Scientific Telepathy:

Clairvoyance and Occult Powers William Walker Atkinson, 2022-06-13 In *Clairvoyance and Occult Powers* William Walker Atkinson presents an intricate exploration of the metaphysical realms that lie beyond conventional perception. Written in a clear, engaging style characteristic of early 20th-century esotericism, Atkinson elucidates concepts such as clairvoyance, telepathy, and other psychic abilities, articulating them through a blend of rigorous theoretical framework and practical exercises. The book situates itself within the wider context of the New Thought Movement, advocating for a belief in the mind's power to shape reality while also addressing the spiritual implications of heightened consciousness and insight. Atkinson, a prominent figure in the New Thought philosophy, was instrumental in popularizing ideas about the power of the mind in various dimensions, including mental health, prosperity, and psychic development. His diverse background, including his work as a lawyer and publisher along with personal experiences in spiritualism, informed his keen insight into the hidden forces of human potential. This synthesis of intellectual rigor and mystical inquiry makes his work both timeless and relevant. Highly recommended for seekers of spiritual knowledge and personal empowerment, *Clairvoyance and Occult Powers* serves as both a foundational text for understanding psychic phenomena and a practical guide for those wishing to unlock their innate abilities. Atkinson's clear prose and insightful explorations invite readers to move beyond the ordinary and embrace the extraordinary dimensions of life.

Scientific Mythologies James A. Herrick, 2008-01-01 What does science have to do with science fiction? What does science fiction have to do with scientists? What does religion have to do with science and science fiction? In the spiritual vacuum of our post-Christian West, new mythologies continually arise. The sources of much religious speculation, however, may be surprising. Author James Herrick directs our attention to a wide range of scientists, filmmakers, science fiction writers, and religious philosophers and discovers there the role that science and science fiction have played in such mythmaking. From scientists such as Francis Bacon, Francis Crick, Carl Sagan, and Freeman Dyson to filmmakers such as George Lucas and Steven Spielberg to science fiction writers such as Olaf Stapledon, Sir Arthur C. Clarke, Robert Heinlein, and Isaac Asimov, Herrick finds a curious collusion of science with science fiction for promoting and justifying alternative spiritualities. The rise of these new mythologies, he argues, is no longer a curiosity at the edge of Western culture. This alchemy is catalyzing a religious vision of new gods, a new humanity, and alien races with superior intelligence and secret knowledge. This new mythology overshadows the realms of politics, science, and religion. Should we follow such visions? Does science endorse these mythologies? Are we being offered a spirituality superior to the Judeo-Christian tradition? This book will help you decide.

Develop your Occult Powers Swami Panchadasi, 2021-08-24 In preparing this series of lessons for students of Western lands I have been compelled to proceed along lines exactly opposite to those which I would have chosen had these lessons been for students in India This because of the diametrically opposite mental attitudes of the students of these two several

lands The student in India expects the teacher to state positively the principles involved and the methods whereby these principles may be manifested together with frequent illustrations generally in the nature of fables or parables serving to link the new knowledge to some already known thing The Hindu student never expects or demands anything in the nature of proof of the teachers statements of principle or method in fact he would regard it as an insult to the teacher to ask for the same Consequently he does not look for or ask specific instances or illustrations in the nature of scientific evidence or proof of the principles taught He may ask for more information but solely for the purpose of bringing out some point which he has not grasped but he avoids as a pestilence any question seeming to indicate argument doubt of what is being taught him or of the nature of a demand for proof or evidence The Western student on the other hand is accustomed to maintaining the skeptical attitude of mind the scientific attitude of doubt and demand for proof and the teacher so understands it Both are accustomed to illustrations bringing out the principles involved but these illustrations must not be fanciful or figurative they must be actual cases well authenticated and vouched for as evidence In short the Western teacher is expected to actually prove to his students his principles and methods before he may expect them to be accepted This of course not from any real doubt or suspicion of the veracity or ability of the teacher but merely because the Western mind expects to question and be questioned in this way in the process of teaching and learning Consequently in this series of lessons I have sought to follow the Western method rather than the Hindu So far as is possible I have avoided the flat positive statement of principles and methods and have sought to prove each step of the teaching Of course I have been compelled to assume the existence of certain fundamental principles in order to avoid long and technical metaphysical and philosophical discussions I have also had to content myself with the positive flat assertion of the existence of the Astral Plane Akashic Records Prana etc which are fundamental postulates of Hindu philosophy and occult science for these are established solely by the experience of those who are able to function on the higher planes themselves But beyond this I have sought to prove by direct and positive evidence adapted to the Western mind every step of my teaching and methods
