Longevity To The Limits And Beyond:

Longevity: To the Limits and Beyond Jean-Marie Robine, James W. Vaupel, Bernard Jeune, Michel Allard, 2012-12-06
Why longevity For a number of years the Fondation IPSEN has been devoting considerable effort to the various aspects of ageing not only to age related diseases such as Alzheimer s but also to the Centenarians the paragon of positive ageing The logical continuation of this approach is to address the question of longevity in global terms Behind the extreme values what span is accessible to all of us and likely to directly concern most of our contemporaries The individual and collective increase in the duration of life is one of the most striking phenomena of our time It could be one of the most significant events in the bio social history of humanity The increase in life expectancy at old age which started a few decades ago only is going on The most well advised observer had not foreseen or even dared hope for this increase which will drastically affect our everyday life our habits and our behavior In the fragment of human history we are living in it is our responsibility to deal with this major transformation for the species Such a transformation needs an effort from all to adapt to the new conditions This transformation has to be managed rather than simply experienced anticipated rather than followed in order to avoid any attempt to pervert this major step forward All that was present during the first symposium of the new series on longevity of the Colloques Medecine et Recherche convened by the Fondation IPSEN

Beyond Longevity Jason Prall, 2023-12-26
Features new science that updates the blue zones secrets to healthy happy longevity with a flexible holistic approach that incorporates epigenetics nutrition and mental health Through his documentary film series The Human Longevity Project Jason Prall traveled to select regions around the world known for their long lived healthy populations He sought to understand not only the longevity secrets of these societies but also the scientific basis underpinning their health wisdom Through his travels he came to the realization that while the pursuit of longevity is sexy it s insufficient and hollow what most of us really want is an extended life filled with vibrant health meaning and purpose We want to thrive as we age This book combines his own personal experiences with the knowledge and wisdom gained from interviewing more than 100 health experts and dozens of amazing elders from around the world You ll discover that when experiential wisdom is supported by the latest scientific research a more integrated picture emerges of how you can most effectively increase your happiness health and longevity Life is a mysterious process with a natural development order and cycle It is lent to us for a brief moment before the physical body is left behind If we wish to thrive in the modern world we must create a mental emotional physical and energetic environment that is congruent with this natural life cycle The reality that humanity has created filled with next generation technologies and increasing comforts presents both unique opportunities and novel challenges We have the option to choose a more harmonious path that establishes greater coherence within ourselves one another and the environment This is the amazing opportunity that lies before us When we live from alignment all life benefits
