Longman Geography Choice Students Longman Secondary Geography:

Longman Geography A. Bowen,1996-02-01 **Spatial Theories of Education** Kalervo N. Gulson,Colin

Symes,2007-11-21 This collection of original work within the sociology of education draws on the spatial turn in contemporary social theory The premise of this book is that drawing on theories of space allows for a more sophisticated understanding of the competing rationalities underlying educational policy change social inequality and cultural practices The contributors work a spatial dimension into the consideration of educational phenomena and illustrate its explanatory potential in a range of domains urban renewal globalisation race markets and school choice suburbanisation regional and rural settings and youth and student culture **Space, Place and Scale in the Study of Education** Lorraine

Symaco,Colin Brock,2017-10-02 The term space is inherently geographical Educational provision and activity takes place within spaces ranging from a room at home or in a school to a campus to an administrative area which could be a state within a country a whole country or a group of countries Such spaces are known as geographical surfaces Within these spaces the process of learning and teaching takes place at particular points that are often nodes in a network which may be formal such as a group of schools or universities or non formal such as in cyberspace Understanding what goes on depends on the scale at which it is observed ranging from individuals to global outreach Altogether this constitutes the geography of educational reality This comprehensive volume includes a theoretical background plus a sample of situations including school level policy and administration inequitable access education hubs and small states It offers an introduction to a relatively neglected member of the family of education foundation disciplines the geography of education This book was originally published as a special issue of Comparative Education *Research and Debate in Primary Geography* Simon Catling,2017-10-02 This book brings together recent papers which make important contributions to understanding and developing primary geography It considers primary teachers and trainee teachers knowledge of geography how the primary curriculum uses geography teachers planning of geography teaching the way in which aspects of geography are taught what high quality geography might look like and children s geographical understanding and voices Though geography curricula change quite often in countries around the world the core matters noted above remain of constant and vital importance The papers in this book either concern research with primary teachers and children or consider key concerns in primary geography providing important perspectives for thinking about future developments in geography teaching and curriculum initiatives in primary schools This is a stimulating and enticing collection written by leading exponents of and experts in primary geography education This book was originally published as a special issue of Education 3 13 Bookbuyers' Reference Book ,1993

Schools, Markets and Choice Policies John Fitz,Stephen Gorard,Chris Taylor,2003-12-16 Choice and selection are now cornerstones of education policies wherever these have been shaped by market economics Now as never before schools can face uncertain futures because their survival is determined by external factors such as admission policies and parental

preferences Because of the link between schooling and housing and other public sector services the implications of increasing choice extends well beyond education *Schools Markets and Choice Policies* brings together the findings of the most comprehensive research ever conducted into choice in secondary education and provides in depth context analysis and discussion In assessing the impact of choice policies not only upon the education system itself but also upon wider society it provides valuable insights into economic and social segregation A groundbreaking contribution to the debate on the role of choice and market economies in education this book is essential reading for anyone involved in determining or implementing education policy at all levels Social Studies for the Twenty-first Century Jack Zevin,1999-08-01 Revised and updated second edition offers an overall framework to guide teaching in setting objectives devising lessons and choosing classroom strategies as well as assistance in constructing tests *Nigerian Geographical Teachers Journal* ,1999 *Longman's Magazine* Charles James Longman,1898 The Athenaeum ,1909
