Religious Inventions Max Charlesworth, 2010-08-04 Many scholars assume that all genuine religions are basically similar and that it is possible to define the sphere of religion in terms of the sacred In his latest book Max Charlesworth argues that we must take the diversity of religions as a primary fact Any religion is an active response to a revelation of the divine and human beings receive these revelations interpret them and develop them in a variety of ways Charlesworth illustrates his thesis with examples ranging from Australian Aboriginal religion to twentieth century Roman Catholicism

The Second Vatican Council on Other Religions Gerald O'Collins, 2013-03-28 Many observers greeted the Second Vatican Council 1962 65 as the most important religious event in the twentieth century Its implementation and impact are still being felt in the Catholic Church the wider Christian world and beyond One sea change that Vatican II brought concerned Roman Catholic attitudes towards Judaism Islam and other religions Gerald O Collins breaks fresh ground by examining in detail five

documents from the Council which embodied a new mindset about other religious faiths and mandated changes that quickly led to international and national dialogues between the Catholic Church and the followers of non Christian religions The book also includes chapters on the insights that prepared the way for the rethinking expressed by Vatican II and on the follow up to the Council s teaching found in the work of Pope John Paul II and Jacques Dupuis O Collins ably illustrates how the Council made a startling advance in official Catholic teaching about followers of other living faiths Carefully researched the book is written in the clear accessible style that readers of previous works by O Collins will recognize **Excel Senior High**

School Studies of Religion Louise Fleming,2001 Religion and Change in Australia Adam Possamai,David

Tittensor,2022-03-30 This timely book offers a panoramic overview of the enduring significance of religion in modern Australian society Applying sociological perspectives and contemporary theories of religion in society it challenges conventional assumptions around the extent of secularisation in Australia and instead argues that religious institutions groups and individuals have proved remarkably adaptable to social change and continue to play a major role in Australian life In doing so it explores how religion intersects with a wide range of other contemporary issues including politics race migration gender and new media Religion and Change in Australia explores Australia s unique history regarding religion Christianity was originally imported as a tool of social control to keep convicts settlers and Australian Aboriginal peoples in check This had a profound impact on the social memory of the nation and lingering resentment towards the excessive presence of religion continues to be felt today Freedom of religion was enshrined in Section 116 of the Australian Constitution in 1901 Nevertheless the White Australia Policy effectively prevented adherents of non Christian faiths from migrating to Australia and the nation remained overwhelmingly Christian However after WWII Australia in common with other western societies appears to have become increasingly secularised as religious observance declined dramatically However Religion and Change in Australia employs a range of social theories to challenge this secularist view and argues that Australia is a post secular society The 2016 census revealed that over half of the population still identify as Christian In politics the socially conservative religious right has come to exert considerable influence on the ruling Liberal National Coalition particularly under John Howard and Scott Morrison New technologies such as the Internet and social media have provided new avenues for religious expression and proselytisation whilst so called megachurches have been built to cater to their increasing congregations The adoption of multiculturalism and increased immigration from Asia has led to a religiously pluralist society though this has often been controversial In particular the position of Islam in Australia has been the subject of fierce debate and Islamophobic attitudes remain common Atheism non belief and alternative spiritualities have also become increasingly widespread especially amongst the young Religion and Change in Australia analyses these developments to offer new perspectives on religion and its continued relevance within Australian society This book is therefore a vital resource for students academics and general readers seeking to understand contemporary debates

surrounding religion and secularisation in Australia New Approaches to the Study of Religion: Regional, critical, and historical approaches Peter Antes, Armin W. Geertz, Randi Ruth Warne, 2004 Internationally recognized scholars from many parts of the world provide a critical survey of recent developments and achievements in the global field of religious studies The work follows in the footsteps of two former publications Classical Approaches to the Study of Religion edited by Jacques Waardenburg 1973 and Contemporary Approaches to the Study of Religion edited by Frank Whaling 1984 85 New Approaches to the Study of Religion completes the survey of the comparative study of religion in the twentieth century by focussing on the past two decades Many of the chapters however are also pathbreaking and point the way to future approaches **Inventing Catholic Tradition** Terrence W. Tilley, 2011-06-07 This creative argument that traditions are neither found nor made but are invented and reinvented in practice is carried out in dialogue with scholars such as Yves Congar and George Lindbeck Tilley examines the actual practices as the bearers of tradition and argues that vibrant and meaningful traditions must be reinvented or reconstructed in every generation He demonstrates how deliberately invented or imposed traditions are often resisted Tilley applies his analysis to the Catholic Intellectual Tradition and in the last chapter shows how truth revelation and authority can be accommodated by a constructivist practical theology of tradition

Clashes of Knowledge Peter Meusburger, Michael Welker, Edgar Wunder, 2008-04-15 Do traditional distinctions between belief and knowledge still make sense How are differences between knowledge and belief understood in different cultural contexts This book explores conflicts between various types of knowledge especially between orthodox and heterodox knowledge systems ranging from religious fundamentalism to heresies within the scientific community itself Beyond addressing many fields in the academy the book discusses learned individuals interested in the often puzzling spatial and cultural disparities of knowledge and clashes of knowledge **The Beginning of All Things** Hans Kng, 2008-06-06 In an age when faith and science seem constantly to clash can theologians and scientists come to a meeting of minds Yes maintains the intrepid Hans K ng as he brilliantly argues here that religion and science are not mutually exclusive but complementary Back cover **Aboriginal Religions in Australia** Françoise Dussart, Howard Morphy, 2017-09-08 Over the last 25 years there has been an explosion of interest in the Aboriginal religions of Australia and this anthology provides a variety of recent writings by a wide range of scholars Australian Aboriginal Religions are probably the oldest extant religious systems Over some 50 000 years they have coped with change and re-invented themselves in an astonishingly creative way The Dreaming the mythical time when the Ancestor Spirits shaped the territories of the Aborigines and laid down a moral and ritual law for their occupants is the fundamental religious reality It is the basis of the Aborigines's view of their land or country kinship relationships ritual and art However the Dreaming is not a static principle since it is interpreted in different ways as in the extraordinary movement in contemporary indigenous painting and in attempts at an accommodation with Christianity The contributions of anthropologists cultural historians philosophers of religion and others are included in this

anthology which not only guides readers through the literature but also ensures this still largely inaccessible material is available to a wider range of readers and non specialist students and academics

Sociology of Religion for Generations X and Y Adam Possamai, 2016-04-08 Generations X and Y are plugged into the contemporary world of consumption popular culture and the internet These generations treat knowledge and belief as a more flexible concept often focusing on the practical rather than the theoretical and often drawing on conflicting sources in both popular and cyber culture Their approach to religious belief and practice requires a new way of studying the sociology of religion Sociology of Religion for Generations X and Y examines key world religions Buddhism Christianity and Islam as well as newer religious groups such as Scientology New Age Witchcraft and online communities such as Jediism and Matrixism The book covers a range of key concepts secularisation and modernisation re enchantment the McDonaldisation of society and the easternisation of the west Each chapter opens with a case study from popular culture or the internet which takes the reader to the heart of the topic being discussed Employing both classical sociological theory and contemporary critical theory Sociology of Religion for Generations X and Y explains where contemporary religion and spirituality are coming from where they are now and where they are going
