Gender and Nation in Meiji Japan Jason G. Karlin, 2014-04-30 Gender and Nation in Meiji Japan is a historical analysis of the discourses of nostalgia in late nineteenth and early twentieth century Japan Through an analysis of the experience of rapid social change in Japan s modernization it argues that fads ry k and the desires they express are central to understanding Japanese modernity conceptions of gender and discourses of nationalism In doing so the author uncovers the myth of eternal return that lurks below the surface of Japanese history as an expression of the desire to find meaning amid the chaos and alienation of modern times The Meiji period 1868 1912 was one of rapid change that hastened the process of forgetting The state s aggressive program of

modernization required the repression of history and memory. However repression merely produced new forms of desire seeking a return to the past with the result that competing or alternative conceptions of the nation haunted the history of modern Japan. Rooted in the belief that the nation was a natural and organic entity that predated the rational modern state such conceptions often were responses to modernity that envisioned the nation in opposition to the modern state. What these visions of the nation shared was the ironic desire to overcome the modern condition by seeking the timeless past. While the condition of their repression was often linked to the modernizing policies of the Meiji state the means for imagining the nation in opposition to the state required the construction of new symbols that claimed the authority of history and appealed to a rearticulated tradition. Through the idiom of gender and nation new reified representations of continuity, timelessness and history were fashioned to compensate for the unmooring of inherited practices from the shared locales of everyday life. This book examines the intellectual, social and cultural factors that contributed to the rapid spread of Western tastes and styles along with the backlash against Westernization that was expressed as a longing for the past. By focusing on the expressions of these desires in popular culture and media texts it reveals how the conflation of mother, countryside, everyday life and history structured representations to naturalize ideologies of gender and nationalism.

Samuel Butler, Victorian Against the Grain James G. Paradis, 2007-12-29 Samuel Butler 1835-1902 Victorian satirist, critic and visual artist possessed one of the most original and inquiring imaginations of his age. The author of two satires *Erewhon* 1872 and *The Way of All Flesh* 1903 Butler's intellectually adventurous explorations along the cultural frontiers of his time appeared in volume after volume. Author of four works on evolution he was one of the most prolific evolutionary speculators of his time. He was an innovative travel writer and art historian who used the creative insights of his own painting, photography and local knowledge to invent in works like *Alps and Sanctuaries* 1881 a vibrant Italian culture that contrasted with the spiritually frigid experience of his High Church upbringing. Despite his range and achievement there remains surprisingly little contemporary analytical commentary on Butler's work. *Samuel Butler, Victorian Against the Grain* is an interdisciplinary collection of essays that provides a critical overview of Butler's career, one which places his multifaceted body of work within the cultural framework of the Victorian age. The essays taken together discuss the formation of Victorian England's ultimate polymath, an artistic and intellectual ventriloquist who assumed an extraordinary range of roles as satirist, novelist, evolutionist, natural theologian, travel writer, art historian, biographer, classicist, painter and photographer.
