**Human Behavior in the Social Environment** Caryl B. Germain,Martin Bloom,1999 It also takes into account the expected and unexpected stresses challenges and life tasks that can influence development within social environments BOOK JACKET

**Adolescents** Inger P. Davis,2012-12-06 This book deals with ways of helping families cope with the difficulty of raising adolescents Professional social workers along with other human service professionals encounter these families in numerous settings child welfare and family service agencies hospitals schools community mental health clinics residential treatment centers juvenile halls and detention centers recreational and vocational training organizations and many others While families from all walks of life may be found in these settings families who have suffered the additional stresses of poverty

discrimination and the consequences of physical and mental illness are commonly overrepresented Even under the best of circumstances the adolescent years often put the strongest family structures to the test sometimes to the breaking point A recent national study of over one thousand average middle income two parent families reviewed the strengths stresses and satisfactions of the family life cycle Olson and McCubbin 1983 As many would expect families with adolescents were found to experience more stress and lower levels of family adaptability cohesion and marital and family satisfaction than any other developmental stage The families with adolescents who fared best were those with such marital resources as good communication and conflict resolution skills satisfying sexual relations and good parent adolescent communication

**The Dark Side of Close Relationships II** William R. Cupach, Brian H. Spitzberg, 2010-09-13 The Dark Side of Close Relationships II is a completely new and up to date version of the original volume published in 1998 featuring new topics and authors The volume showcases cutting edge work on important topics by prominent scholars in multiple disciplines It sheds light on the paradoxical dialectical and mystifying facets of human interaction not merely to elucidate dysfunctional relationship phenomena but to help readers explore and understand it in relation to a broader understanding about relationships As previous Dark Side investigations have revealed negative or dysfunctional outcomes can occur in relationships even though positive and functional ones are expected and at the same time positive silver linings are often found in some dark relational clouds Such nuanced approaches are needed to better account for the complexity of close relationships A unique and provocative collection this volume will appeal to relationship researchers in communication social psychology family studies and sociology

*Engendered Death* Joseph W. Laythe, 2011-12-16 Engendered Death Pennsylvania Women Who Kill is an historical and interdisciplinary study of women who kill in Pennsylvania from the 18th century to the present It is not an examination of what motivates women to kill although the reader may deduce that from the case studies included Instead it is an examination of how society perceives women who kill and how the gender lens is applied to them throughout the legal process in the media and in the courtroom What makes this work particularly unique is its combination of both scholarly analysis and narrative case studies As such it will appeal to both the scholar and the reader of true crime non fiction If we are to recognize the complex variables at play in all criminal offenses we will need to understand that the laws of a community its social values its politics economics and even geography play a factor in what laws are enforced and against whom they are enforced The decision to define and label certain behaviors and certain people was based on social political and economic considerations of each community Thus the commission of murder by a woman in Arizona may have a variety of factors associated with it that are not present in the case of a woman who murdered her husband in Maine This study in part because of the volume of cases and in part to limit the variables affecting the cases has limited its scope of women killers to the state of Pennsylvania Pennsylvania is the ideal state to study because of its long and stable legal and political traditions its historically diverse population and the large number of newspapers that will help us

gauge the public's view of women and women who kill. By limiting our scope to one state we know that the legal definitions are fairly consistent for all of the women during a certain period and we can more easily identify the shifts in social values regarding women and homicide.

**Strangers in the House** William R. Beer,2017-07-28 If present trends in divorce and remarriage continue before the end of the century the stepfamily will outnumber all other types of family in the United States In 1980 one out of five children under the age of eight were living in stepfamilies and there were at least two million households in which the children were relation only by marriage stepsiblings or who shared only one parent in common half siblings How are these new kinds of family relationships working out In particular how are children faring in these kinds of families There are a number of books on the successes and difficulties of second marriages that involve children but most of these look at problems from the perspective of one or both spouses Popular literature in particular had emphasized the problem of the new spouse who inherits a family without really focusing on the relationships among stepsiblings *Strangers in the House* focuses on the children of these marriages both stepsiblings and half siblings and the relationships among them with the parents It is a report on how they are faring drawn from the results of original research by the author case studies of stepfamilies interviews with stepsiblings and half siblings a survey of members of the Stepfamily Association of America and participation in three step family self help groups The result is a vivid portrait of nontraditional family constellations that provides an overview of changes in American families the increased divorce and remarriage rates and how stepfamilies differ from other families Beer identifies major problem areas in stepsibling relations and shows how youngsters are adapting to these special situations He examines classic rivalries over love attention space and property shows how these are worked out within these special circumstances The book concludes with an overview of the dynamics of sibling relations in these special families and analyzes how the stepsibling subsystem fits into the large      *The Psychosocial Interior of the Family* Gerald Handel,Gail G. Whitchurch,1994 This long awaited fourth edition has the same goal as the preceding editions to understand families in terms of the kinds of interaction through which family life is constructed The changes in the family as an institution have influenced these processes just as they have influenced the ways we understand and write about them But even in these postmodern circumstances an underlying premise of the volume is that two partners establish a family because they have selected each other as distinctively meaningful to one another They will affirm modify elaborate or retreat from various aspects of the relationship through interaction over time and in changing circumstances This volume contains the best available interdisciplinary work on the social psychology of the family More than half of the selections are new to this edition which incorporates a variety of theoretical and research perspectives that provide the reader with a range of authoritative and up to date sources on the family and interpersonal relations The newer forms of family organization that have emerged in the more recent literature specifically single parent families stepfamilies and families of gay and lesbian domestic partners are included Authors have been drawn from a variety of disciplines including sociology communication family studies human development psychology anthropology and social work      **The Divorce Process** Craig Everett,2021-03-24 Professionals
