and explores the connection between Run D M C Snoop Dogg and Hegel Hip Hop and Philosophy proves that rhyme and reason far from being incompatible can be mixed and mastered to contemplate life s most profound mysteries State of the Masses Richard F. Hamilton, Is the consciousness of Americans in the midst of dramatic transformation Or do people think and feel much the same as they have always thought and felt Do most people enjoy their work or hate it Is the American family being replaced by new institutional forms or is it much the same as it was in the 1950 s Have material values been replaced by a postmaterial consciousness in a postindustrial society Are Americans becoming more conservative less conservative or staying about the same State of the Masses asks the important questions Originally published in 1986 this prescient study evaluate the views of social critics neo conservatives neo Marxists post industrialists and the theorists of the little man who puport to describe the nature social conditions outlooks and motivations of the American populace The claims of one group are often diametrically opposed to those of another The authors make the case for which claims can be considered true and which false Hamilton and Wright analyze the contradictory claims and compares their implications with the best social science research and data available at that time They also explore the implications for theories in light of the conflicting portrait the evidence provides The authors conclude with a new perspective for understanding continuities and changes in the United States This is a prescient view of American society during turmoil and a model for how social science research can be used predictively *Fate and Fortune in European Thought, ca. 1400-1650* Ovanes Akopyan, 2021-04-26 If the universe were conceived to fulfill a certain divine plan or to manifest God s will and glory what would the place of an individual be within this plan What is more if from the very beginning of its existence and through divine providence it were predestined to be driven toward a certain end how could people adjust their individual lives to the incognizable universal design and react to the obscure future fraught with both luck and failure These questions which have occupied humanity for centuries formed a remarkable element of early modern European thought This collection of essays presents new insights into what shaped and constituted reflections on fate and fortune between roughly 1400 and 1650 both in word and image This volume argues that these ideas were emblematic of a more fundamental argument about the self society and the universe and shows that their influence was more widespread geographically and thematically than hitherto assumed Contributors Damiano Acciarino Ovanes Akopyan Elisabeth Blum Paul Richard Blum Jo Coture Guido Giglioni Dalia Judovitz Sophie Raux Orlando Reade and John Sellars **Time and Decision** George Loewenstein, Daniel Read, Roy F. Baumeister, 2003-02-27 How do people decide whether to sacrifice now for a future reward or to enjoy themselves in the present Do the future gains of putting money in a pension fund outweigh going to Hawaii for New Year s Eve Why does a person s self discipline one day often give way to impulsive behavior the next Time and Decision takes up these questions with a comprehensive collection of new research on intertemporal choice examining how people face the problem of deciding over time Economists approach intertemporal choice by means of a model in which people discount the value of future events

at a constant rate A vacation two years from now is worth less to most people than a vacation next week Psychologists on the other hand have focused on the cognitive and emotional underpinnings of intertemporal choice Time and Decision draws from both disciplinary approaches to provide a comprehensive picture of the various layers of choice involved Shane Frederick George Loewenstein and Ted O Donoghue introduce the volume with an overview of the research on time discounting and focus on how people actually discount the future compared to the standard economic model Alex Kacelnik discusses the crucial role that the ability to delay gratification must have played in evolution Walter Mischel and colleagues review classic research showing that four year olds who are able to delay gratification subsequently grow up to perform better in college than their counterparts who chose instant gratification The book also delves into the neurobiology of patience examining the brain structures involved in the ability to withstand an impulse Turning to the issue of self control Klaus Wertenbroch examines the relationship between consumption and available resources showing for example how a high credit limit can lead people to overspend Ted O Donoghue and Matthew Rabin show how people s awareness of their self control problems affects their decision making The final section of the book examines intertemporal choice with regard to health drug addiction dieting marketing savings and public policy All of us make important decisions every day many of which profoundly affect the quality of our lives Time and Decision provides a fascinating look at the complex factors involved in how and why we make our choices so many of them short sighted and helps us understand more precisely this crucial human frailty
