River Basin Sediment Systems Darrel Maddy, Mark G. Macklin, J. C. Woodward, 2001 An exploration of the relationship between river behaviour and environmental change The research involves a wide range of disciplines including geomorphology geophysics archaeology palaeoecology engineering and planning

Geomorphological Processes and Landscape Change David L. Higgitt, E. Mark Lee, 2011-07-15 The expert contributors to this cutting edge volume provide an overview of geomorphological process activity and landscape change in Britain over the past 1000 years The range of the book is unusually broad encompassing hillslope valley floor and floodplain fluvial estuarine and coastal processes Provides an overview of geomorphological process activity and landscape change in Britain over the past 1000 years The range of the book is unusually broad encompassing hillslope valley floor and floodplain fluvial estuarine and coastal processes Considers the relevance of technological and conceptual approaches to understanding landscape dynamics Examines key process environments highlighting significant trends and the influence of human activity and incorporating examples and modelling Encourages geographers to look forward to the challenges that geomorphology faces in the new millennium Find out more information about the RGS IBG journals by following the links below AREA <http://www.blackwellpublishing.com/journal.asp?ref=0004-0894> The Geographical Journal <http://www.blackwellpublishing.com/journal.asp?ref=0016-7398> Transactions of the Institute of British Geographers <http://www.blackwellpublishing.com/journal.asp?ref=0020-2754>

Nile River Basin Assefa M. Melesse, 2011-03-28 This book presents results of scientific studies ranging from hydrological modelling to water management and policy issues in the Nile River basin It examines the physical hydrometeorological and hydrogeological description of the basin along with analysis in understanding the hydrological processes of the basin under the changing land use stemming from population pressure and increased natural resources tapping The book discusses the increased impact of climate change on the river flows and such issues as water availability and demand management and policy to offset the imbalance between demand and available resources This book will be of interest to researchers practitioners water resources managers policy makers as well as graduate and undergraduate students It is a useful reference text for ecohydrology arid zone hydrology hydrology of transboundary rivers and similar courses

Alluvial Archaeology in Europe Andrew J. Howard, M.G. Macklin, D.G. Passmore, 2003-01-01 This book documents and assesses over ten years of research in the field bringing together expertise and knowledge from the disciplines of archaeology and geomorphology and highlighting important recent advances discoveries and new directions Reflecting the wide scope of current research in this area the book contains over twenty papers focusing on various aspects of alluvial archaeology from the methodology of dating prospecting excavating etc to previously under analysed geographical areas such as intertidal wetlands

Climate Variability and Change Flow Regimes from International Experimental and Network Data (Project), 2006 This volume contains 117 reviewed papers from over 30 countries published in English French and Spanish which reflect both international dimension of

FRIEND and the key challenges facing hydrologists in the 21st century Encyclopedia of Geomorphology Andrew Goudie, 2013-04-15 Volume editor is the leading authority in the field Alphabetically organized in two volumes c 700 comprehensively signed cross referenced and indexed entries Detailed bibliographies and suggestions for further reading follow most entries Fully illustrated over 300 plates and line drawings Written by an editorial team of over 270 experts from over thirty countries *Geological Correlation*, 2000 **Special External Effects on Fluvial System Evolution** Jef Vandenberghe, David R. Bridgland, Xianyan Wang, 2019-12-18 Rivers are an excellent witness of the dynamics affecting Earth's surface due to their sedimentary products and morphological expression which may be considered as fluvial archives Until now the focus has been on evaluating the general impact of individual external factors However the importance of the specific environmental characteristics of these factors has become increasingly recognized as highlighted in recent case studies For example the effects of regional climate differentiated topography and vegetation and frozen ground appear to play an essential role in the evolution of the fluvial system Integration of such environmental conditions in the processes that were active within the complex fluvial system will open new perspectives in our progressive understanding of the evolution of landscape form ecology sediment fluxes and hydrology of the system within the framework of the external drivers such as tectonics general climate and human activity This is an appealing challenge that we wish to address in the present Special Issue under the aegis of the Fluvial Archives Group FLAG **River Restoration** Stephen Darby, David Sear, 2008-02-28 River restoration projects are designed to recreate functional characteristics within a context of physical stability They tend to focus on the development and application of geomorphic principles for river restoration design Due to different models obtaining different results on the same problem incomplete or absent data and climatic social cultural changes the designers and managers of such projects frequently face high levels of uncertainty This book will provide a systematic overview of the issues involved in minimizing and coping with uncertainty in river restoration projects A series of thematic sections will be used to define the various sources of uncertainty in restoration projects and how these show at different points in the life cycle design construction and post construction phases of restoration projects The structure of the book will offer a rational theoretical analysis of the problem while providing practical guidance in managing the different sources of uncertainty A wide range of case studies will be included from Europe North America and Australasia **The Nile: Natural and Cultural Landscape in Egypt** Harco Willems, Jan-Michael Dahms, 2017-03-15 Although Herodotus' dictum that Egypt is a gift of the Nile is proverbial there has been only scant attention to the way the river impacted on ancient Egyptian society Egyptologists frequently focus on the textual and iconographic record whereas archaeologists and earth scientists approach the issue from the perspective of natural sciences The contributions in this volume bridge this gap by analyzing the river both as a natural and as a cultural phenomenon Adopting an approach of cultural ecology it addresses issues like ancient land use administration and taxation irrigation and religious concepts **The Black Sea Flood Question: Changes in Coastline,**

Climate and Human Settlement Valentina Yanko-Hombach, Allan S. Gilbert, Nicolae Panin, Pavel M.

Dolukhanov, 2006-11-15 Stimulated by Noah's Flood Hypothesis proposed by W Ryan and W Pitman in which a catastrophic inundation of the Pontic basin was linked to the biblical story leading experts in Black Sea research including oceanography marine geology paleoclimate paleoenvironment archaeology and linguistic spread provide overviews of their data and interpretations obtained through empirical scientific approaches Among the contributors are many East European scientists whose work has rarely been published outside of Cyrillic Each of the 35 papers marshals its own evidence for or against the flood hypothesis No summary or overall resolution to the flood question is presented but instead access is provided to a broad range of interdisciplinary information that crosses previously impenetrable language barriers so that new work in the region can proceed with the benefit of a wider frame of reference The three fundamental scenarios describing the late glacial to Holocene rise in the level of the Black Sea catastrophic gradual and oscillating are presented in the early pages with the succeeding papers organized by geographic sector northern Ukraine western Moldova Romania and Bulgaria southern Turkey and eastern Georgia and Russia as well as three papers on the Mediterranean The volume thus brings together eastern and western scholarship to share research findings and perspectives on a controversial subject In addition appendices are included containing some 600 radiocarbon dates from the Pontic region obtained by USSR and western laboratories

Reindeer Hunters of the Ice Age in Europe Laure Fontana, 2022-09-26 This book undertakes a thorough study of Reindeer in the Upper Pleniglacial and Tardiglacial societies in France It addresses two main topics the economy of animal resources within the societies and the exploitation of Reindeer organized within the annual cycle in terms of space and time between 30 000 and 14 000 cal BP in France The author proposes an analysis and hypothesis regarding the economy of animal resources and the nomadic cycle of the last Paleolithic hunter gatherer societies in order to identify a Reindeer system The author discusses the relationship between Reindeer and human mobility and offers some conclusions regarding the annual cycles of nomadism The volume scrutinizes the distinct eco systems in three regions and its effects on the movements of both human and animal This book is of interest to zooarchaeologists and prehistorians

The Mechanism of Induced Seismicity Cezar I. Trifu, 2012-12-06 Climate Change in Deserts Martin Williams, 2014-08-11 Reconstructing climatic changes in deserts and their margins at a variety of scales in space and time this book draws upon evidence from land and sea including desert dunes wind blown dust river and lake sediments glacial moraines plant and animal fossils isotope geochemistry speleothems soils and prehistoric archaeology The book summarises the Cenozoic evolution of the major deserts of the Americas Eurasia Africa and Australia and the causes of historic floods and droughts The book then considers the causes and consequences of desertification and proposes four key conditions for achieving ecologically sustainable use of natural resources in arid and semi arid areas Climate Change in Deserts is an invaluable reference for researchers and advanced students interested in the climate and geomorphology of deserts geographers geologists ecologists

archaeologists soil scientists hydrologists climatologists and natural resource managers **Global Environments Through the Quaternary** David E. Anderson, Andrew S. Goudie, Adrian G. Parker, 2007-01-25 Global Environments through the Quaternary delves into the environmental changes that have taken place during the Quaternary the two to three million years during which man has inhabited the Earth It is essential reading for any students seeking a balanced objective overview of this truly interdisciplinary subject *The British Lower Palaeolithic* John McNabb, 2011-03-17 Taking as its central theme the issue of whether early Hominins organized themselves into societies as we understand them John McNabb looks at how modern researchers recognize such archaeological cultures He examines the existence of a stone tool culture called the Clactonian to introduce the multidisciplinary nature of the subject In analyzing the various kinds of data archaeologists would use to investigate the existence of a Palaeolithic culture this book represents the latest research in archaeology population dispersals geology climatology human palaeontology evolutionary psychology environmental and biological disciplines and dating techniques along with many other research methods **Treatise on Geomorphology**, 2013-02-27 The changing focus and approach of geomorphic research suggests that the time is opportune for a summary of the state of discipline The number of peer reviewed papers published in geomorphic journals has grown steadily for more than two decades and more importantly the diversity of authors with respect to geographic location and disciplinary background geography geology ecology civil engineering computer science geographic information science and others has expanded dramatically As more good minds are drawn to geomorphology and the breadth of the peer reviewed literature grows an effective summary of contemporary geomorphic knowledge becomes increasingly difficult The fourteen volumes of this Treatise on Geomorphology will provide an important reference for users from undergraduate students looking for term paper topics to graduate students starting a literature review for their thesis work and professionals seeking a concise summary of a particular topic Information on the historical development of diverse topics within geomorphology provides context for ongoing research discussion of research strategies equipment and field methods laboratory experiments and numerical simulations reflect the multiple approaches to understanding Earth's surfaces and summaries of outstanding research questions highlight future challenges and suggest productive new avenues for research Our future ability to adapt to geomorphic changes in the critical zone very much hinges upon how well landform scientists comprehend the dynamics of Earth's diverse surfaces This Treatise on Geomorphology provides a useful synthesis of the state of the discipline as well as highlighting productive research directions that Educators and students researchers will find useful Geomorphology has advanced greatly in the last 10 years to become a very interdisciplinary field Undergraduate students looking for term paper topics to graduate students starting a literature review for their thesis work and professionals seeking a concise summary of a particular topic will find the answers they need in this broad reference work which has been designed and written to accommodate their diverse backgrounds and levels of understanding Editor in Chief Prof J F Shroder of the University of

Nebraska at Omaha is past president of the QG G section of the Geological Society of America and present Trustee of the GSA Foundation while being well respected in the geomorphology research community and having won numerous awards in the field A host of noted international geomorphologists have contributed state of the art chapters to the work Readers can be guaranteed that every chapter in this extensive work has been critically reviewed for consistency and accuracy by the World expert Volume Editors and by the Editor in Chief himself No other reference work exists in the area of Geomorphology that offers the breadth and depth of information contained in this 14 volume masterpiece From the foundations and history of geomorphology through to geomorphological innovations and computer modelling and the past and future states of landform science no stone has been left unturned

The Nile Basin Martin Williams, 2019-01-03 The Nile Basin contains a record of human activities spanning the last million years However the interactions between prehistoric humans and environmental changes in this area are complex and often poorly understood This comprehensive book explains in clear non technical terms how prehistoric environments can be reconstructed with examples drawn from every part of the Nile Basin Adopting a source to sink approach the book integrates events in the Nile headwaters with the record from marine sediment cores in the Nile Delta and offshore It provides a detailed record of past environmental changes throughout the Nile Basin and concludes with a review of the causes and consequences of plant and animal domestication in this region and of the various prehistoric migrations out of Africa into Eurasia and beyond A comprehensive overview this book is ideal for researchers in geomorphology climatology and archaeology

Encyclopedia of Quaternary Science Cary Mock, 2013-03-25 The second revised edition of the Encyclopedia of Quaternary Science Four Volume Set provides both students and professionals with an up to date reference work on this important and highly varied area of research There are lots of new articles and many of the articles that appeared in the first edition have been updated to reflect advances in knowledge since 2006 when the original articles were written The second edition will contain about 375 articles written by leading experts around the world This major reference work is richly illustrated with more than 3 000 illustrations most of them in colour Research in the Quaternary sciences has advanced greatly in the last 10 years especially since topics like global climate change geologic hazards and soil erosion were put high on the political agenda This second edition builds upon its award winning predecessor to provide the reader assured quality along with essential updated coverage Contains 357 broad ranging articles 4310 pages written at a level that allows undergraduate students to understand the material while providing active researchers with a ready reference resource for information in the field Facilitates teaching and learning The first edition was regarded by many as the most significant single overview of Quaternary science ever yet Editor in Chief Scott Elias has managed to surpass that in this second edition by securing even more expert reviews whilst retaining his renowned editorial consistency that enables readers to navigate seamlessly from one unfamiliar topic to the next

Tectonic Development of the Eastern Mediterranean Region A. H. F. Robertson, Demosthenis Mountrakis, 2006 The Eastern Mediterranean region is a classic

area for the study of tectonic processes and settings related to the development of the Tethyan orogenic belt. The present set of research and synthesis papers by earth scientists from countries in this region and others provides an up to date interdisciplinary overview of the tectonic development of the Eastern Mediterranean region from Precambrian to Recent. Key topics include continental rifting, ophiolite genesis and emplacement, continental collision, extensional tectonics, crustal exhumation and intra plate deformation e.g. active faulting. Alternative tectonic reconstructions of the Tethyan orogen are presented and discussed with important implications for other regions of the world. The book will be an essential source of information and interpretation for academic researchers, geologists and geophysicists, advanced undergraduates and also for industry professionals including those concerned with hydrocarbons, minerals and geological hazards e.g. earthquakes.
