printing bridged gaps between hand production and the more expensive automated printing of the time which included lithography and letterpress. It introduced cheap short run color capabilities and virtually created the whole Point of Purchase (POP) and Specialty Advertising industries along with the billboard and t-shirt printing sectors. An ability to print directly on a wide variety of materials led to use decorating metal, ceramics, textiles, and plastics, spurring record growth, better designs, and lowered costs in any industry that adopted it, from fashion to fine china. Experiments prior to WWII led to printed circuits which in turn revolutionized the electronics industries. All these and more are legacies of the pioneers of screen printing featured in the book *The history of the process is really the history of so many things we take for granted in today's and tomorrow's society*. *Water-Based Screenprinting Today* Roni Henning, 2006. Spotlights green technology safe for all artists. Distinguished author has worked with Andy Warhol, Red Grooms, Romare Bearden, and other top artists. Techniques range from the traditional hands-on to the latest in digital screenprinting. For many years screenprinting was oil-based and presented significant health risks even as it damaged the environment. Today, fortunately, screenprinting has shifted to water-based technologies. Now Roni Henning, a leading expert on screenprinting, offers her tips and techniques for getting the most out of these safer, greener, water-based methods, ranging from the traditional hands-on methods to the latest digital technology. She explains separations and color correcting, then discusses the artist/printmaker collaboration, giving intriguing examples from her own work with such luminaries as Andy Warhol, Red Grooms, and Romare Bearden. Henning also offers step-by-step instructions for monoprinting her own direct-to-screen watercolor process. Illustrated with glowing examples of the printmaking medium, including works by Bearden, Jack Youngerman, Gene Davis, and Elizabeth Osbourne, this is the definitive work on an increasingly popular art.
