United States. Congress. House. Committee on Government Operations, 1965 *Religion Vs. Science* Elaine Howard Ecklund, Christopher P. Scheitle, 2018 At the end of a five year journey to find out what religious Americans think about science Ecklund and Scheitle emerge with the real story of the relationship between science and religion in American culture Based on the most comprehensive survey ever done representing a range of religious traditions and faith positions Religion vs Science is a story that is more nuanced and complex than the media and pundits would lead us to believe The way religious Americans approach science is shaped by two fundamental questions What does science mean for the existence and activity of God What does science mean for the sacredness of humanity How these questions play out as individual believers think about science both challenges stereotypes and highlights the real tensions between religion and science Ecklund and Scheitle interrogate the widespread myths that religious people dislike science and scientists and deny scientific theories Religion vs Science is a definitive statement on a timely popular subject Rather than a highly conceptual approach to historical debates philosophies or personal opinions Ecklund and Scheitle give readers a facts on the ground empirical look at what religious Americans really understand and think about science The American Academic Profession Stephen Steinberg, 2017-11-30 This book covers well the issues and problems of the U S academic profession in the second half of the twentieth century Contemporary Science The tale of the American academic profession that large company of men and women unprecedented in its size and diversity needs to be written A large historical literature on America s colleges and universities exists but much of it is unashamedly hagiographic On the other hand more critical works see American universities as being in dire need of massive reform This charge is not sustained by the contributors to The American Academic Profession who hope to shatter the code of silence that passes for discretion by focusing on the forces that have conspired to create the American academic profession Graubard includes contributions from important scholars around the world How the Academic Profession is Changing by Arthur Levine Small Worlds Different Worlds The Uniqueness and Troubles of American Academic Professions by Burton R Clark The Elusive Academic Profession Complexity and Change by Francis Oakley Uncertainties in the Changing Academic Profession by Walter E Massey Stewards of Opportunity America s Public Community Colleges by Patrick M Callan Public Universities as Academic Workplaces by Patricia J Gumpert Survival of the Fittest Postgraduate Education and the Professoriate at the Fin de Sicle by R M Douglas Reflections on the Culture Wars by Eugene Goodheart A Blow Is Like an Instrument by Charles Bernstein The Science Wars and the Future of the American Academic Profession by Jay A Labinger The Scientist as Academic by Cheryl B Leggon The Place of Knowledge in the American Academic Profession by Sheldon Rothblatt Border Crossings Organizational Boundaries and Challenges to the American Professoriate by Theodore R Mitchell The Development of Information Technology in American Higher Education by Martin Trow and An International Academic Crisis The American Professoriate in Comparative Perspective by Philip G Altbach The American Academic Profession is not sanguine about what is currently happening in higher education or what it

imagines the future portends It simply asks the question Can a society truly understand its universities and colleges when it has moved too quickly from uncritical admiration to uniformed and ungenerous complaint This volume intends to dispel some long persistent myths in favor of objective truth It is a must for anyone interested in academic problems for those who work in higher education and for everyone interested in American ideas traditions and social and intellectual history Stephen R Graubard is editor of the American Academy of Arts and Sciences and its journal Daedalus and professor of history emeritus at Brown University

Conflicts Between the Federal Research Programs and the Nation's Goals for the Higher Education United States. Congress. House. Committee on Government Operations. Restivo,2005 Emphasizing an interdisciplinary and international coverage of the functions and effects of science and technology in society and culture Science Technology and Society B contains over 130 A to Z signed articles written by major scholars and experts from academic and scientific institutions and institutes worldwide Each article is accompanied by a selected bibliography Other features include extensive cross referencing throughout a directory of contributors and an extensive topical index **Catastrophes and Conflicts**

Klaus Gottstein,2018-12-17 First published in 1999 this book describes what the International community of scientific institutions could do to reverse this trend by pooling its know how and resources in International and interdisciplinary working groups and standing committees by preparing options for action and by standing the possibilities for overcoming the political and economic obstacles to the implementation of expert advice The reasons are given why neighboring groups of people sooner or later start fighting each other unless certain conditions are fulfilled These conditions are enumerated Historical examples are presented Since lack of mutual trust often based on inherited enemy images is at the roots of many conflicts is shown how trust among former opponents can be created by working on joint projects particularly when both sides are threatened by the same danger In previous history this danger was often a common enemy Today we must learn that all of mankind is threatened by environmental and other global problems which can only be mastered by joint efforts forgetting the enmities of earlier generations Furthermore it is explained that many catastrophes could be avoided if risks were properly assessed and taken seriously and necessary precautions not avoided for financial reasons just hoping for the best

International Perspectives on Science, Culture, and Belief Fern Elsdon-Baker,Stephen H. Jones,James Riley,2025-08-26 Public understanding of the relationship between science and religion is dominated by US and UK perspectives and research that has been carried out in Western Protestant Anglophone contexts This has enabled a culturally specific narrative of conflict to dominate public discussions of evolution science and religion obscuring the varied cultural contexts and complexities within which engagement with science takes place and the growing influence of non religious identities and diverse forms of spirituality Representing one of the most wide ranging and original contributions to the emerging body of research on the relationship between religion non religion and science in society this innovative and timely

collection revisits challenges and rethinks longstanding assumptions by decentring positions and perspectives that have until recently dominated discussions of science and belief Drawing on almost a decade of multidisciplinary research *International Perspectives on Science Culture and Belief From Complexity to Globality* brings together incisive global perspectives exploring the social and cultural drivers of the relationships between evolutionary science and belief Highlighting the natures and varieties of the interrelation between science and belief globally this volume addresses the relationships between science culture and belief from multiple disciplines methodologies and geographical contexts including South Asia Latin America Africa and Australia as well as Europe and North America This work has particular relevance in the increasingly polarised post pandemic world shining a light for the first time on the multifaceted interplay between social identities and cultural narratives in debates that are often about far more than the science The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

International Perspectives on Social Work and Political Conflict Joe Duffy,Jim Campbell,Carol Tosone,2019-10-21 *International Perspectives on Social Work and Political Conflict* provides an important basis for readers to recognise and understand the unique and specialist role that social workers have played and continue to play in international contexts of political conflict Social workers make an important contribution in these difficult and sometimes dangerous situations across all continents This book highlights the importance of social work in these very challenging contexts The first part of this book includes four chapters that summarise the existing knowledge base The second part focuses on a case study of Northern Ireland where for the first time a detailed examination of the social work role was completed which involved researching the views of social work practitioners managers and educators Part three then draws together international experts in the field who have written chapters on those regions where social workers have been dealing with long standing periods of political conflict At a time when violent conflagrations are currently a feature of many countries and regions across the continents of the world this book offers a critical view of the social work role in these contexts and should thus be considered essential reading for all social work academics students and professionals working in conflict affected societies

Proceedings of the 1st International Conference on Psychology and Health Issues (ICOPHI 2022) Izzanil Hidayati,Rizal Kurniawan,Rahmadiani Aulia,2023-08-14 This is an open access book We are now heading into the era of society 5 0 The era of society 5 0 was developed by Japanese Government to describe the integration between physical and virtual spaces that can solve social problems Many things in this era are run based on the concept of internet based big data technology that will

make human life easier The effect of this era will be felt in various aspects of our lives such as health education transportation industry etc If we look at Indonesia specifically Indonesia is currently still in the era of 4.0 It can be seen in various fields one of them is education field Education in Indonesia currently already uses online learning method However for the 5.0 era online learning method will use various technology based educational tools For this reason it is important for educators to not only use technology in teaching but also focus and put attention on student's character moral and discipline Although there are so many benefits and positive aspects we will feel in the era of 5.0 we also need to open our eyes to the negative aspects that may occur when students are exposed to too much technology The opportunity to get the freedom to access the internet and unlimited access of information can have negative impact on students such as game and social media addiction cyber bullying etc These problems can have an impact to student's mental health as we can find in several studies which say that internet addiction has a tendency to make a person apathetic addicted and PTSD Mental health is important because this kind of health is related to many aspects in human such as physical and cognitive functions One of interesting topics related to this issue is how human cognitive functions especially about the brain and nervous system in addiction and mental health issues which we called neuroscience For these reasons an international seminar entitled INTERNATIONAL CONFERENCE ON PSYCHOLOGY AND HEALTH ISSUES carries the theme advancement in health science and psychology for society 5.0

Social Work in Post-War and Political Conflict Areas Kristin Sonnenberg, Cinur Ghaderi, 2021-04-29

The book offers unique access to theoretical approaches and practical examples of international social work in the context of war and conflicts The reader gains knowledge about the competences and role of social work which contributes to mitigating the effects of war and conflict The book raises the question of how to connect international social work with local approaches and offers suggestions for a development of social work with respect to exchanging knowledge and experiences between the West and the East the Global North and the Global South It furthermore discusses the role of social work in reducing the problem of gender based violence and in the methods of peacebuilding processes in post war and post conflict societies
