Aztlán and Arcadia Roberto Ramon Lint Sagarena,2014-08-22 In the wake of the Mexican American War competing narratives of religious conquest and reconquest were employed by Anglo American and ethnic Mexican Californians to make sense of their place in North America These invented traditions had a profound impact on North American religious and ethnic relations serving to bring elements of Catholic history within the Protestant fold of the United States national history as well as playing an integral role in the emergence of the early Chicano a movement Many Protestant Anglo Americans understood their settlement in the far Southwest as following in the footsteps of the colonial project begun by Catholic Spanish missionaries In contrast Californios Mexican Americans and Chicana/os stressed deep connections to a pre-Columbian past over to their own Spanish heritage Thus as Anglo Americans fashioned themselves as the spiritual heirs to the Spanish frontier many ethnic Mexicans came to see themselves as the spiritual heirs to a southwestern Aztec homeland

Building Louisiana Robert D. Leighninger Jr., 2009-09-18 Robert D Leighninger Jr believes there may be a model for municipal building projects everywhere in the ambitious and artful structures erected in Louisiana by the Public Works Administration In the 1930s the PWA built a tremendous amount of infrastructure in a very short time Most of the edifices are still in use yet few people recognize how these schools courthouses and other great structures came about Building Louisiana documents the projects one New Deal agency erected in one southern state and places these in social and political context Based on extensive research in the National Archives and substantial field work within the state Leighninger has gathered the story of the establishment of the PWA and the feverish building activity that ensued He also recounts early tussles with Huey Long and the scandals involving public works discovered during the late New Deal The book includes looks at individual projects of particular interest Big Charity hospital the Carville leprosy center the Shreveport incinerator and the LSU sugar plant A concluding chapter draws lessons from the

PWA s history that might be applied to current political concerns Also included is an annotated inventory of every PWA project in the state Finally this composite picture honors those workers and policymakers who in a time of despair expressed hope for the future with this enduring investment The Visionary State Erik Davis,2006-06-22 With a rich cultural history and Hollywood stars publicly attesting to a wide range of faiths it s no surprise that California s spiritual landscape is as diverse as its natural surroundings The Visionary State weaves text and image into a compelling narrative of religion architecture and consciousness in California from neopaganism to televangelism UFO cults to austere Zen Buddhism Acclaimed culture critic Erik Davis brings together the immigrant and homegrown religious influences that have been part of the region s character from its earliest days drawing connections between seemingly unlike traditions and celebrating the diversity of California s spiritual composition Michael Rauner s evocative photographs depict the sites and structures where these traditions have taken root and flourished The Visionary State is a landmark look at what is likely the most varied locale for religious activity anywhere *Maya Architecture and the Creation of a New Style* Robert Stacy-Judd,1993 **Exploring Yucatan** Richard D. Perry,2001 American Art Deco Carla Breeze,2003 Art Deco architecture flourished in large cities and small towns throughout America in the 1920s and 1930s The style is now captured in over 500 color photos of 75 lavish and innovatively designed buildings across the country that have been preserved both outside and in giving the full scope of this beloved exciting style **A Cultural History of Underdevelopment** John Patrick Leary,2016-11-10 A Cultural History of Underdevelopment explores the changing place of Latin America in U S culture from the mid nineteenth century to the recent U S Cuba d tente In doing so it uncovers the complex ways in which Americans have imagined the global geography of poverty and progress as the hemispheric imperialism of the nineteenth century yielded to the Cold War discourse of underdevelopment John Patrick Leary examines representations of uneven development in Latin America across a variety of genres and media from canonical fiction and poetry to cinema photography journalism popular song travel narratives and development theory For the United States Latin America has figured variously as good neighbor and insurgent threat as its possible future and a remnant of its past By illuminating the conventional ways in which Americans have imagined their place in the hemisphere the author shows how the popular image of the United States as a modern exceptional nation has been produced by a century of encounters that travelers writers radicals filmmakers and others have had with Latin America Drawing on authors such as James Weldon Johnson Willa Cather and Ernest Hemingway Leary argues that Latin America has figured in U S culture not just as an exotic other but as the familiar reflection of the United States own regional racial class and political inequalities **Architecture of Transportation** Maggie Toy,1994-07-04 Architectural challenges presented by transport interchanges and related environments are profiled **Art Deco San Francisco** Therese Poletti,2008-09-03 The Castro Theatre the Pacific Telephone and Telegraph Headquarters 450 Sutter Medico Dental Buildingthesemasterpieces of San Francisco s Art Deco heritage are the work of one man Timothy Pflueger An immigrant s sonwith only a grade school

education Pflueger began practicing architecture after San Francisco's 1906 earthquake. While his contemporaries looked to Beaux Arts traditions to rebuild the city, he brought exotic Mayan, Asian, and Egyptian forms to buildings ranging from simple cocktail lounges to the city's first skyscrapers. Pflueger was one of the city's most prolific architects during his 40-year career. He designed two major downtown skyscrapers, two stock exchanges, several neighborhood theaters, movie palaces, and four smaller cities, including the beloved Paramount in Oakland, some of the city's biggest schools, and at least 50 homes. His works include the San Francisco Stock Exchange, the ever popular Top of the Mark, the San Francisco Oakland Bay Bridge, and the San Francisco World's Fair. It is a testament to his talent that many of his buildings still stand and many have been named landmarks. Therese Poletti tells the fascinating story of Pflueger's life and work in *Art Deco San Francisco*. In lively detail, she relates how Pflueger built extravagant compositions in metal, concrete, and glass. She also tells the story behind the architecture, Pflueger's commissioning and support of muralist Diego Rivera, his association with photographer Ansel Adams and sculptor Ralph Stackpole, and his childhood friendship turned to adulthood sponsorship with San Francisco Mayor James "Sunny" Rolph Jr. Beautiful archival photography mixes with stunning new photography in this collection of a truly Californian but ultimately American story.

Architecture as Revolution Luis E. Carranza, 2010-06-15 The period following the Mexican Revolution was characterized by unprecedented artistic experimentation. Seeking to express the revolution's heterogeneous social and political aims, which were in a continuous state of redefinition, architects, artists, writers, and intellectuals created distinctive, sometimes idiosyncratic theories and works. Luis E. Carranza examines the interdependence of modern architecture in Mexico and the pressing sociopolitical and ideological issues of this period, as well as the interchanges between post-revolutionary architects and the literary, philosophical, and artistic avant-gardes. Organizing his book around chronological case studies that show how architectural theory and production reflected various understandings of the revolution's significance, Carranza focuses on architecture and its relationship to the philosophical and pedagogic requirements of the muralist movement, the development of the avant-garde in Mexico, and its notions of the Mexican city, the use of pre-Hispanic architectural forms to address indigenous peoples, the development of a socially oriented architectural functionalism, and the monumentalization of the revolution itself. In addition, the book also covers important architects and artists who have been marginally discussed within architectural and art historiography. Richly illustrated, *Architecture as Revolution* is one of the first books in English to present a social and cultural history of early twentieth-century Mexican architecture.

Re-Presenting the Past Sheila Bonde, Stephen Houston, 2013-07-01 The archaeological past exists for us through intermediaries. Some are written works, descriptions, narratives, and field notes, while others are visual: the drawings, paintings, photographs, powerpoints, or computer visualizations that allow us to re-present past forms of human existence. This volume brings together nine papers, six of which were presented at a symposium hosted at Brown University. Two papers explore the classical past and medieval visualizations. Three treat the Maya, and one considers the imaging by eighteenth

century antiquarians of British history yet another ranges broadly in its historical considerations Several consider the trajectory over time of visualization and self imaging Others engage with issues of recording by looking for example at the ways in which nineteenth century excavation photographs can aid in the reconstruction of an inscription or by evaluating the process of mapping a site with ArcGIS and computer animation software All essays raise key questions about the function of re presentations of the past in current archaeological practice

The Metropolis in Latin America, 1830-1930 Idurre Alonso, Maristella Casciato, 2021-08-17 This volume examines the unprecedented growth of several cities in Latin America from 1830 to 1930 observing how sociopolitical changes and upheavals created the conditions for the birth of the metropolis In the century between 1830 and 1930 following independence from Spain and Portugal major cities in Latin America experienced large scale growth with the development of a new urban bourgeois elite interested in projects of modernization and rapid industrialization At the same time the lower classes were eradicated from old city districts and deported to the outskirts The Metropolis in Latin America 1830 1930 surveys this expansion focusing on six capital cities Havana Mexico City Rio de Janeiro Buenos Aires Santiago de Chile and Lima as it examines sociopolitical histories town planning art and architecture photography and film in relation to the metropolis Drawing from the Getty Research Institute s vast collection of books prints and photographs from this period largely unpublished until now this volume reveals the cities changes through urban panoramas plans depicting new neighborhoods and photographs of novel transportation systems public amenities civic spaces and more It illustrates the transformation of colonial cities into the monumental modern metropolises that by the end of the 1920s provided fertile ground for the emergence of today s Latin American megalopolis
