State and Society in the Philippines Patricio N. Abinales, Donna J. Amoroso, 2017-07-06 This clear and nuanced introduction explores the Philippines ongoing and deeply charged dilemma of state society relations through a historical treatment of state formation and the corresponding conflicts and collaboration between government leaders and social forces Patricio N Abinales and Donna J Amoroso examine the long history of institutional weakness in the Philippines and the varied strategies the state has employed to overcome its structural fragility and strengthen its bond with society The authors argue that this process reflects the country's recurring dilemma on the one hand is the state's persistent inability to provide essential services guarantee peace and order and foster economic development on the other is the Filipinos equally enduring suspicions of a strong state To many citizens this powerfully evokes the repression of the 1970s and the 1980s that polarized society and cost thousands of lives in repression and resistance and billions of dollars in corruption setting the nation back years in economic development and profoundly undermining trust in government The book's historical sweep

starts with the politics of the pre colonial era and continues through the first year of Rodrigo Duterte s controversial presidency

Drivers of Corruption Tina Søreide,2014-10-15

This report provides an overview of arguments explaining the risk of corruption. Corrupt acts are subject to decision making authority and assets available for grabbing. These assets can be stolen, created by artificial shortage or become available as the result of a market failure. Assets that are especially exposed to corruption include profits from the private sector, revenues from the export of natural resources, aid and loans, and the proceeds of crime. Whether or not opportunities for corruption are exploited depends on the individuals involved, the institution or society they are part of, and the law enforcement circumstances. Corruption usually persists in situations in which players are aware of the facts but nonetheless condone the practice. Absence of reaction can result from information asymmetries in which the people who are supposed to act are not aware of the need to act, coordination failure, patronage, determined loyalty, and incentive problems at the political level. This review of results and insights from different parts of the scholarly literature on corruption focuses on areas where research can guide anticorruption policy. The report also describes a number of corruption related challenges in need of more attention from researchers.

Accountability in education: meeting our commitments UNESCO, 2017-10-30

The second edition of the Global Education Monitoring Report (GEM Report) presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals. With hundreds of millions of people still not going to school and many not achieving minimum skills at school, it is clear education systems are off track to achieve global goals. The marginalized currently bear the most consequences but also stand to benefit the most if policy makers pay sufficient attention to their needs. Faced with these challenges along with tight budgets and increased emphasis on results oriented value for money, countries are searching for solutions. Increased accountability often tops the list. The 2017 8 GEM Report shows the entire array of approaches to accountability in education. It ranges from countries unused to the concept where violations of the right to education go unchallenged to countries where accountability has become an end in itself instead of a means to inclusive, equitable and high quality education and lifelong learning for all. The report emphasizes that education is a shared responsibility. While governments have primary responsibility, all actors: schools, teachers, parents, students, international organizations, private sector providers, civil society and the media, have a role in improving education systems. The report emphasized the importance of transparency and availability of information but urges caution in how data are used. It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions. In an era of multiple accountability tools, the report provides clear evidence on those that are working and those that are not. Back cover
