*The Myth of Home Ownership* J. Kemeny, 2025-11-18 Originally published in 1981 in this controversial study Dr Kemeny aims to show that owner occupation is not an inherently superior form of housing tenure to renting He questions the overwhelming emphasis upon owner occupation in English speaking countries as reflected by most politicians and many academics and argues that the deep emotional commitment to home ownership has prevented both the objective analysis of housing tenure and the emergence of environmental policies that maximise choice In the first part of the book home ownership is placed in comparative perspective through a critical examination of its supposed advantages such as security of tenure and a discussion of its wider disadvantages notably its exacerbation of housing inequalities and the privatizing effect which it has upon consumption patterns urban structure and social welfare The second part is a detailed consideration of three contrasting societies Australia a home owning society Sweden where cost renting is widely available and Britain where public renting and home ownership are maintained in uneasy compromise In conclusion Dr Kemeny argues that English speaking countries should abandon their one sided policies and aim to develop real choice of tenure in their housing systems Today it can be read in its historical context

*Housing Markets and Household Behavior in Japan* Miki Seko, 2019-05-08 This book addresses essential questions about housing by building theoretical models based on various real world problems in Japan and testing these models using econometric methods Almost all related empirical analyses use Japanese household longitudinal data Accordingly the author analyzes whole aspects of the data based on an understanding of the actual situation theory and empirical analysis to directly derive a vision of a future housing policy Why are houses expensive and difficult to obtain in Japan Why do people have to live in small houses Why do people not relocate frequently Why is the earthquake insurance subscription rate so low particularly in an earthquake prone country such as Japan even after such a catastrophic event as the Great East Japan Earthquake of 2011 How do existing housing finance and tax policies or laws relate to these real world problems To answer these questions the book clarifies the unique criteria that characterize housing problems in Japan and presents a vision of future housing policy The short answer is that existing housing finance policy that adopts criteria based on the floor space of houses creates incentives for people to live in even smaller houses Furthermore the Japan Rental Act which affects people renting homes reduces residential mobility The incidence of underinsurance against earthquake risk is a result of earthquake insurance market imperfections such as crude and rough geographical risk ratings The book elaborates on these factors in four parts and will be of interest to all readers who are concerned with the housing market and household behavior in Japan

economic processes social policy development ideology and identity and intergenerational relations The volume offers a greater understanding of the characteristics of post growth society changing demography economy and society in relation to housing It considers how a definitive shift to the post growth period has produced new housing issues including risks as well as opportunities Through analysis of the impact on five different areas post crisis economy urban and regional variations young adults and housing pathways fertility and housing and ageing and housing wealth the authors use policy and institutions as overarching analytical tools to examine the contemporary housing issues in a post growth context It also considers any relevance from the Japanese experiences in the wider regional and global context This original book will be of great interest to academics and students as well as policy makers and practitioners internationally in the fields of housing studies urban studies social policy sociology political economy comparative analysis and East Asian Studies     Housing Partnerships Andrew Caplin,1997 Housing Partnerships A New Approach to a Market at a Crossroads provides the blueprints of the Housing Partnership structure and the new opportunities it furnishes home owners while explaining the economics behind the housing and mortgage markets and the financial risks in owning a home     Housing Carol B.
