Lost Berlin:

The Lost Termini of Berlin Ilja Nieuwland, 2024-11-04 From the birth of Berlin's railway network to the time when the bombs of the Second World War and the concrete slabs of the Wall changed the city forever the Prussian and later German capital counted eight major railway stations These were beacons in the city impressive monuments magnificently built for the bygone rituals of arrival and departure yet tightly woven into a distinct part of town Railway stations are magical meaningful places allowing for escape as well as promise nostalgia as well as novelty They process all sorts of people from well to do business types to unfortunates forced to live on the fringes of society There is a nervous energy around them created by those looking forward to their journey others trying to get oriented in a place that is new to them and some facing the drudgery of yet another commute And if pre World War 2 Berlin was anything it was energetic Building an adequate transport infrastructure for Europe's fastest growing city proved to be a continuous challenge that required flexibility and adaptation and touched the city in ways that can still be seen today This is the history of Berlin's railway stations the people that used them and the way the city was shaped by them **Lost Berlin** Susanne Keegan, 1979 Among The Dead Cities A. C. Grayling, 2009-05-26 In Among the Dead Cities the acclaimed philosopher A C Grayling asks the provocative question how would the Allies have fared if judged by the standards of the Nuremberg Trials Arguing persuasively that the victor nations have never had to consider the morality of their policies during World War II he offers a powerful moral re examination of the Allied bombing campaigns against civilians in Germany and Japan in the light of principles enshrined in the post war conventions on human rights and the laws of war Grayling begins by narrating the Royal Air Force's and U S Army Air Force's dramatic and dangerous missions over Germany and Japan between 1942 and 1945 Through the eyes of survivors he describes the terrifying experience on the ground as bombs created inferno and devastation among often unprepared men women and children He examines the mindset and thought process of those who planned the campaigns in the heat and pressure of war and faced with a ruthless enemy Grayling chronicles the voices that though in the minority loudly opposed attacks on civilians exploring in detail whether the bombings ever achieved their goal of denting the will to wage war Based on the facts and evidence he makes a meticulous case for and one against civilian bombing and only then offers his own judgment Acknowledging that they in no way equated to the death and destruction for which Nazi and Japanese aggression was responsible he nonetheless concludes that the bombing campaigns were morally indefensible and more that accepting responsibility even six decades later is both a historical necessity and a moral imperative The lost German U-boat Herman Mertens, 2023-03-08 A secret Second World War mission with two German submarines bound for South America falls into disarray when one of the subs runs aground on a deserted island in the Atlantic Ocean The crew hide the boat under foliage but also leave the top secret cargo on board The other sub heads back towards Europe but soon runs into trouble Many years later thirteen young men recent school graduates decide to buy a boat and after long

preparation and practice set off on the adventure of a lifetime After night spent partying with some young women on a desert island they come across the hidden sub and decide to investigate From that moment on their lives change and their carefree adventure leads them into real danger *The Lost One* Stephen D. Youngkin,2005-09-30 The first full biography of this major actor draws upon more than 300 interviews including conversations with directors Fritz Lang Alfred Hitchcock Billy Wilder John Huston Frank Capra and Rouben Mamoulian who speak candidly about Lorre both the man and the actor

Views of Berlin KIRCHHOFF,2013-11-11 **Berlin on the Brink** Daniel F. Harrington,2012-06-24 The Berlin blockade brought former allies to the brink of war Britain France the United States and the Soviet Union defeated and began their occupation of Germany in 1945 and within a few years the Soviets and their Western partners were jockeying for control of their former foe Attempting to thwart the Allied powers plans to create a unified West German government the Soviets blocked rail and road access to the western sectors of Berlin in June 1948 With no other means of delivering food and supplies to the German people under their protection the Allies organized the Berlin airlift In *Berlin on the Brink The Blockade the Airlift and the Cold War* Daniel F Harrington examines the Berlin question from its origin in wartime plans for the occupation of Germany through the Paris Council of Foreign Ministers meeting in 1949 Harrington draws on previously untapped archival sources to challenge standard accounts of the postwar division of Germany the origins of the blockade the original purpose of the airlift and the leadership of President Harry S Truman While thoroughly examining four power diplomacy Harrington demonstrates how the ingenuity and hard work of the people at the bottom pilots mechanics and Berliners were more vital to the airlift s success than decisions from the top Harrington also explores the effects of the crisis on the 1948 presidential election and on debates about the custody and use of atomic weapons *Berlin on the Brink* is a fresh comprehensive analysis that reshapes our understanding of a critical event of cold war history **Lost Voices** Sophia M. Connell,Frederique Janssen-Lauret,2023-09-12 This book aims to redress the balance in the field of Contemporary Philosophy considered predominantly male by highlighting the philosophical achievements of various female figures during the period 1870 1970 Contemporary Philosophy is generally presented by its historians as a field founded entirely by men with no prominent female contributors Historical investigation of the development of contemporary analytic philosophy for example usually centres around Frege Russell and Wittgenstein with occasional ventures into Moore or the Vienna Circle Such accounts leave out vast swathes of the historical record from early 19th century to 20th century in particular the women including Christine Ladd Franklin Sophie Bryant E E C Jones Susan Stebbing Dorothy Wrinch Alice Ambrose Margaret MacDonald Martha Kneale Ruth Barcan Marcus and Ayda Ignez Arruda publishing on themes central to analytic philosophy logic language realism and relations It is noteworthy that this pattern in historiography is not unique to one strand of philosophy or one part of the world but re appears again and again In the continental tradition the development of Schopenhauer s philosophy leaves out significant contributions of women such as Olga Pl macher The chapters in this book

examine central themes from the perspective of female philosophers to provide a fuller picture of Philosophy of this period This volume will be a great resource for academics researchers and advanced students of Philosophy and Women s Studies and for everyone interested in the contribution of women philosophers It was originally published in the British Journal for the History of Philosophy Berlin Charles Werner Haxthausen, Heidrun Suhr, 1990 Essays discuss how Berlin and its culture have been portrayed in literature poetry film cabaret and the visual arts *lost in space* Eckhard Feddersen, Insa Lüdtkke, 2014-09-05 Dementia presents immense challenges both for individuals as well as for society as a whole More than 35 million people all over the world currently live with dementia a number that is expected to double by 2050 This also has implications for architecture and urban planning because dementia often affects people s sense of orientation and their ability to perceive space How can homes apartments public buildings outdoor spaces neighbourhoods and cities as well as environments and infrastructure be designed to meet the needs of people with dementia as well as those of their caregivers And can a consideration of the problems of dementia lead to a better understanding of space that can improve architecture and the built environment for us all This book addresses these and other questions in a series of professional essays that examine the specific requirements for different disciplines In addition international case study projects illustrate the breadth of current actual solutions The book is intended as a guide for all those involved in the design and planning process architects interior designers engineers town planners local authorities and clients and as a reader for the users themselves for people with dementia their family and friends and all those in their social environment
