Hillbilly Hellraisers J. Blake Perkins, 2017-09-11 Long a bastion of

antigovernment feeling the Ozark region today is home to fervent strains of conservative influenced sentiment Does rural heritage play an exceptional role in the perpetuation of these attitudes Have such outlooks been continuous J Blake Perkins searches for the roots of rural defiance in the Ozarks and discovers how it changed over time Eschewing generalities Perkins focuses on the experiences and attitudes of rural people themselves as they interacted with government from the late nineteenth century through the twentieth century He uncovers the reasons local disputes and uneven access to government power fostered markedly different reactions by hill people as time went by Resistance in the earlier period sprang from upland small farmers conflicts with capitalist elites who held the local levers of federal power But as industry and agribusiness displaced family farms after World War II a conservative cohort of town business elites local political officials and midwestern immigrants arose from the region s new low wage union averse economy As Perkins argues this modern antigovernment conservatism bore little resemblance to the backcountry populism of an earlier age but had much in common with the movement elsewhere

Missing Links Jeremy Rich,2012-01-01 Jeremy Rich uses the eccentric life of R L Garner 1848 1920 to examine the commercial networks that brought the first apes to America during the Progressive Era a critical time in the development of ideas about African wildlife race and evolution Garner was a self taught zoologist and atheist from southwest Virginia Starting in 1892 he lived on and off in the French colony of Gabon studying primates and trying to engage U S academics with his theories Most prominently Garner claimed that he could teach apes to speak human languages and that he could speak the languages of primates Garner brought some of the first live primates to America launching a traveling demonstration in which he claimed to communicate with a chimpanzee named Susie He was often mocked by the increasingly professionalized scientific community who were wary of his colorful escapades such as his ill fated plan to make a New York City socialite the queen of southern Gabon and his efforts to convince Thomas Edison to finance him in Africa Yet Garner did influence evolutionary debates and as with many of his era race dominated his thinking Garner s arguments for example that chimpanzees were more loving than Africans or that colonialism constituted a threat to the separation of the races offer a fascinating perspective on the thinking and attitudes of his times *Missing Links* explores the impact of colonialism on Africans the complicated politics of buying and selling primates and the popularization of biological racism

the perversity of white rural poverty for the American public Cartwright contends that these accounts extracted and estranged from their own ambivalent forum of community gossip must be read in kind through a racialized materialist queercrip optic of the deeply familiar and mundane Taking in popular science documentary photography news media documentaries and horror films Peculiar Places orients itself at the intersections of disability studies queer studies and gender studies to illuminate a racialized landscape both profoundly ordinary and familiar
