## **Scientific Application Of Baseline Observations Of Atmospheric Composition:**

*Scientific Application of Baseline Observations of Atmospheric Composition (SABOAC)* Dieter H. Ehhalt, Graeme Pearman, Ian Galbally, 1987 The Southern Hemisphere commands an increasing interest among atmospheric chemists. It has smaller and less industrialized continents than the Northern Hemisphere and thus enjoys lower emissions of anthropogenic and biogenic pollutants. As a consequence the concentrations of trace species are lower in the Southern Hemisphere giving rise to significant inter-hemispheric gradients. From an observation of the climatology of the various trace gas gradients important conclusions on the chemical lifetimes, the distribution of sources and transport of trace species can be derived. Thus it is only fitting that the CSIRO Division of Atmospheric Research, Aspendale, Australia hosted the Conference on the Scientific Application of Baseline Observations of Atmospheric Composition SABOAC. It was convened by Dr Graeme Pearman of the CSIRO and sponsored by the CSIRO and the Australian Bureau of Meteorology. Graeme Pearman and Ian Galbally of the CSIRO also agreed to serve as Guest Editors. The Conference was well attended and because of its location enjoyed an unusually large number of participants from the Southern Hemisphere. About 40 papers were presented with a large share of original contributions. At this point we would like to thank the reviewers who helped to maintain strict standards. The conference topics ranged from Nonreactive Gases, Reactive Gases, Transport, Particulates, Precipitation Chemistry to Radiation and Carbon dioxide. The present Proceedings do not quite maintain that sequence but partly reflect the order of receipt.
