Confessions of the Unmedicated Mind, Volume 1: Home Benjamin Tomes, 2012-09-21 There have been books about ADHD before but nothing quite like this funny ebook series Undiscovered author Benjamin Tomes outlines the distinct line between discovery and origin as he details a childhood impacted by ADHD in a world not yet familiar with the disorder Many have treated ADHD as a pandemic that sprang from nowhere sapping the attention spans of scores of school aged children Nothing could be further from the truth yet few have delved into our past to examine instances of the disorder before it was recognized by modern medicine This humorous memoir entertains while it recounts life in the 1970 s and 1980 s before anyone had ever heard of Attention Deficit Hyperactivity Disorder In his four part humorous memoir entitled Confessions of the Unmedicated Mind Tomes provides an unprecedented firsthand account of ADHD His take on a childhood impacted by the focus disorder and dysfunctional family is as hilarious as it is poignant albeit not for the faint of heart Despite home tumult and academic failure Tomes would go on to become an award winning coach and successful teacher providing an interesting perspective on an unlikely ascent from rural miscreant to urban legend Set primarily in the small towns of Northern Wisconsin Tomes uses heavy handed humor to deliver blunt force drama drawn from his personal war on boredom His birth to twenty one account is broken into four key areas and the series is issued in volumes along those lines Volume 1 Home Home reads like a self written psych report detailing family idiosyncrasies dalliances with girls experimentation with alcohol and meandering through life without regard as well as a potential road to redemption Along the way fish are thrown at tourists prank calls are made children are led astray in church a bowling alley is defiled and socially challenged relatives are antagonized Nothing is sacred as Tomes spins a classic piece of humorous non fiction with his true stories of bad behavior In vivid detail Tomes recounts his dysfunctional childhood the genetic roots of his ADHD the influence of ill behaved cousins and extended family his parent s awkward religious beliefs and a laundry list of bad behavior stunts pranks and a life heavily influenced by a chronic intolerance of boredom [Bowker's Complete Video Directory, 1999](#) ,1999 **Successful**

Autobiographical Memory Charles P. Thompson,Douglas J. Herrmann,Darryl Bruce,J. Don Read,David G. Payne,2014-10-10 The organization of the first Society for Applied Research in Memory and Cognition SARMAC conference centered around two specifically identifiable research topics autobiographical memory and eyewitness memory These two areas long time staples on the menu of investigators of memory in more natural settings differ on a variety of dimensions perhaps most notably in their specific goals for scientific inquiry and application For many questions about memory and cognition that are of interest to scientific psychology there have been historical as well as rather arbitrary reasons for their assignment to the autobiographical or eyewitness memory fields Perhaps as a result of differing historical orientations the first volume s seven autobiographical memory chapters focus upon the qualities or types of recall from research participants whereas the seven chapters in the eyewitness memory volume generally focus upon the quantity a concern for completeness and accuracy of recall This interest in the ultimate end product and its application within the legal process in general encourages eyewitness memory investigators to modify their testing procedures continually in an attempt to gain even more information from participants about an event Indeed several of the eyewitness memory chapters reflect such attempts Beyond the specific contributions of each chapter to the literature on autobiographical and eyewitness memory the editors hope that the reader will come away with some general observations the autobiographical and eyewitness memory fields are thriving these two fields are likely to remain center stage in the further investigation of memory in natural contexts although the autobiographical and eyewitness memory chapters have been segregated in these two volumes the separation is often more arbitrary than real and connections between the two areas abound the two research traditions are entirely mindful of fundamental laboratory methods research and theory sometimes drawing their research inspirations from that quarter and the two fields though driven largely by everyday memory concerns can contribute to a more basic understanding of memory at both an empirical and a theoretical level
