Mapping Biology Knowledge K. Fisher, J.H. Wandersee, D.E. Moody, 2006-04-11 Mapping Biology Knowledge addresses two key topics in the context of biology promoting meaningful learning and knowledge mapping as a strategy for achieving this goal Meaning making and meaning building are examined from multiple perspectives throughout the book In many biology courses students become so mired in detail that they fail to grasp the big picture Various strategies are proposed for helping instructors focus on the big picture using the need to know principle to decide the level of detail students must have in a given situation The metacognitive tools described here serve as support systems for the mind creating an arena in which learners can operate on ideas They include concept maps cluster maps webs semantic networks and conceptual graphs These tools compared and contrasted in this book are also useful for building and assessing students content and cognitive skills The expanding role of computers in mapping biology knowledge is also explored **The Science Teacher** , 1992 Some issues are accompanied by a CD ROM on a selected topic **Missing the Meaning** A. Peacock, A. Cleghorn, 2004-02-20

Missing the Meaning investigates recent evidence that school text materials are more problematic than previously imagined. Difficulties with language illustrations design and cultural mismatch are highlighted and ways in which young students read books and electronic materials in classrooms are compared through contributions from researchers across five continents. The book suggests new ways to develop and use text so that the materials are better matched to the diverse needs of teachers and students. The implications of this collection are wide applying not only to teachers but to teacher educators, educational publishers, software developers and policy makers.

Experiencing Elementary Science Donald Neuman, 1993. By describing new learning and teaching theories in an applied experiential context, Neuman helps pre-service and practicing teachers make the difficult transition from theory to practice. Helps students learn to use the strategies that derive from the theory. Provides a thorough review of science content and includes model curriculums, lesson plans along with several mini units and one complete unit on sound. Provides examples, tips and strategies for preparing, planning and implementing science learning, planning and using integrated curriculum teaching across the curriculum, teaching thinking skills and higher order concepts, teaching students with special needs using new assessment and evaluation guidelines, working with parents, the community and with national science programs.

Teaching Elementary Science William K. Esler, Mary K. Esler, 1989.

How to Teach Elementary School Science Peter C. Gega, 1994. KEY BENEFIT: This book presents practical methods of how to teach science to elementary and early middle level learners. This volume includes the methods material from *Science in Elementary Education* Eighth Edition, excluding the activities and investigations segment. This book includes why science education is basic to children's schooling and explains the foundations that give it form and substance. It also includes the cluster of related teaching skills through the step-by-step descriptions and the use of numerous real-life examples in each chapter.

Strategies for Teaching Learners with Special Needs Edward A. Polloway, James R. Patton, Loretta Serna, 2005. This comprehensive non-categorical special education methods book retains the key features that have made it a bestseller within the special education field for more than 20 years. The authors give substantial coverage to generic methods and to all curricular content areas. In the new edition, increased emphasis is given to effective research-based teaching strategies that will enable students with special needs to be successful in any classroom environment: inclusive classrooms, resource and self-contained classrooms.
