 Relapse prevention Young Adults with Serious Mental Illness Cornelia M. Ashby, 2009-02 The transition to adulthood can be difficult for young adults who suffer from a serious mental illness such as schizophrenia or bipolar disorder When these individuals are unsuccessful the result can be economic hardship social isolation and in some cases suicide all of which can pose substantial costs to society This report provides information on 1 the number of these young adults and their demographic characteristics 2 the challenges they face 3 how selected states assist them and 4 how the fed gov t supports states in serving these young adults and coordinates programs that can assist them To do this work the author conducted site visits in Conn Maryland Mass and Miss 4 states that focus on this population Illustrations **Family Psychoeducation for Serious Mental Illness** Harriet P. Lefley, 2009-07-17 This book will provide readers with a comprehensive overview of family psychoeducation as an evidence based psychosocial treatment describing psychoeducational models developed by major research centers in the U S the U K and other European countries as well as presenting data based models developed in China and elsewhere together with discussion of cultural variations and negative findings Trauma and Serious Mental Illness Steven N. Gold, John D. Elhai, 2018-10-24 An exploration of the newfound connections between mental illness and trauma For decades the idea that serious mental illnesses SMIs are almost exclusively biologically based and must be treated pharmacologically has been commonplace in psychology literature As a result many mental health professionals have stopped listening to their clients categorizing their symptoms as manifestations of neurologically based disturbed thinking Trauma and Serious Mental Illness is the groundbreaking series of works that challenge this standard view and provides a comprehensive introduction to the emerging perspective of SMIs as trauma based This unique collection illustrates how different psychotherapy approaches can lead to reduced symptomatology decreased psychological distress and improved functioning in individuals living with SMIs Each extensively referenced chapter in Trauma and Serious Mental Illness offers mental health workers a forward looking theoretical inquiry empirical study or critical treatise providing compelling counter evidence to challenge the widespread belief that SMIs are not reactions to the extreme and extremely disturbing circumstances embodied by psychological trauma In addition to the etiological application this revealing text proposes ways to incorporate this cutting edge approach toward treatment options as well Contributors to Trauma and Serious Mental Illness suggest that childhood trauma is related to psychotic disorders dissociation can be confounded with psychotic symptoms auditory hallucinations can be diagnostic of dissociation rather than psychosis psychosis is related to the quality of family of origin environment and to age of onset of childhood abuse bipolar and trauma related disorders sometimes overlap individuals with SMIs suffer related trauma even in treatment facilities and much more Trauma and Serious Mental Illness is an eye opening resource for mental health professionals psychologists counselors psychiatrists social workers trauma workers and educators and students in these disciplines **Sexuality and Serious Mental Illness** Peter F

Reducing the Mortality Gap in People with Severe Mental Disorders: the Role of Lifestyle Psychosocial Interventions Andrea Fiorillo,Maurizio Pompili,Mario Luciano,Norman Sartorius,2019-10-15 Patients with severe mental disorders SMD including major depression bipolar disorder schizophrenia and related spectrum disorders have a reduced life expectancy of 10 25 year compared with the general population This life expectancy gap is mainly due to the co occurrence of many physical diseases such as hypertension coronary heart disease stroke chronic obstructive pulmonary disease tuberculosis hepatitis and HIV Factors contributing to the reduced life expectancy can be grouped into three main categories a factors related to the patient b factors related to clinicians and c factors related to the health system As regards the first group patients with SMD often adopt unhealthy lifestyle behaviors including heavy smoking reduced physical activity sedentary behaviors poor diet and alcohol or drug abuse and are reluctant to seek for physical care with GPs and other medical specialists Increasing the levels of physical activity improving the dietary patterns and reducing the smoking habits of people with severe mental disorders represent a global health challenge and a public health priority Until now attempts made to reduce this mortality gap have acted at three different levels health

system level physician level and patient level The third level interventions include electronic alerts through smartphones and web based platforms intensive case management promotion of healthy habits complex psychosocial interventions Several population based studies have showed that lifestyle behaviors are amenable to change through the adoption of specific psychosocial interventions However most clinical guidelines although emphasizing the importance of health monitoring and regular check ups for patients with severe mental illnesses do not make specific recommendations on the provision of lifestyle interventions These lifestyle oriented interventions consisting of behavioral educational and psychological components have been conducted mainly in research settings and have shown a good impact on patients physical health Despite this their feasibility in routine settings has not been tested yet It seems to be clinically and ethically relevant to develop validate and carry out interventions to improve the lifestyle s behaviors of patients with severe mental disorders to reduce the presence of comorbidities and to improve their life expectancy In this Research Topic we will summarize the available knowledge of the efficacy and effectiveness of psychosocial interventions aimed at improving healthy lifestyle behaviors and promoting the physical health of patients with severe mental disorders Total number of articles 19

Gun Violence and Mental Illness Liza H. Gold, Robert I. Simon, 2015-11-17 Perhaps never before has an objective evidence based review of the intersection between gun violence and mental illness been more sorely needed or more timely Gun Violence and Mental Illness written by a multidisciplinary roster of authors who are leaders in the fields of mental health public health and public policy is a practical guide to the issues surrounding the relation between firearms deaths and mental illness Tragic mass shootings that capture headlines reinforce the mistaken beliefs that people with mental illness are violent and responsible for much of the gun violence in the United States This misconception stigmatizes individuals with mental illness and distracts us from the awareness that approximately 65% of all firearm deaths each year are suicides This book is an apolitical exploration of the misperceptions and realities that attend gun violence and mental illness The authors frame both pressing social issues as public health problems subject to a variety of interventions on individual and collective levels including utilization of a novel perspective evidence based interventions focusing on assessments and indicators of dangerousness with or without indications of mental illness Reader friendly well structured and accessible to professional and lay audiences the book Reviews the epidemiology of gun violence and its relationship to mental illness exploring what we know about those who perpetrate mass shootings and school shootings Examines the current legal provisions for prohibiting access to firearms for those with mental illness and whether these provisions and new mandated reporting interventions are effective or whether they reinforce negative stereotypes associated with mental illness Discusses the issues raised in accessing mental health treatment in regard to diminished treatment resources barriers to access and involuntary commitment Explores novel interventions for addressing these issues from a multilevel and multidisciplinary public health perspective that does not stigmatize people with mental illness This includes reviews of suicide risk assessment increasing

treatment engagement legal social and psychiatric means of restricting access to firearms when people are in crisis and when appropriate restoration of firearm rights Mental health clinicians and trainees will especially appreciate the risk assessment strategies presented here and mental health public health and public policy researchers will find Gun Violence and Mental Illness a thoughtful and thought provoking volume that eschews sensationalism and embraces serious scholarship

Brain-Metabolic Crossroads in Severe Mental Disorders - Focus on Metabolic Syndrome Virginio Salvi,Tomas Hajek,2019-10-23

Clinical Case Management Robert W. Surber,1994 The integration of a broad array of interventions is described in this comprehensive practical guide for those working with seriously mentally ill adults It draws on the experience of clients who struggle with severe and disabling problems in a challenging urban environment The contributors argue that psychological and practical issues are intertwined and therefore such interventions must be delivered concurrently They also emphasize that understanding and using the resources of a client s culture is critical to the successful implementation of care and that families and natural support systems are essential components of the care system
