Rethinking Security In East Asia Identity Power And Efficiency:

Rethinking Security in East Asia J. J. Suh, Peter J. Katzenstein, Allen Carlson, 2004 Is East Asia heading towards war This text makes a case for a new theoretical approach called analytical eclecticism by the authors to the study of Asian security *Security Politics in the Asia-Pacific* William T. Tow, 2009-10-15 In this book leading experts present research on the evolution of key issues in Asian security **ASEAN and the Institutionalization of East Asia** Ralf Emmers, 2011-09-28 This book examines the evolving multilateral security arrangements in East Asia with a focus on the role of the Association of Southeast Asian Nations ASEAN It explores the function and relevance of ASEAN in East Asia s emerging institutional security landscape These issues have direct implications for the future of the ASEAN Security Community the relevance of the ASEAN cooperative model to wider regional arrangements and finally for the further institutionalization of great power relations within these multilateral structures The book highlights ASEAN s successes and shortcomings It also considers ASEAN led institutions in the wider region and goes on to analyse alternative approaches to regionalism including the China Japan South Korea Trilateral Summit Overall it assesses how the various initiatives are likely to develop concluding that ASEAN despite its shortcomings is likely to continue to play a key role **Changing Security Dynamics in East Asia** Elena Atanassova-Cornelis, Frans-Paul van der Putten, 2016-04-30 This original and detailed collection explores how regional actors deal with uncertainties that are inherent to the current geopolitical situation in East Asia The contributors collectively demonstrate that strategic uncertainty has become a major factor in the shaping of the security order in East Asia **Peace and Security in the Asia-Pacific** Sorpong Peou, 2010-04-15 Demonstrating that none of the various perspectives under review has emerged as the clear winner in the struggle for theoretical hegemony in security studies this book shows that eclectic perspectives like democratic realist institutionalism can better explain peace and security in the Asian Pacific The Asian Pacific has emerged as one of the most important regions in the world causing scholars to pay increased attention to the various challenges old and new to peace and security there Peace and Security in the Asia Pacific Theory and Practice is a comprehensive critical review of the established theoretical perspectives relevant to contemporary peace and security studies in the light of recent experiences Illuminating ongoing debates in the field the book covers some 20 theoretical perspectives on peace and security in the Asian Pacific including realist liberal socialist peace and human security constructivist feminist and nontraditional security studies The first section of the book discusses perspectives in realist security studies the second part covers perspectives critical of realism The author s goal is to assess whether any of the perspectives found in nonrealist security studies are capable of undermining realism His conclusion is that each theoretical perspective has its strengths and weaknesses leaving eclecticism as the best way to understand the region s dynamics **Asia's New Institutional Architecture** Vinod K. Aggarwal, Min Gyo Koo, 2008-02-04 Can regional and interregional mechanisms better institutionalize the creasing complexity of economic and security ties among states in Nor

east Southeast and South Asia As the international state system undergoes dramatic changes in both security and trade relations in the wake of the Cold War's end the Asian financial crisis and the attacks of September 11 2001 this question is now of critical importance to both academics and policymakers Still little research has been done to integrate the analysis of both regional security and economic dynamics within a broader context that will give us theoretically informed policy insights Indeed when we began our background research on the origin and evolution of Asia's institutional architecture in trade and security we found that many scholars had focused on individual subregions whether Northeast Southeast or South Asia In some cases scholars examined links between Northeast and Southeast Asia and the literature often refers to these two subregions collectively as Asia artificially bracketing South Asia Of course we are aware that as products of culture economics history and politics the boundaries of geographic regions change over time Yet the rapid rise of India and its increasing links to East Asia especially those formed in the early 1990s suggest that it would be fruitful to examine both developments within each subregion as well as links across subregions

Asian Geopolitics and the US-China Rivalry Felix Heiduk, 2021-07-22 This book analyses the ways in which foreign policy actors in Asia have responded to the emerging great power conflict between the US and the People's Republic of China focusing on medium and small states across the Indo Pacific The book offers a much needed counterpoint to existing analyses on the Indo Pacific and China's BRI and presents a new perspective by examining how great power politics are locally reinterpreted conditioned or at times even contested It illustrates the policy level challenges which the US-China rivalry poses for established political and economic practices and outlines how these challenges can be best addressed by smaller states and their societies A timely assessment of the power play in the Indo Pacific with the angle of Sino-American rivalry this book makes an important contribution to the study of Political Science International Relations Asian Studies and Security Studies Chapter 10 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non-Commercial No Derivatives CC BY-NC-ND 4.0 license

New Thinking about the Taiwan Issue Jean-Marc F. Blanchard, Dennis V. Hickey, 2012-06-12 The Taiwan question has long been considered one of the most complicated and explosive issues in global politics In recent years however relations between Taiwan and the Chinese mainland have improved substantially to the surprise of many In this ground-breaking collection distinguished contributors from the US Asia and Europe seek to go beyond the standard recitation of facts that often characterizes studies focusing on the Beijing-Taipei dyad Rather they employ a variety of theories as well as both quantitative and qualitative methodologies to analyze the ebbs and flows of the Taiwan issue Their discussions clearly illuminate why there is a Taiwan Problem why conflict did not escalate to war between 2000 and 2008 and why cross-strait relations improved after 2008 The book further reveals the limits of realism as a device to gain traction into the Taiwan issue demonstrates the importance of taking into account domestic political variables and shows how theory

can be used to advance the cause of better China Taiwan relations and to analyze the potential for future conflict over Taiwan New Thinking about the Taiwan Issue is essential reading not only for students scholars and practitioners with an interest in studying relations across the Taiwan Strait but also for any reader interested in economics international relations comparative politics or political theory *US-China Competition and the South China Sea Disputes* Huiyun Feng,Kai He,2018-05-11 Traditionally the South China Sea SCS issue was not on the negotiation table between the United States and China However the tensions between the United States and China over the SCS have gradually simmered up to a strategic level Why and how did the SCS become a flashpoint between the United States and China Will the United States and China really go to war over the SCS Why did China adopt an assertive policy towards the South China Sea in the 2000s What will regional actors do in the face of this new normal of competition between China and the United States Will multilateral institutions in the Asia Pacific alleviate the potential conflicts over the SCS disputes How will US Chinese competition in the SCS shape the dynamics of Asian security This edited book addresses these questions systematically and theoretically with contributions from leading scholars in the field of US China relations and Asian security from the United States Australia the United Kingdom and Singapore It elevates the analysis of the SCS disputes from maritime and legal issues to the strategic level between the United States and China **China, Oil and Global Politics** Philip Andrews-Speed,Roland Dannreuther,2011-05-12 This book provides a critical overview of how China s growing need for oil imports is shaping its international economic and diplomatic strategy and how this affects global political relations and behaviour It draws together the various dimensions of China s international energy strategy and provides insights into the impact of this on China s growing presence across the world *Cambodia's China Strategy* Chanborey Cheunboran,2021-06-21 This book explores the tensions within Cambodia s foreign policy between a tight alignment with China on the one hand and Cambodia s commitment to the Association of the Southeast Asian Nations ASEAN as well as its delicate foreign policy diversification towards other major powers on the other hand It traces the long history of Cambodia s quest for survival from its bigger and historically antagonistic neighbours the Thai and the Vietnamese and its struggle for security and independence from the two neighbours and external major powers particularly the United States and China It discusses Cambodia s geopolitical predicaments deriving from its location of being sandwiched between powerful neighbours and limited strategic options available for the Kingdom The book also assesses recent developments in Cambodia s relations with its neighbours and their implications for Cambodia s increasingly tight alignment with China in recent years It considers the extent to which the ruling regime in Cambodia depends on strong relations with China for its legitimacy and survival and argues that there are risks and danger for Cambodia in moving towards an increasingly tight alignment with China *Oxford Handbook of the International Relations of Asia* Saadia M. Pekkanen,John Ravenhill,Rosemary Foot,2014 This Handbook examines the theory and practice of international relations in Asia Building on an investigation of how various theoretical approaches to

international relations can elucidate Asia's empirical realities authors examine the foreign relations and policies of major countries or sets of countries

The Oxford Handbook of the International Relations of Asia Saadia M. Pekkanen, John Ravenhill, Rosemary Foot, 2014-08-19 In the past quarter century the importance of Asia in international relations has grown exponentially This Handbook gathers the most important scholars in the field of Asia's international relations to address this momentous change in world politics The editors and contributors focus on three basic themes assessing appropriate theories for explaining the evolution of the international relations of Asian countries within the region and with the rest of the world tracing the recent history of Asia in world politics and focusing on emerging trends The Handbook brings readers the latest scholarship on the bilateral regional and global relations of Asian countries in the fields of political economy national security and human security Comprehensive in theme breadth and methodology this Handbook is a timely addition to the existing literature on the changes currently underway in Asian countries that promise to have significant implications for world politics

One Alliance, Two Lenses Gi-Wook Shin, 2010-01-27 Using newly collected data from American and Korean newspapers this book examines relations between the United States and South Korea from 1992 to 2003 a particularly contentious period in the history of the two allies

Cooperative Security in the Asia-Pacific Jürgen Haacke, Noel Morada, 2010-01-21 This book offers the most comprehensive analysis yet of the ASEAN Regional Forum ARF which remains the foremost dialogue forum for the promotion of cooperative security in the Asia Pacific Contributors focus on the perspectives and roles of the key players in the ARF ASEAN the United States China Japan and Australia and discuss to what extent these participants have shaped the Forum's institutional development and affected its achievements and prospects against the backdrop of the evolving regional security architecture They also examine in depth how participants have used the Forum to respond to a range of important transnational security issues and challenges including terrorism and maritime security as well as disaster relief This work also explores how despite the difficulties in reaching a new consensus regarding the collective pursuit of preventive diplomacy some activist participants have succeeded in bringing about a notable albeit incipient practical turn in the ARF's security cooperation This book will appeal to students of South East Asian Politics Asian Security Studies and International Relations in general

Critical security in the Asia-Pacific Anthony Burke, Matt McDonald, 2021-06-15 In the wake of 9/11 the Asian crisis and the 2004 tsunami traditional analytical frameworks are increasingly unable to explain how individuals and communities are rendered insecure or advance individual global or environmental security In the Asia Pacific the accepted wisdom of realism has meant that analyses rarely move beyond the statist militarist and exclusionary assumptions that underpin traditional realpolitik This innovative new book challenges these limitations and addresses the missing problems people and vulnerabilities of the Asia Pacific region It also turns a critical eye on traditional interstate strategic dynamics Critical security in the Asia Pacific applies both a critical theoretical approach that interrogates the deeper assumptions underpinning security discourses and a human centred policy approach that

focuses on the security welfare and emancipation of individuals and communities Leading Asia Pacific researchers combine to apply these frameworks to the most pressing issues in the region from the Korean peninsula to environmental change Indonesian conflict the war on terror and the plight of refugees The result is a sophisticated and accessible account of often neglected realities of marginalization in the region and a compelling argument for the empowerment and security of the most vulnerable

China Joins Global Governance Mingjiang Li, 2012-09-28 For many years political leaders and analysts have debated the impacts of China's rise on the stability of the existing international system International observers have also debated whether China would be a status quo power or a revisionist power and whether China would observe the rules and regulations of international institutions and regimes China Joins Global Governance Cooperation and Contentions edited by Mingjiang Li provides an insightful contribution to our understanding of these issues through a specific angle China's role in global governance The contributors to this volume address such questions as how has China dealt with major global institutions and regimes How has China helped address various global challenges How is China's rise changing the international approach to global governance The contributors cover a broad range of issues including China's vision and strategy in global multilateralism China's role in global economic financial trade governance China's policy towards the global environment and international development and China's approaches to various global security issues such as nuclear disarmament and nonproliferation China Joins Global Governance is an essential text in understanding the future trajectory of China's international policy

The ASEAN Regional Security Partnership Angela Pennisi di Floristella, 2015-08-25 ASEAN's role as a security provider remains largely a matter of scholarly debate Through the lens of the concept of regional security partnership this book uncovers a more nuanced understanding of ASEAN capacity highlighting both its merits and fragilities in coping with traditional and emerging security problems

Regional Co-operation and Its Enemies in Northeast Asia Edward Friedman, Sung Chull Kim, 2007-01-24 Examining the prospects for building a regional community in Northeast Asia this book considers the foreign policies of the individual states as well as the impact of domestic politics on the regionalist agenda It outlines the emerging Northeast Asian community and the domestic requisites for its evolution and realization and puts it in context by comparing the emerging community with Southeast Asia The book investigates the attitudes of the key powers including China Japan South Korea North Korea Russia and the US towards the ideal of greater regional cooperation with particular emphasis on the implications of domestic factors in each country for regional dynamics It explores the North Korean nuclear crisis the continuing tensions over the Taiwan Straits the impact of Sino Japanese rivalry the shift in stance of South Korea towards North Korea since 2001 and its implications for its relationship with the US and Putin's attempts to strengthen Russian influence in the region It concludes by identifying the foremost dangers that risk obstructing greater regional cooperation particularly the China Japan rivalry nationalist sentiments territorial disputes and energy competition
