Immortality and the Philosophy of Death Michael Cholbi,2015-12-02 Death comes for us all eventually Philosophers have long been perplexed by how we ought to feel about death Many people fear death and believe that death is bad for the person who dies But is death bad for us and if so how is its badness best explained If we do not survive death if death is simply a state of nothingness how can death be bad for us If death is bad for us do we have good reason to live as long as possible Would an immortal life really be a good human life or would even an immortal life eventually become tedious and make us long for mortality This volume presents fourteen philosophical essays that examine our attitudes toward mortality and immortality The topics addressed have become more urgent as scientists attempt to extend the human lifespan perhaps even indefinitely This book invites the reader to critically appraise his or her own attitudes toward death and immortality by exploring the ethical metaphysical and psychological complexities associated with these issues

Lovers in Essence Sharon Krishek,2022 Romantic love is a defining phenomenon in human existence and an object of heightened interest for literature art popular culture and psychology But what is romantic love and why is it typically experienced as so significant to our existence Using central ideas from the philosophy of S ren Kierkegaard as well as engaging with contemporary discussions in the philosophy of love this book explores the nature of romantic love and

philosophically substantiates its meaningfulness to an individual's life. It does so by developing a connection between love and selfhood here explained in terms of one's distinct individuality. To be a self, it is claimed, is to possess a name that is an individual essence. Further, the book argues, it is when we love that we regard people by their names; we respond to who they truly are. Accordingly, the idea anchoring the book is that love is a correspondence between essences: if Jane loves Edward, she responds to him being who he is by virtue of her being who she is. The conception of being thus correspondent has important implications as to the moral and spiritual value of romantic love. Relying on Kierkegaard's analysis of the self, of faith, and of love—even if sometimes in a way that departs from Kierkegaard's explicit position—the book explores these implications. By doing this, it construes romantic love as a desirable phenomenon, emotionally, morally, and spiritually.

A Modern Relation of Theology and Science Assisted by Emergence and Kenosis Bradford McCall, 2018-02-28. How should we attempt to understand the relationship between theology and science in the twenty-first century? In this book, I will attempt to answer this question by examining several previous attempts to classify this relationship. I also develop my personal view of the relation thereafter, discussing some Catholic contributions to this project and then revisiting some of my previously published material, highlighting the role of panentheism therein and noting an emergent implication from the literature: the resultant possibilities for God—an implication that creates space for a broadly relational perspective of the process of emergence. These movements allow me to argue that kenosis and emergence can add to the discussion of understanding the theology and science relationship. Herein, I advocate a monistic process-based view of the overlapping relationship between theology and science.

Relational Transactional Analysis Heather Fowlie, Charlotte Sills, 2018-06-14. Through different voices and styles of contributions, including papers, edited talks, and panel discussion, this collection explores and applies the principles of relational transactional analysis. It sets them in social, cultural, and political contexts and considers a number of important implications of this particular relational turn in psychotherapy. The book advances relational transactional analyses and, in doing so, reflects the creativity and vibrancy of contemporary TA. The editors have skilfully brought together different generations of TA practitioners in an accessible and stimulating volume. I commend the editors and highly recommend the book. Dr Keith Tudor, author of a number of books and co-author of the article 'Co-creative transactional analysis in the Transactional Analysis Journal'. He is Associate Professor, Auckland University of Technology, Auckland, Aotearoa, New Zealand.

Addresses by Henry Drummond Henry Drummond, 1900. What does true love look like practically? How do I rest my soul and obtain joy? What exactly should I be seeking in this life? Why does doubt haunt me? Henry Drummond answers these questions and many more in his *Addresses*. He guides you through several topics, providing clear points along the way by pulling from the Bible and his experiences. Find answers to your questions and refreshment through the Holy Scriptures.

The Reason God Made the World Jason Dollar, 2013-09. *The Reason God Made the World* is an intense and accessible view into the mind and heart of Jonathan Edwards (1703–1758). Edwards was one of America's most prolific thinkers and most

cherished pastors However his writings are often difficult for modern readers to process In *The Reason God Made the World* Edwards language has been updated for modern English readers Included are three of Edwards most well known sermons and perhaps his most powerful theological work *The End for Which God Created the World* Updating the language to modern English allows readers to focus on the content of Edwards message without getting lost in a tangle of archaic sentences and paragraphs Readers will feel the weight of the glory of God on every page and will be moved to see Christ Jesus high and lifted up Worship will most likely be the result of soaking in these updated works
