Brooks,2017-05-15 The relation between procreation and authorship between reproduction and publication has a long history indeed that relationship may well be the very foundation of history itself The essays in this volume bring into focus a remarkably important and complex phase of this long history In this volume some of the most renowned scholars in the field persuasively demonstrate that during the early modern period the awkward incomplete transition from manuscript to print brought on by the invention of the printing press temporarily exposed and disturbed the epistemic foundations of English culture As a result of this cultural upheaval the discursive field of parenting was profoundly transformed Through an examination of the literature of the period this volume illuminates how many important conceptual systems related to gender sexuality human reproduction legitimacy maternity kinship paternity dynasty inheritance and patriarchal authority came to be grounded in a range of anxieties and concerns directly linked to an emergent publishing industry and book trade In exploring a wide spectrum of historical and cultural artifacts produced during the convergence of human and mechanical reproduction of parenting and printing these essays necessarily bring together two of the most vital critical paradigms available to scholars today gender studies and the history of the book Not only does this rare interdisciplinary coupling generate fresh and exciting insights into the literary and cultural production of the early modern period but it also greatly enriches the two critical paradigms themselves

### **Harold Innis's History of Communications**

William J. Buxton,Michael R. Cheney,Paul Heyer,2014-12-18 For decades media historians have heard of Harold Innis s unpublished manuscript exploring the history of communications but very few have had an opportunity to see it In this volume editors and Innis scholars William J Buxton Michael R Cheney and Paul Heyer make widely accessible for the first time three core chapters from the legendary Innis manuscript Here Innis 1894 1952 examines the development of paper and printing from antiquity in Asia through to 16th century Europe He demonstrates how the paper printing nexus intersected with a broad range of other phenomena including administrative structures geopolitics militarism public opinion aesthetics cultural diffusion religion education reception production processes technology labor relations and commerce as well as the lives of visionary figures Buxton Cheney and Heyer knit the chapters into a cohesive narrative and help readers navigate Innis s observations by summarizing the heavily detailed factual material that peppered the unpublished manuscript They provide further context for Innis s arguments by adding annotations references and pertinent citations to his other writings The end result is both a testament to Innis s status as a canonical figure in the study of communication and a surprisingly relevant contribution to how we might think about the current sea change in all aspects of social cultural political and economic life stemming from the global shift to digital communication
