Losing Our Heads Beheadings In Literature And Culture:

Losing Our Heads Regina Janes, 2005-08 Losing Our Heads explores in both artistic and cultural contexts the role of the chopped off head

Losing Our Heads Regina Janes, 2005-08-01 What is the fascination that decollation holds for us as individuals and as a culture Why does the idea make us laugh and the act make us close our eyes Losing Our Heads explores in both artistic and cultural contexts the role of the chopped off head It asks why the practice of decapitation was once so widespread why it has diminished but not as scenes from contemporary Iraq show completely disappeared and why we find it so peculiarly repulsive that we use it as a principal marker to separate ourselves from a more barbaric or primitive past Although the topic is grim Regina Janes's treatment and conclusions are neither grisly nor gruesome but continuously instructive about the ironies of humanity's cultural nature Bringing to bear an array of evidence the book argues that the human ability to create meaning from the body motivates the practice of decapitation its diminution the impossibility of its extirpation and its continuing fascination Ranging from antiquity to the late nineteenth century passion for Salome and John the Baptist and from the enlightenment to postcolonial Africa's challenge to the severed head as sign of barbarism Losing Our Heads opens new areas of investigation enabling readers to understand the shock of decapitation and to see the value in moving past shock to analysis Written with penetrating wit and featuring striking illustrations it is sure to captivate anyone interested in his or her head

Symbolism in Terrorism Jonathan Matusitz, 2014-09-16 The symbolic value of targets is what differentiates terrorism from other forms of extreme violence Terrorism is designed to inflict deep psychological wounds on an enemy rather than demolish its material ability to fight The September 11 2001 attacks for example demonstrated the power of symbolism The World Trade Center was targeted by Al Qaeda because the Twin Towers epitomized Western civilization U S imperialism financial success modernity and freedom The symbolic character of terrorism is the focus of this textbook A comprehensive analysis it incorporates descriptions definitions case studies and theories Each chapter focuses on a specific dimension of symbolism in terrorism and explains the contexts and processes that involve the main actors as well as the symbolism of both the purposes and targets of terrorism Also discussed are new religious movements which represent another important aspect of terrorism such as Aum Shinrikyo the Japanese cult that used sarin gas in the Tokyo subway in 1995 Over forty areas of symbolism are covered throughout the chapters including physical and non physical symbolism linguistic symbolism the social construction of reality rituals myths performative violence iconoclasm brand management logos semiotics new media and the global village This allows for an in depth examination of many issues such as anti globalization honor killing religious terrorism suicide terrorism martyrdom weapons female terrorism public communication visual motifs and cyberspace Main concepts are clearly defined and followed by theory illustrated by international case studies Chapter summaries key points review questions research and practice suggestions are recurring components as well This groundbreaking text encompasses all major aspects of symbolism in terrorism and will be an essential resource for

anyone studying terrorism On Beheading Amalendu Misra, 2022-09-08 Beheading is not an uncommon undertaking As a particularized physical violence it has been practiced by all societies and civilizations at some point in their history In fact for millennia public beheadings around the world were routine In contemporary international society some states and many non state actors regularly engage in this undertaking This begs the obvious question why put a human being through this unimaginable cruelty While the idea of execution by decapitation appears visceral and horrific it has always been grounded in cultural religious and political contexts If contemporary history is any proof the enterprise of beheading a fellow human being appears to be making a comeback in certain religious and political landscapes A question of enormous intellectual importance the phenomenon of beheading is understudied There have been many explanations surrounding specific forms of beheading through the ages However no inclusive study has engaged with it in its entirety Primarily a philosophical reflection On Beheading is inter disciplinary in nature it freely cuts across various disciplines within the broad framework of the social sciences It uses a vast array of empirical evidence from anthropology literature jurisprudence and religion to build a discourse and narrative that brings this subject under one intellectual umbrella **Heads Will Roll** ,2012-01-20 The decapitation motif recurs in nearly all medieval and early modern genres from saints lives and epics to comedies and romances yet decollation is often little regarded save as a marker of humanity that is as the moment mortality exits or inhumanity that is as the moment the supernatural enters However as a seat of reason wisdom and even the soul the head has long been afforded a special place in the body politic even when separated from its body proper Capitalizing upon the enduring fascination with decapitation in European culture this collection examines through a variety of critical lenses the recurring roles rolls of severed human heads in the medieval and early modern imagination Contributors are Nicola Masciandaro Mark Faulkner Jay Paul Gates Christine Cooper Rompato Dwayne Coleman Mary Leech Tina Boyer Ren e Ward Andrew Fleck Thomas Herron Thea Cervone and Asa Simon Mittman Preface by Jeffrey Jerome Cohen *Criminal-States and Criminal-Soldiers* Robert J. Global Powers of Horror Francois Debrix, 2016-12-19 Global Powers of Horror examines contemporary regimes of horror into horror's intricacies and into their deployment on and through human bodies and body parts To track horror's work what horror decomposes and perhaps recomposes Debrix goes beyond the idea of the integrality and integrity of the human body and it brings the focus on parts pieces or fragments of bodies and lives Looking at horror's production of bodily fragments both against and beyond humanity the book is also about horror's own attempt at re-forming or re-creating matter from the perspective of post human non human and inhuman fragmentation Through several contemporary instances of dismantling of human bodies and pulverization of body parts this book makes several interrelated theoretical contributions It works with contemporary post geo political figures of horror faces of concentration camp dwellers body parts of victims of terror attacks the outcome of suicide bombings graphic reports of beheadings re-compositions of melted and mingled remnants of non human and human matter after 9 11 to challenge regimes of terror and security that seek to forcefully and ideologically reaffirm a biopolitics and thanatopolitics of human life in order to anchor today's often devastating deployments of the metaphysics of substance Critically enabling one to see how security and terror form a geo political continuum of violent mobilization utilization and often destruction of human and non human bodies and lives this book will be of interest to graduates and scholars of bio politics international relations and security studies
