**Giotto the Painter. Volume 3: Survival** Michael Viktor Schwarz, 2023-04-17

Giotto is considered by many to be the founder of modern painting. This thesis is discussed and modified in the present volume on an empirical basis. What emerges is that Giotto's impact cannot be reduced simply to the introduction of the study of nature. Rather, his art was involved in the development of pictorial idioms that were attuned to the skills and interests of their audiences. The new approaches in his painting contributed in particular to the possibility of examining and communicating psychological narrative and allegorical content of great complexity outside the media of language and text, which not only changed the face of European art but certainly contributed to the intellectual opening of Western societies.

**A Documentary History of Art, Volume 1** Elizabeth Gilmore Holt, 2024-05-21. An illuminating one-volume compendium of primary documents on the art of medieval and Renaissance Europe. This unique collection brings together notebooks, letters, treatises, and contracts dealing with the art of the Middle Ages and Renaissance, providing extraordinary insights into the personalities and conditions of the times and revealing the stylistic and philosophical concerns that evolved during these intensely creative eras. These documents, many of them available here in English for the first time, range from Raoul Glaber's famous 1003 treatise on the synthesis of old and new art forms to Durand's essay on Christian symbolism in art and the writings of Leonardo and Dürer on anatomy, perspective, and the recreation of reality. They trace how a medieval conception of life that was inspired, oriented, and dominated by the church evolved gradually into the great reawakening of the Renaissance, in which humankind itself assumed primary importance in Western art.

Renaissance Vision from Spectacles to Telescopes Vincent Ilardi, 2007. Deals with the history of eyeglasses from their invention in Italy ca. 1286 to the appearance of the telescope three centuries later. By the end of the 16th century, eyeglasses were as common in western and central Europe as desktop computers are in western developed countries today. Eyeglasses served an important technological function at both the intellectual and practical level, not only easing the textual studies of scholars but also easing the work of craftsmen. Small business. During the 15th century, two crucial developments occurred: the ability to grind convex lenses for various levels of presbyopia and the ability to grind concave lenses for the correction of myopia. As a result, eyeglasses could be made almost to prescription by the early 17th century. Illus.

**Romanesque Renaissance** Konrad Adriaan Ottenheym, 2021-01-11. In early modern times, scholars and architects investigated age-old buildings in order to look for useful sources of inspiration. They too occasionally misinterpreted younger buildings as proofs of majestic Roman or other ancient glory, such as the buildings of the Carolingian, Ottonian, and Stauffer emperors. But even if the correct age of a certain building was known, buildings from c. 800–1200 were sometimes regarded as antique architecture since the concept of antiquity was far more stretched than our modern periodisation allows. This was a Europe-wide phenomenon. The results are rather diverse in style, but they all share an intellectual and artistic strategy: a conscious revival of an ancient architecture, whatever the date and origin of these models.
