Mental Health Statistics ,1969 **Flirting with Death** Corinne Masur,2018-05-20 This volume covers a much neglected topic the avoidance by psychotherapists and psychoanalysts of the topic of their own mortality and that of their patients All too often the psychotherapist or psychoanalyst who is ill is unable to confront this reality in the presence of her patient and fails to prepare the patient for the most permanent goodbye death This volume includes nine essays which consider why the psychotherapist and psychoanalyst may find illness mortality retirement and termination so difficult This volume is a collection of essays by psychoanalysts covering the denial of death amongst psychotherapists and psychoanalysts and the effect on clinical practice the effect of early childhood confrontation with mortality on the professional development of psychoanalysts illness in the analyst the death of patients and termination and retirement as symbolic harbingers of death *Financing Terrorism* Michael Freeman,2016-04-15 Without money terrorists cannot function as organizations and cannot conduct attacks Yet the questions remain how vulnerable are terrorists to financial disruptions Can governments put pressure on their finances in meaningful ways or are they too resilient and adaptive to be affected by state actions These and other questions about terrorism financing are vigorously debated by scholars and policymakers particularly since the attacks of September 11th 2001 While there is a growing literature on policy issues strategies and countermeasures states must first understand their enemies before developing strategies to defeat them So instead of focusing on the state response this book asks a more foundational question How do different terrorist groups actually raise money What are their budgets What do their portfolios look like How have they changed over time What are the advantages and disadvantages of different sources of financing The book includes case studies of 11 different terrorist groups or sets of groups within a country It is clear that each group has a different portfolio tailored to their needs and their environment and this makes countering terrorist financing more challenging for the state This topical book will be required reading for all students and scholars interested in terrorism financing as well as those working in government agencies tasked with combating terrorist groups and their financial resources
