Religious Guide To Europe:

A Religious Guide to Europe Daniel M. Madden, 1975-01-01

Religion in Modern Europe Grace Davie, 2000-08-03

Religion in Modern Europe examines religion as a form of collective memory. This is a memory held in place by Europe's institutional churches, educational systems, and the mass media, all of which are themselves responding to rapid social and economic change. Europe's religious memory is approached in the following ways: as vicarious, a particularly European characteristic; as precarious, especially among young people; and as it is portrayed by the media. The memory may fragment, be disputed, and in extreme cases disappear. Alternatives may emerge. The challenge for European societies is to affirm healthy mutations in religious memory and discourage others. The book also examines the increasing diversity of Europe's religious life. *European Societies Series*. Series Editor: Colin Crouch. Very few of the existing sociological texts which compare different European societies on specific topics are accessible to a broad range of scholars and students. The *European Societies* series will help fill this gap in the literature and attempt to answer questions such as: Is there really such a thing as a European model of society? Do the economic and political integration processes of the European Union also imply convergence in more general aspects of social life, like family or religious behaviour? What do the societies of Western Europe have in common with those further to the east? This series will cover the main social institutions, although not every author will cover the full range of European countries. As well as surveying existing knowledge in a way that will be useful to students, each book will also seek to contribute to our growing knowledge of what remains in many respects a sociologically unknown continent.

Religions, Beliefs and Education in the European Court of Human Rights Nigel Fancourt, 2024-02-20. This book represents an exposition of judicial pedagogies as a new concept and discusses juridical educational issues in detail through an analysis of the educational claims and assumptions of judges' decisions in the European Court of Human Rights (ECtHR). It sheds light on how, within courtrooms around the world, judges are increasingly being asked to decide upon issues of religion and belief in schooling, whether about admissions policies, curriculum planning, or pupils and teachers' dress and jewellery. With key human rights principles at stake, these proceedings are often fraught, clashing with strong opinions about education and schooling. Focusing on decisions made in the European Court of Human Rights (ECtHR), the author considers how the supranational court looks at these issues and considers the ECtHR's role within the European Education space. Drawing upon research and scholarship surrounding these questions, the book surveys a series of educational issues, including curriculum and assessment, and takes a comparative approach in the discussion of case studies to demonstrate the variety and depth of judges' thinking. Thus, rather than considering the national or supranational legal principles and questions as jurisprudential issues typically about religion or human rights, it reviews them from an educational perspective as folk theories of teaching and learning. Finally, it considers the implications of a theory of judicial pedagogy for the courts' educational competence in deciding on these matters for education and educational policy research, the European education space, legal scholarship, and

for legal and judicial education Developing a novel and innovative approach to the pedagogies at play in a courtroom and providing fresh insights into the courts as agents of social change it will appeal to scholars and researchers working across the disciplines of education law and religious studies The Oxford Handbook of Religion and Europe Grace Davie, Lucian Leuștean, 2022 Features contributions from leading scholars providing crucial insight into the role of religious ideas structures and institutions in the making of Europe Introduces the building blocks of Europe's religious and the part that they played in the formation of the continent Explores the relationship between religious communities and ideologies in the twentieth century connections that play out very differently in East and West Europe Examines the role of religion in the construction of the European Union from the end of the Second World War until the present day Assesses the relationship between the major world religions and the idea of Europe Book jacket **Integrative Religious Education in Europe** Wanda Alberts, 2012-02-14 This book is a contribution to the development of the young discipline of the didactics of the Study of Religions Religionswissenschaft in international perspective Integrative religious education refers to education about different religions in classrooms with children of various religious and non religious backgrounds Cornerstones of recent debates about theory and methodology in the academic study of religions and in education are discussed in the first chapter They form the basis of the following analysis and evaluation of current approaches to integrative religious education in Europe with a special focus on England and Sweden Particular attention is paid to the different underlying concepts of religion education and ways of representing religious plurality in these approaches Building on a discussion of the current situation of teaching and learning about religions in schools in Europe in the context of wider cultural social and political debates the book concludes with the suggestion of a framework for integrative religious education in Europe from a perspective that combines insights from the study of religions and education **Christian Pilgrimage in Modern Western Europe** Mary Lee Nolan, Sidney Nolan, 2018-06-15 Christian Pilgrimage in Modern Western Europe is a commanding exploration of the importance of religious shrines in modern Roman Catholicism By analyzing more than 6 000 active shrines and contemporary patterns of pilgrimage to them the authors establish the cultural significance of a religious tradition that today touches the lives of millions of people Roman Catholic pilgrimage sites in Western Europe range from obscure chapels and holy wells that draw visitors only from their immediate vicinity to the world famous often thronged shrines at Rome Lourdes and Fatima These shrines generate at least 70 million religiously motivated visits each year with total annual visitation exceeding 100 million Substantial numbers of pilgrims at major shrines come from the Americas and other areas outside Western Europe Mary Lee Nolan and Sidney Nolan describe and interpret the dimensions of Western European pilgrimage in time and space a cultural geographic approach that reveals regional variations in types of shrines and pilgrimages in the sixteen countries of Western Europe They examine numerous legends and historical accounts associated with cult images and shrines showing how these reflect ideas about humanity divinity and environment The
