Power and Politics in Globalization Howard H. Lentner, 2004-09-15 Challenging the conventional view that globalization embodies a new and inexorable process this book analyzes the political foundations and choices involved in contemporary arrangements in the world Rather than treating politics as contention for control over an unforeseeable future the book explains the background by which the world has arrived at its present state Thus the author presents a view that emphasizes continuity with the past while still acknowledging what is new in the present Invoking many examples throughout the author bolsters the theoretical analysis in an extended case study of Malaysia

Leadership and Local Power in European Rural Development Imre Kovách, 2017-05-15 Contemporary processes of economic social political and cultural restructuring are having profound impacts on the form and function of rural areas within the countries of the European Union and beyond Furthermore rural development policies and programmes at EU and national levels have been critical in shaping the responses of different rural areas across Europe to these wider processes of restructuring Contrasting empirical studies of ten European countries this volume provides a comprehensive analysis of the restructuring processes and the various national regional and local rural development programmes Adopting a different national perspective in each

chapter it focuses particularly on issues of power and leadership in the evolution and administration of these programmes Five broad issues are examined in each case socio economic changes in rural areas the administrative context in which rural development and political activities take place the sociological context the political control of rural development and the use of different discourses of rurality in shaping the development process Globalisation contested Louise Amoore, 2013-07-19 This electronic version has been made available under a Creative Commons BY NC ND open access license This exciting book provides an illuminating account of contemporary globalisation that is grounded in actual transformations in the areas of production and the workplace It reveals the social and political contests that give global its meaning by examining the contested nature of globalisation as it is expressed in the restructuring of work Rejecting conventional explanations of globalisation as a process that automatically leads to transformations in working lives or as a project that is strategically designed to bring about lean and flexible forms of production this book advances an understanding of the social practices that constitute global change Through case studies that span from the labour flexibility debates in Britain and Germany to the strategies and tactics of corporations and workers the author examines how globalisation is interpreted and experienced in everyday life Contestation she argues is about more than just direct protests and resistances It has become a central feature of the practices that enable or confound global restructuring This book offers students and scholars of international political economy sociology and industrial relations an innovative framework for the analysis of globalisation and the restructuring of work **Between Governing and Governance** Poul F Kjaer, 2010-02-05 This book explains the emergence and functioning of three forms of governance structures within the context of the European integration and constitutionalisation process comitology regulatory agencies and the Open Method of Co ordination The point of departure is the insight that the intergovernmental supranational distinction which most theories of European integration and constitutionalisation rely on has lost its strength A new paradigm of EU research is therefore needed Against this background it is suggested that the distinction between governing and governance provides a more appropriate basis for analysing the phenomenon of integration and constitutionalisation in Europe The distinction between governing and governance allows for an understanding of the EU as a hybrid consisting of a governing dimension characterised by legal and organisational hierarchy and a governance dimension which operates within a network form characterised by legal and organisational heterarchy The function of governance structures is to ensure the embeddedness of the governing dimension in the wider society Instead of representing contradictory developments the two dimensions are therefore mutually constitutive in the sense that more governing implies more governance and vice versa These theoretical insights are illustrated through two detailed case studies which respectively reconstruct the operational mode of the Open Method of Coordination within EU Research Development Policy and the regulatory system for the EU chemicals market REACH The book is inter disciplinary in nature and incorporates insights from law political science and sociology *Power and Communication* Giovanni

Ciofalo, Silvia Leonzi, Antonio Di Stefano, 2015-10-05 This book represents a significant contribution to the discussion on the part played by communication especially in its mediated forms in people's lives dwelling on the nature of the relationship between the notion of power and the media in current Western societies The media have dramatically increased their capacity to exercise their symbolic force over other fields of cultural production by partly structuring those intrinsic rules values and practices that organize for example the political system or the academic world from the inside On the other hand the media are intertwined environments subjected to the influence of other cultural economic and political forces which in turn reveal themselves to be capable of framing reality through the media themselves Particularly focusing on the topic of the economic crisis the various chapters of this edited volume highlight how the relationship between the media and other forces capable of pervasively exercising their power appears to be paradoxically as strict as it is opaque Social media and smart mobile technologies have increasingly affected the modalities whereby other institutions and organizations reflect on themselves and develop their worldviews At the same time however politics and economics experts and strategists have all learned how to exploit this potential for their own purposes Detecting the opacity that characterizes this form of exploitation is the first step in the acknowledgment of this phenomenon **The EU-Russia Strategic Partnership** Hiski

Haukkala, 2010-02-25 This book explores why despite the initial promise and enthusiasm at the beginning of the 1990s the European Union EU and the Russian Federation have encountered severe difficulties in developing their institutionalised relationship **Communication Power** Manuel Castells, 2013-08-29 In this wide ranging book Castells analyses the

transformation of the global media industry by the revolution in communication technologies He argues that a new communication system mass self communication has emerged power relationships have been profoundly modified by the emergence of this new communication environment **Islam and Warfare** Onder Bakircioglu, 2014-10-30 The question of

how Islamic law regulates the notions of just recourse to and just conduct in war has long been the topic of heated controversy and is often subject to oversimplification in scholarship and journalism This book traces the rationale for aggression within the Islamic tradition and assesses the meaning and evolution of the contentious concept of jihad The book reveals that there has never been a unified position on what Islamic warfare tangibly entails due to the complexity of relevant sources and discordant historical dynamics that have shaped the contours of jihad Onder Bakircioglu advocates a dynamic reading of Islamic law and military tradition one which prioritises the demands of contemporary international relations and considers the meaning and application of jihad as contingent on the socio political forces of each historical epoch This book will be of great interest to scholars and students of international law Islamic law war and security studies and the law of armed conflict *Environmental Politics in Latin America* Benedicte Bull, Mariel Aguilar-Stoen, 2014-11-13 Since colonial

times the position of the social political and economic elites in Latin America has been intimately connected to their control over natural resources Consequently struggles to protect the environment from over exploitation and contamination have

been related to marginalized groups struggles against local national and transnational elites The recent rise of progressive left leaning governments often supported by groups struggling for environmental justice has challenged the established elites and raised expectations about new regimes for natural resource management Based on case studies in eight Latin American countries Argentina Brazil Chile Ecuador Colombia Bolivia El Salvador and Guatemala this book investigates the extent to which there have been elite shifts how new governments have related to old elites and how that has impacted on environmental governance and the management of natural resources It examines the rise of new cadres of technocrats and the old economic and political elites struggle to remain influential The book also discusses the challenges faced in trying to overcome structural inequalities to ensure a more sustainable and equitable governance of natural resources This timely book will be of great interest to researchers and masters students in development studies environmental management and governance geography political science and Latin American area studies **The Oxford Handbook of Project**

Management Peter W. G. Morris, Jeffrey K. Pinto, Jonas Söderlund, 2012-07-19 The Oxford Handbook of Project Management presents and discusses leading ideas in the management of projects Positioning project management as a domain much broader and more strategic than simply execution management this Handbook draws on the insights of over 40 scholars to chart the development of the subject over the last 50 years or more as an area of increasing practical and academic interest It suggests we could be entering an emerging third wave of analysis and interpretation following its early technical and operational beginnings and the subsequent shift to a focus on projects and their management Topics dealt with include the historical evolution of the subject its theoretical base professionalism business and societal context strategy organization governance innovation overruns risk information management procurement relationships and trust knowledge management practice and teams This handbook is of particular relevance to those interested in the research issues underlying project management **Power in the Global Age** Ulrich Beck, 2014-10-15 This brilliant new book by one of Europe's leading social

thinkers throws light on the global power games being played out between global business nation states and movements rooted in civil society Beck offers an illuminating account of the changing nature of power in the global age and assesses the influence of the ever expanding counter powers The author puts forward the provocative thesis that in an age of global crises and risks a politics of golden handcuffs the creation of a dense network of transnational interdependencies is exactly what is needed in order to regain national autonomy not least in relation to a highly mobile world economy It is imperative that the maxim of nation based realpolitik that national interests have necessarily to be pursued by national means be replaced by the maxim of cosmopolitan realpolitik The more cosmopolitan our political structures and activities Beck suggests the more successful they will be in promoting national interests and the greater our individual power in this global age will be

Dedan Kimathi on Trial Julie MacArthur, 2017-11-27 The transcript from this historic trial long thought destroyed or hidden unearths a piece of the British colonial archive at a critical point in the Mau Mau Rebellion Its discovery and

landmark publication unsettles an already contentious Kenyan history and its reverberations in the postcolonial present Perhaps no figure embodied the ambiguities colonial fears and collective imaginations of Kenya's decolonization era more than Dedan Kimathi the self-proclaimed field marshal of the rebel forces that took to the forests to fight colonial rule in the 1950s Kimathi personified many of the contradictions that the Mau Mau Rebellion represented rebel statesman literate peasant modern traditionalist His capture and trial in 1956 and subsequent execution for many marked the end of the rebellion and turned Kimathi into a patriotic martyr Here the entire trial transcript is available for the first time This critical edition also includes provocative contributions from leading Mau Mau scholars reflecting on the meaning of the rich documents offered here and the figure of Kimathi in a much wider field of historical and contemporary concerns These include the nature of colonial justice the moral arguments over rebellion nationalism and the end of empire and the complexities of memory and memorialization in contemporary Kenya Contributors David Anderson Simon Gikandi Nicholas Githuku Lotte Hughes and John Lonsdale Introductory note by Willy Mutunga

The Political Economy of Disney Alexandre Bohas, 2016-09-15 This book sheds new light on the socio-economic impact of multinational corporations Combining Cultural Studies and International Political Economy it provides a revealing analysis of the Walt Disney Company and by extension the wider Hollywood studio system It does so by examining the cultural and economic forces powering the industry's expansion the civilisation that Disney disseminates and the various ways that societies beyond the USA have adopted facets of the Hollywood productions to which they are exposed Identifying both the strengths and the weaknesses of these transnational firms it demonstrates the significance of their contribution to American power and predominance

Resisting Gendered Norms Mona Lilja, 2016-04-08 Political scientists have on occasion missed subtle but powerful forms of everyday resistance and have not been able to show how different representations pictures statements images practices have different impacts when negotiating power Instead they have concentrated on open forms of resistance organized rebellions and collective actions Departing from James Scott's idea that oppression and resistance are in constant change *Resisting Gendered Norms* provides us with a compelling account on the nexus between gender resistance and gender-based violence in Cambodia To illustrate how resistance is often carried out in the tension between on the one hand universal globalised representations and on the other local truths and identity constructions in-depth interviews with civil society representatives politicians as well as stakeholders within the legal juridical system were conducted

The European Union, Russia and the Shared Neighbourhood Jackie Gower, Graham Timmins, 2013-09-13 The conflict in South Ossetia in the summer of 2008 and the Ukrainian energy crisis in early 2009 served to highlight the tensions that continue to influence EU Russia relations in regard to the region comprising the former republics of the Soviet Union or the shared neighbourhood This book draws together research which examines the objectives of EU and Russian foreign policy and the complexities of the security challenges in this region Although both actors have a shared interest in cooperating to create

conditions of peace and stability we have in recent years observed the development of growing competition between the EU and Russian foreign policy agendas This book was based on a special issue of Europe Asia Studies Intelligence in an Insecure World Peter Gill, Mark Phythian, 2013-08-27 Over a decade on from the terrorist attacks of 9 11 intelligence continues to be of central importance to the contemporary world Today there is a growing awareness of the importance of intelligence and an increasing investment in it as individuals groups organizations and states all seek timely and actionable information in order to increase their sense of security But what exactly is intelligence Who seeks to develop it and how What happens to intelligence once it is produced and what dilemmas does this generate How can liberal democracies seek to mitigate problems of intelligence and what do we mean by intelligence failure In a fully revised and expanded new edition of their classic guide to the field Peter Gill and Mark Phythian explore these and other questions Together they set out a comprehensive framework for the study of intelligence discussing how intelligence can best be understood how it is collected analysed disseminated and acted upon how it raises ethical problems and how and why it fails Drawing on a range of contemporary examples *Intelligence in an Insecure World* is an authoritative and accessible guide to a rapidly expanding area of enquiry one which everyone has an interest in understanding *City Futures* Doctor Edgar Pieterse, 2013-04-04 Cities are the future In the past two decades a global urban revolution has taken place mainly in the South The mega cities of the developing world are home to over 10 million people each and even smaller cities are experiencing unprecedented population surges The problems surrounding this influx of people slums poverty unemployment and lack of governance have been well documented This book is a powerful indictment of the current consensus on how to deal with these challenges Pieterse argues that the current shelter for all and urban good governance policies treat only the symptoms not the causes of the problem Instead he claims there is an urgent need to reinvigorate civil society in these cities to encourage radical democracy economic resilience social resistance and environmental sustainability folded into the everyday concerns of marginalised people Providing a dynamic picture of a cosmopolitan urban citizenship this book is an essential guide to one of the new century's greatest challenges **Globalization and Geopolitics in the Middle East** Anoushiravan Ehteshami, 2007-03-14 Examining globalization in the Middle East this book provides a much needed assessment of the impact of globalization in the greater Middle East including North Africa in the context of the powerful geopolitical forces at work in shaping the region today Written by a well known authority in this area this book demonstrates that unlike in other regions such as East Asia geopolitics has been a critical factor in driving globalization in the Middle East The author argues that whereas elsewhere globalisation has opened up the economy society culture and attitudes to the environment in the Middle East it has had the opposite effect with poor state formation little interregional trade foreign and interregional investment and reassertion of traditional identities This book explores the impact of globalization on the politics economies and social environment of the greater Middle East in the context of the region's position as the central site of global
