Scholarly Research in Music Sang-Hie

Lee, 2022-04-28 *Scholarly Research in Music Shared and Disciplinary Specific Practices Second Edition* offers a comprehensive and detailed guide to engaging in research in all disciplines of music. This second edition continues to provide the foundational principles of research for all musicians including performers, theorists, composers, conductors, music educators, and musicologists. It strengthens the core pedagogical framework of the first edition by offering updated guidance on available technologies, methodologies, and materials. Driven by the rapidly shifting research paradigms within music, sixteen contributors expand the already broad scope of the book with new chapters on research in today's library, neurophenomenology in music, and self-efficacy in music performance, as well as new sections in chapters on philosophy, historical research, social science research, and statistics. Introducing research as a friendly and accessible process, the book engages students in brainstorming a topic, asking pertinent questions, systematically collecting relevant information, analyzing and synthesizing the information, and designing a cohesive research plan to conduct original research. Detailing the methodologies and techniques of both conventional and innovative approaches to music research, *Scholarly Research in Music* provides an essential grounding for all kinds of music researchers. *Inquiry in Music Education* Hildegard C. Froehlich, Carol Frierson-Campbell, Debbie Ann Rohwer, Marie McCarthy, Darryl A. Coan, 2013. Provides an introduction to research and scholarship in music education. Following the legacy begun by Rainbow and Froehlich in *Research in Music Education* published in 1987, the objectives of this book are: To expand what is meant by music education and research; To help students find their niche in those definitions; and To teach tangible skills that are useful for music educators with diverse instructional goals and career aspirations. Higher Music Performance Education as taught and learned in universities and conservatoires in Europe is undergoing transformation. Since the nineteenth century the master apprentice pedagogical model has dominated creating a learning environment that emphasises the development of technical skills rather than critical and creative faculties. This book contributes to the renewal of this field by being the first to address the potential of artistic research in developing student centred approaches and greater student autonomy. This potential is demonstrated in chapters illustrating artistic research projects that are embedded within higher music education courses across Europe with examples ranging from instrumental tuition and ensemble work to the development of professional employability skills and inclusive practices. Bringing together diverse and experienced voices working within Higher Music Education but often also as professional performers, this edited collection pairs critical reflection with artistic insight to present new approaches to curricula for teaching interpretation and performance. It calls for greater collaboration between Higher Education and professional music institutions to create closer bonds with music industries and thereby improve students' career opportunities. *Teaching Music Performance in Higher Education* will appeal to scholars, performers, teachers but also students whose interests centre on innovative practices in conservatoires and music departments.

Philosophy of Music Education Challenged: Heideggerian Inspirations Frederik Pio, Øivind Varkøy, 2014-10-20. This volume offers key insights into the crisis of legitimization that music as a subject of arts education seems to be in. Music as an educational subject is under intense pressure both economically due to the reduction of education budgets as well as due to a loss of status with policy makers. The contributions in this book illuminate Martin Heidegger's thinking as a highly cogent theoretical framework for understanding the nature and depth of this crisis. The contributors explore from various angles the relationship between the pressure on music education and the foundations of our technical and rationalized modern society and lead the way on the indispensable first steps towards reconnecting the cultural practices of education with music and its valuable contributions to personal development.
