveal dimensions of the same concrete reality contemporary society of Central South Africa Except for two all the chapters originated from research in the program *The Narrative Study of Lives* situated in the Department of Sociology at the University of the Free State in

Bloemfontein South Africa Each chapter opens a window on an aspect of everyday life in Central South Africa Each window displays the capacity of the narrative as a methodological tool in qualitative research to open up better understandings of everyday experience The chapters also reflect on the epistemological journey towards unwrapping and breaking open of meaning Narratives are one of many tools available to sociologists in their quest to understand and interpret meaning But when it comes to deep understanding narratives are particularly effective in opening up more intricate levels of meaning associated with emotions feelings and subjective experiences

*Also a History of Philosophy, Volume 1* Jürgen Habermas, 2023-08-23 This is the first volume of a ground breaking new work by Jürgen Habermas on the history of philosophy In this major new work Habermas sets out the ideas that inform his systematic account of the history of Western philosophy as a genealogy of postmetaphysical thinking His account goes far beyond a vindication of the enduring relevance of philosophical reflection founded on communicative reason as a source of orientation in the modern world He contrasts this conception with prominent diagnoses of the supposed crisis of Enlightenment reason and culture that seeks redemption in the affirmation of traditional religious authority Schmitt the timeless validity of Greek metaphysics Strauss a numinous conception of nature Levinas and an occurrence of being that speaks to us from beyond the mists of pre Socratic thought Heidegger Habermas situates Western philosophy in relation to traditions of thought founded in the major worldviews Judaism Buddhism Confucianism and Taoism that continue to shape contemporary culture and civilization At the same time he lays the groundwork for his analysis in the later volumes of the constitutive role played by the discourse on faith and knowledge in the development of Western philosophy which is the result of the unique symbiosis that Christianity entered into with Greek thought with the Christianization of the Roman Empire Far from raising claims to exclusivity completeness or closure Habermas's history of philosophy published in English in three volumes opens up new lines of research and reflection that will influence the humanities and social sciences for decades to come
