Stars on the Earth Richard Leviton, 2006-08 Discover the wonderful secret the Earth holds for us that the stars of the galaxy live on our planet Holograms of high magnitude stars over holy mountains Physical travel to other planets through stargates on the Earth's surface Near instantaneous transportation across the planet through quick way portals Outrageous science fiction or sober geomantic fact Earth Mysteries researcher Richard Leviton takes you on a wild tour of three geomantic features of our planet and reveals that what science fiction has dreamed the Earth in fact offers us Stars on the Earth combines scholarship clairvoyance and field experience with the latest discoveries of geology and astrophysics and the timeless insights of the world's myths to open the planetary door to the stars It's all part of the Earth's unsuspected but staggeringly rich endowment as a designer planet Our planet was precisely designed and implemented for us and it's equipped with a visionary geography that mirrors features of the galaxy and Heavens Why are so many of the Earth's mountains said to be holy producing visions and encounters with the gods They all have canopies of light called domes each transmitting the presence of a galactic star What is the geomantic origin of the Bermuda Triangle Two dysfunctional stargates If working properly they and the Earth's other two million stargates could transport us rapidly to other planets Is there a way to travel quickly across the planet without using cars airplanes boats or trains Yes and it's called a traversable wormhole and the Earth has thousands of them awaiting our discovery and use Come join the tour of a planet you've never seen before our own star infused Earth

1491 Charles C. Mann, 2005-08-09 A groundbreaking study that radically alters our understanding of the Americas before the arrival of the Europeans in 1492 Traditionally Americans learned in school that the ancestors of the people who inhabited the Western Hemisphere at the time of Columbus's landing had crossed the Bering Strait twelve thousand years ago existed mainly in small nomadic bands and lived so lightly on the land that the Americas was for all practical purposes still a vast wilderness But as Charles C Mann now makes clear archaeologists and anthropologists have spent the last thirty years proving these and many other long held assumptions wrong In a book that startles and persuades Mann reveals how a new generation of researchers equipped with novel scientific techniques came to previously unheard of conclusions Among them In 1491 there were probably more people living in the Americas than in

Europe Certain cities such as Tenochtitl n the Aztec capital were far greater in population than any contemporary European city Furthermore Tenochtitl n unlike any capital in Europe at that time had running water beautiful botanical gardens and immaculately clean streets The earliest cities in the Western Hemisphere were thriving before the Egyptians built the great pyramids Pre Columbian Indians in Mexico developed corn by a breeding process so sophisticated that the journal Science recently described it as man s first and perhaps the greatest feat of genetic engineering Amazonian Indians learned how to farm the rain forest without destroying it a process scientists are studying today in the hope of regaining this lost knowledge Native Americans transformed their land so completely that Europeans arrived in a hemisphere already massively landscaped by human beings Mann sheds clarifying light on the methods used to arrive at these new visions of the pre Columbian Americas and how they have affected our understanding of our history and our thinking about the environment His book is an exciting and learned account of scientific inquiry and revelation

The Gospel of Mary Magdalene And Me Rethy Devi,2021-08-31 I m pleased to introduce my novel I have invested last 10 years of my life researching writing and rewriting this book More than 500 books I have read before I wrote this novel Born out of diversity each of these women lived apart for centuries without any meeting finally provides a context and a narrative style unique to this novel And it unravels a freshness of spirit The tug of war between the ideologies of the east and west the interplay of similarities in human nature spread over a vast expanse of time help interpret and understand herself The story draws its inspiration from my interest in the intriguing nature of feminist ideas alongside spirituality and sexuality It was a sincere effort to highlight my passion for feminist philosophies psychology and politics I chose to write a fiction as I enjoy telling stories and found it a good medium to weave in my other interests in sociology history metaphysics and quantum physics The first part of the novel deals with the recital of life experiences of Mary Magdalene who lived nearly two thousand years ago there was a noble woman called Lexmi who lived in modern era In the second part Lexmi relates to Mary Magdalene her woes as a philosopher and her frustrations reflective of life in today s world War is just like terrorism 20 million people died in the two world Wars and 10 million people vanished at the time of partition of India My novel is seriously discussing these issues

Bomb, Book and Compass Simon Winchester,2008-09-25 Before fate intervened Joseph Needham was a distinguished biochemist at Cambridge University married to a fellow scientist In 1937 he was asked to supervise a young Chinese student named Lu Gwei Djen and in that moment began the two greatest love affairs of his life Miss Lu and China Miss Lu inspired Needham to travel to China where he initially spent three dangerous years as a wartime diplomat He established himself as the pre eminent China scholar of all time firm in his belief that China would one day achieve world prominence By the end of his life Needham had become a truly global figure travelling endlessly and honoured by all though banned from America because of his politics And in 1989 after a fifty two year affair he finally married the woman who had first inspired his passion The Magnificent Barbarian is Simon Winchester at his best at once a magnificent portrait of one man s remarkable life and a

riveting exploration of the country that so engaged him Teaching Science in Elementary and Middle School Cory A. Buxton, Eugene F. Provenzo, 2007-02-26 I believe the experiments in this text can be well integrated into any science education course and help create an environment of exploration Willis Walter Jr Florida AM University This textbook should be a companion of all elementary and middle school pre service and in service teachers who are interested in educating students of different abilities and backgrounds Benjamin C Ngwudike Jackson State University Science is almost always thought of as a solitary content area practiced by lone practitioners in isolated laboratories The reality is that science is highly dependent upon culture and history This textbook meaningfully presents these relationships in a fashion accessible to college level teacher candidates Claudia A Balach Slippery Rock University of Pennsylvania Teaching Science in Elementary and Middle School A Cognitive and Cultural Approach is an introductory science curriculum and methods textbook for pre service teachers in primary and middle schools The primary purpose of the book is to provide an introduction to the teaching of science with an emphasis on guiding the pre service teacher toward conceptual understanding of core standards based science content from the four major scientific disciplines application of scientific methods and processes of inquiry to the learning of these science concepts development of scientific language that is both expressive and constitutive in the formation of scientific reasoning the ability to guide learners through numerous core scientific experiments that help to illuminate items 1 3 evaluation of social and cultural factors that shape and influence both science and science education analysis of the local context in which science must be understood as well as the global context synthesis of science as interrelated with other aspects of the world and how this idea can be taught to students through integrated and thematic instruction The approach throughout is clear and practical and is designed to foster reflective teaching rooted in research and theory Teaching Science in Elementary and Middle School A Cognitive and Cultural Approach is a synthesis of current knowledge in science education cognition and culture The authors provide a text that fosters the development of teachers who feel prepared to engage their students in rich science learning experiences **The Vedic Core of Human History** M. K. Agarwal, 2013-12 The origin of world civilization can be traced to the Indus Valley cradle where brilliant and original thinkers made groundbreaking discoveries The history of these discoveries is recorded in the vast Sanskrit literature In this study author M K Agarwal explores the cultural and historical significance of the region He explores Indus Valley culture which encouraged creative thought as opposed to the Abrahamic faiths which herded followers into dogmatic thinking He holds that these religions prospered because of their unfettered hatred of the Vedic Hindu Buddhist peoples who were demonized as pagans to be murdered tortured raped enslaved and robbed He also considers the achievements of that culture such as the creation of the most affluent most scientifically advanced and most spiritual of all societies with archeological moorings that can be traced back to 8000 BC No other region can even come close to transforming people and culture like the Indus Valley but the world s Vedic roots have been ignored shunned and covered up Uncover the history that has been

lost and develop a deeper appreciation for the true cradle of human civilization with The Vedic Core of Human History
