Behold the Dark Gray Man Katherine Campbell, 2021-07-27 Katharine Campbell's father Sholto Douglas was the hero of her childhood an unconventional senior commander in the Royal Air Force described as a gloriously contentious character Following childhood abandonment and poverty Sholto rose through the ranks of the fledgling RAF in the First World War before taking on a crucial role in the Second as head of Fighter Command and going on to serve as Military Governor in Germany in the war's devastating aftermath But when Katharine was five years old he began to be stolen away by strange night time wanderings and daytime distress including vivid flashbacks to his time signing death warrants in post war Germany The doctors called it dementia but decades later Katharine started researching her father's story and realised that she had observed the undiagnosed consequences of post traumatic stress disorder PTSD is a hot topic today We're aware of the front line soldier suffering from shell shock but what about the senior officer giving the orders who may be carrying hidden wounds accumulated over many years We don't expect our military leaders to have PTSD nor is it something they often recognise or acknowledge in themselves yet this secret burden likely affects a surprising number of those making important tactical decisions A thought provoking insight into the damage done by military conflict *Behold the Dark Gray Man* is the story of a daughter's search to understand the impact of war upon one of its most charismatic senior commanders

A Survey of War Neurosis and Its Aftermath ... Norman Fenton, 1925 **War Neuroses and Shell Shock** Frederick Walker Mott, 2020-09-29 This book has been considered by academicians and scholars of great significance and value to literature This forms a part of the knowledge base for future generations So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published Hence any marks or annotations seen are left intentionally to preserve its true nature

Shell-Shock Anthony Babington, 1990-12-31 As Anthony Babington is careful to point out in his foreword this is not a medical book It is rather a distillation in words which any layman can understand of the long struggle by the medical profession and by influential civilians of an understanding frame of mind to persuade the Service Chiefs in particular Senior army officers that soldiers can only stand so much fighting In the First World War as Babington points out men were shot at dawn for cowardice or desertion One can only wonder that many more didn't crack up under the appalling stress to which they were subjected By 1939 the situation had improved and of course the Second World War was a much more mobile affair without the set piece mass slaughter that characterised the earlier conflict It may also be remarked that it was much easier for the average private soldier to realize that he was fighting for a good cause the Nazis being more readily identifiable as bogeymen than the soldiers of the Kaiser There are those who argue that in the postwar era things have gone too far in the opposite direction Indeed Babington quotes the Duke of Edinburgh as saying We didn't have counsellors rushing around every time someone let off a gun asking Are you alright You just got on with it Nonetheless few would argue that a counsellor is preferable to a firing squad Judge Babington has produced a fascinating if sometimes harrowing study of the effects of war upon the fighting soldier of the gradual understanding of the problem of battle fatigue and of the more merciful and sympathetic approach to its treatment Readers of his earlier works will appreciate that it is a subject which he is uniquely qualified to handle
