Voices from the Global Margin William P. Mitchell,2021 *Voices from the Global Margin* looks behind the generalities of debates about globalization to explore the personal impact of global forces on the Peruvian poor In this highly readable ethnography William Mitchell draws on the narratives of people he has known for forty years offering deep insight into how they have coped with extreme poverty and rapid population growth and their creation of new lives and customs in the process In their own passionate words they describe their struggles to make ends meet many abandoning rural homes for marginal wages in Lima and the United States They chronicle their terror during the Shining Path guerrilla war and the government s violent military response Mitchell s long experience as an anthropologist living with the people he writes about allows him to put the stories in context helping readers understand the impact of the larger world on individuals and their communities His book reckons up the human costs of the global economy urging us to work toward a more just world

photographs **Amnesty, Human Rights and Political Transitions** Louise Mallinder, 2008-09-10 Amnesty laws are political tools used since ancient times by states wishing to quell dissent introduce reforms or achieve peaceful relationships with their enemies In recent years they have become contentious due to a perception that they violate international law particularly the rights of victims and contribute to further violence This view is disputed by political negotiators who often argue that amnesty is a necessary price to pay in order to achieve a stable peaceful and equitable system of government This book aims to investigate whether an amnesty necessarily entails a violation of a state's international obligations or whether an amnesty accompanied by alternative justice mechanisms can in fact contribute positively to both peace and justice This study began by constructing an extensive Amnesty Law Database that contains information on 506 amnesty processes in 130 countries introduced since the Second World War The database and chapter structure were designed to correspond with the key aspects of an amnesty why it was introduced who benefited from its protection which crimes it covered and whether it was conditional In assessing conditional amnesties related transitional justice processes such as selective prosecutions truth commissions community based justice mechanisms lustration and reparations programmes were considered Subsequently the jurisprudence relating to amnesty from national courts international tribunals and courts in third states was addressed The information gathered revealed considerable disparity in state practice relating to amnesties with some aiming to provide victims with a remedy and others seeking to create complete impunity for perpetrators To date few legal trends relating to amnesty laws are emerging although it appears that amnesties offering blanket unconditional immunity for state agents have declined Overall amnesties have increased in popularity since the 1990s and consequently rather than trying to dissuade states from using this tool of transitional justice this book argues that international actors should instead work to limit the more negative forms of amnesty by encouraging states to make them conditional and to introduce complementary programmes to repair the harm and prevent a repetition of the crimes David Dyzenhaus This is one of the best accounts in the truth and reconciliation literature I've read and certainly the best piece of work on amnesty I've seen Diane Orentlicher Ms Mallinder's ambitious project provides the kind of empirical treatment that those of us who have worked on the issue of amnesties in international law have long awaited I have no doubt that her book will be a much valued and widely cited resource

Rereading Cultural Anthropology George E. Marcus, 1992 During its first six years 1986-1991 the journal Cultural Anthropology provided a unique forum for registering the lively traffic between anthropology and the emergent arena of cultural studies The nineteen essays collected in Rereading Cultural Anthropology all of which originally appeared in the journal capture the range of approaches internal critiques and new questions that have characterized the study of anthropology in the 1980s and which set the agenda for the present Drawing together work by both younger and well established scholars this volume reveals various influences in the remaking of traditions of ethnographic work in anthropology feminist studies poststructuralism cultural critiques and disciplinary challenges to established boundaries
