Michael G. Moran, Debra Journet, 1985 This sourcebook demonstrates the vigorous work being done in the field of technical and scientific communication Collectively the essays offer researchers a basis from which to begin constructing the theoretical framework necessary for the study of technical communication The book begins with general concerns and progresses to particular applications The chapters comprising Part I outline larger theoretical perspectives from which to examine technical communication humanistic approaches to technical communication the history of technical communication communication theory and technical writing and the teaching of technical writing Part II examines the relationship of technical communication to traditional rhetorical concerns such as invention audience modes of organization and style Specific types of technical communication proposals reports and business correspondence among others are discussed in Part III The use of the computer oral presentations and specialized forms of technical communication are examined in Part IV The appendixes offer guides to textbooks and style manuals and an overview of the technical writing profession Technical Communication and the World Wide Web

Carol Lipson, Michael Day, 2005-05-06 Over the past decade the World Wide Web has dramatically changed the face of technical communication but the teaching of writing has thus far altered very little to accommodate this rapidly changing context Technical Communication and the World Wide Web offers substantial and broadly applicable strategies for teaching global communication issues affecting writing for the World Wide Web Editors Carol Lipson and Michael Day have brought together an exceptional group of experienced and well known teacher scholars to develop this unique volume addressing technical communication education The chapters here focus specifically on curriculum issues and the teaching of technical writing for the World Wide Web contributing a blend of theory and practice in proposing changes in curriculum and pedagogy Contributors offer classroom examples that teachers at all levels of experience can adapt for their own classes The volume provides comprehensive coverage of the technical communication curriculum from the two year level to the graduate level from service courses to degree programs This volume is an important and indispensable resource for technical writing educators and it will serve as an essential reference for curriculum and pedagogy development in technical communication programs *Marconi's Wireless and the Rhetoric of a New Technology*

Aaron A. Toscano, 2012-02-09 This book examines the discourse surrounding the wireless created by the Anglo Italian inventor Guglielmo Marconi The wireless excited early twentieth century audiences before it even became a viable black box technology The wireless adhered to modernist values speed efficiency militarization and progress Language

surrounding the wireless is a form of technical communication overlooked by today's practitioners. This book establishes a broader definition for technical communication by examining a selection of the discourse surrounding Marconi's wireless. The book's main themes are the following: 1. technical communication is all discourse surrounding technology; 2. the field of technical communication or technical writing should incorporate analyses of discourse surrounding technologies into its epistemology; 3. the wireless is a product of the society from which it comes, early twentieth-century Western civilization; and 4. the discourse surrounding the wireless is infused with tropes of progress, speed, efficiency, evolution, and ahistoricity.

Encyclopedia of Science and Technology Communication Susanna Hornig Priest, 2010-07-14. In the academic world, the term science communication refers both to a set of professions such as science journalism and public information work and to an interdisciplinary scholarly research specialization. Much of this research is aimed at improving our understanding of the best ways to communicate complex information, especially to people who are not scientists. Science communication specialists are concerned with giving people useful information about health, environment, and technology, as well as science itself. In order to do this, we also need to improve our understanding of how people think, form opinions, and process information. Additionally, professional practitioners in science communication are engaged in strategic and ethical decisions every day, such as: How should reporters cover the issue of climate change? Should the views of scientists who do not believe that climate change has been caused by human activity be included alongside the views of those who do, in order to give a balanced story, or does this mislead the public into thinking that both of these positions are equally accepted within the scientific community? The *Encyclopedia of Science and Technology Communication* provides information on the entire range of interrelated issues in this interdisciplinary field in one place, along with clear suggestions on where to begin the search for more. Geared towards undergraduate and graduate students in journalism, communication, mass communication, and media studies, as well as towards working journalists, public information officers, and public relations specialists, this encyclopedia introduces this vast, fascinating field while challenging the reader to question assumptions inherent in communication across disciplinary boundaries. Key Themes: Associations and Organizations, Audiences, Opinions and Effects, Challenges, Issues and Controversies, Changing Awareness, Opinion and Behavior, Critical Influences and Events, Global and International Aspects, Government Agencies, US History, Philosophy and Sociology of Science, Important Figures, Journal Publications, Key Cases and Current Trends, Law, Policy, Ethics and Beliefs, Major Infrastructural Initiatives, Practices, Strategies and Tools, Professional Roles and Careers, Public Engagement, Approaches, Theory and Research, Venues and Channels.
